NEW FRUITS.

NEW APPLES, 1909.

2/6 each.

Carlton.—Raised from "Northern Spy." Tree blight-proof; a strong, thrifty grower, and most prolific bearer; fruit very large, yellow-striped, and suffused with carmine; flesh crisp, juicy, and of delicious flavour.

Cardinal (syn. "Peter the Great").—An apple from the Crimea, bears abundantly and makes a pretty, fruitful pyramid. Flesh sprightly, sweet, and transparent; color of the fruit, yellow, flecked with red; early.

Edward VII.—A cross from Blenheim Orange and Golden Noble, skin yellow, marbled brown, dark red on the sunny side, flavor of Blenheim Orange; one of the very best late kitchen and table apples; very prolific.

King David.—"King David" is a rich dark-red apple, with yellowish flesh; flavor good, juicy and rich; indeed, the quality is of the very best. The apple is supposed to be a cross between Jonathan and Arkansas Black, and adds the quality of the former to the fine appearance of the latter. The King David Apple has been exhibited at a number of horticultural meetings, and several years ago was awarded the premium by the Illinois State Horticultural Society for the best new apple. Tree is hardy and vigorous, and great things are expected from this new variety.

England's Glory ("Gascoigne Scarlet").—A very handsome, red-cheeked apple from Kent, free grower and a great bearer; a first-class dessert apple.

Wright's Perfection.—A dessert apple of the highest excellence, and a seedling from Jonathan that surpasses its parent in every respect; the tree can almost be considered blight-proof, and is of very dwarf, sturdy habit. This apple is one of the heaviest croppers, and comes into bearing sooner than any other apple, trees bearing freely at one year old in the nursery rows; an ornament to any garden or orchard; in season from March to May.—Raiser's description.

Jewel.—A new South Wales variety, apparently a cross between Trivett's Seedling and Jonathan. This is particularly noticeable in its growth of tree. Fruit somewhat resembles Trivett's Seedling, but has a distinct Jonathan flavor, being juicy, sweet, and very tender. In season, it ripens with Carrington, and appears to be blight-proof. Is doing well in a Cumberland orchard, and in every way promises to be an acquisition.

Foster.—This beautiful apple was raised by Mr. W. N. Foster, of Neerim South. It is of a most beautiful color, and of very fine flavor. Coming into use in February, it will fill up a gap in the market between the very early apples and “Jonathan,” when good dessert apples are scarce. We feel sure it will sell before any other apple at that season, and will keep, if necessary, to middle of April. So far, the parent trees have not been affected with the woolly aphid; it is a free grower and heavy bearer. This will, no doubt, become one of our very best early export apples.

Lady Hopetoun.—This first-class dessert apple was raised by Mr. M. E. Schroeder, of Castlemaine. In appearance, it very much resembles “Jonathan”; the raiser says the tree is perfectly blight-proof, that the fruit hangs well until the end of April, and should be valuable as an export apple.

Thomas Rivers (syn. “Rivers’ Codlin”).—Certificated R.H.S., 4th October, 1892. This apple is a cooking variety of singularly rich flavour, large, and brilliant color; flesh very firm in texture; ready for use in the middle of April, and lasts until July; the tree is very healthy, forming a handsome bush or pyramid; bears abundantly.

Christmas Pearmain.—Fruit medium size and excellent flavour, scarlet on the exposed side, with russet markings; a good grower, and enormous bearer.

Edward Lippiatt.—Fruit large, roundish, sometimes oblate, even and regular in outline; skin yellow, streaked with lively crimson; flesh white, crisp, juicy, and sweet, with a fine aromatic perfume, and exceedingly rich flavor. Tree vigorous, heavy and early bearer; a dessert apple of highest excellence; late.

King’s Acre Pippin.—A splendid late dessert apple; the fruit resembles the Ribston Pippin in shape, but is a little flatter, color greenish yellow, flushed and striped with red; flesh yellow, crisp, and juicy; a valuable market apple; late.

Lady Sudeley.—A good early apple, large pale yellow, marked with crimson streaks, very pretty upright habit, and productive. First class certificate Royal Horticultural Society, England.

Lincolnshire Triumph.—Medium sized, round, handsomely shaped; skin of a deep bright crimson, yellow where shaded, flesh juicy, tender, white stained with red; a good dessert apple; medium.

NEW APRICOTS, 1909.

2/- each.

Alexis.—A Russian apricot; very hardy and prolific bearer; yellow, with red-streaked cheek; large to very large; slightly acid, rich and luscious.

Bruchet.—Oval; skin fine, orange-yellow, very dark carmine on the sunny side; flesh firm, lemon-yellow, fine, melting, well perfumed; early.

Brugarta.—This is considered a most valuable variety; fruit large; flesh bright orange and of delicious flavor; tree symmetrical, upright, and vigorous grower, of robust habit; very productive.

Tilton.—A new Californian seedling; fruit very large, rich apricot color, high flavor, uniform ripening, productive, with frost-resisting qualities and vigorous growth which easily place it far in advance of all other varieties; for drying and caning it is much superior to any of the older sorts.

NEW CHERRIES, 1909.

2/- each.

Bigarreau Noir de Guben.—Large and good, very lustrous in colour and a prolific bearer.

Bigarreau Noir de Schmidt.—A very large black cherry, rich and good; medium.

NEW PEACHES, 1909.

2/- each.

Baltet.—Large fruit, deep coloured, tree vigorous and prolific, variety recommended by the Congress Pomologique of France; the best of all late sorts.

Beauty of Taupaki.—A reliable, heavy bearer, and a hardy grower; fruit large, very showy; flesh yellow, with red at the stone; flavor rich, luscious, and juicy; perfect freestone.

Early Imperial.—A variety ripening with Triumph; of larger size, and more highly colored, and a perfect freestone; should be an acquisition to early peaches, being ripe before fruit fly makes its appearance.

Peregrine.—A distinct midseason variety, distinguished by its good constitution and productiveness. The fruits are large and handsome, with a brilliant crimson skin; the flesh rich, highly flavored, and parting readily from the stone. Raised by Mr. Rivers.

Paragon.—A seedling from "Elberta," medium size, deep yellow, mottled with red when thoroughly ripe; very juicy and rich; clingstone.

Delicious.—An exceedingly handsome peach; skin yellow, with minute carmine dots, red all over towards the sun; flesh yellow, stone small, flavor can only be described as "delicious"; ripens a week before "Crosby," and is the finest desert peach of its season; a sure cropper, and invaluable for small gardens.

Kalamazoo.—The most profitable peach of its season; tree extremely hardy and a certain bearer; fruit large, round, handsome appearance; flesh bright yellow, and deliciously flavored. An invaluable variety for all purposes. Comes in at a good season, ripening after "Sea Eagle."

Lemon Freestone.—Large, pale yellow; in season from 20th March. Tree very productive; flesh rich clear yellow, without any red at the stone. A perfect freestone and good canner.

Lippiatt's Late Red.—Another fine peach, ripe first week in April; colour creamy, mottled, striped and overspread with dark red; fine flavour; tree a fine grower and an immense bearer.

NEW PEARS, 1909.

2/- each.

Dempsey.—A cross between "Williams' Bon Chretien" and "Duchesse d'Angouleme"; fruit large, skin yellow, tinted with brown on the sunny side; flesh white, fine grained, tender, buttery, with a rich, sweet and delicious flavour; medium.

Directeur Varenne.—Large, or very large, form and colour of Easter Beurre, flesh extra fine, juicy, and of agreeable flavour; late.

Dona's Hovey (Winter Seckle).—Medium size, greenish yellow, with russet and brown dots, flesh yellow and rich, sugary, aromatic flavour; midseason.

Directeur Hardy.—This is one of the handsomest pears known; a great and early cropper, and of excellent quality; medium.

Duchesse d' Afrique.—An enormously large pear of good keeping quality. Tree so far appears to be dwarf, growing with very short thick wood.

Mount Vernon.—Large, nearly globular; colour rich cinnamon russet; flesh juicy, melting, with a spicy vinous flavour which is peculiar and distinct from that of any other known sort; tree is a vigorous grower, and comes into bearing early; late.

Madame Baltet.—A handsome golden yellow fruit of excellent quality; flesh fine, melting, very juicy, with a rich and delicious flavour; tree exceedingly hardy and productive.

Red October.—A very superior variety of "Beurre de Capiaumont;" bright brown, tinged with orange red; flesh delicate, smooth, and rich; an abundant bearer.

NEW PLUMS, 1909.

2/-

Late Transparent.—Fruit large, round, greenish yellow, changing to purple according to exposure to sun; flesh firm, juicy, and fully equal to the "Greengage"; stone very small. This is a very fine addition to the class of the "Transparent Gage," as it completes the season, ripening fully ten days after the "Transparent Gage." Tree of dwarf habit, and an abundant bearer.

Prune Tennent.—Large, dark purple, parts freely from the stone, exceedingly rich, dries well.

Superb.—Large, round, purple plum of excellent flavour, a heavy and constant bearer, cannot be excelled for either dessert or culinary use.

NEW JAPANESE PLUMS, 1909.

2/- each.

Alpha.—The earliest of all Japanese or English plums, ripening 12 days in advance of cherry plum or E. S. American. A chance seedling of New South Wales origin. Fruit at least twice the size of a cherry plum; deep, dark red, on amber colored ground; flesh yellowish, juicy, and very sweet, of good flavor; can be picked when first showing color, and will keep for 14 days without discoloring. Being so remarkably early, it is not liable to sun-scald, as in many of the Japs.; and being the first plum on the market, we predict a big future for this sterling novelty. 2/6 each.

Federation.—A cross between "Burbank" and "Wickson." The fruit, in size, shape, and colour, resembles the "Wickson," and in growth the tree is like an upright-growing "Burbank." It is quite as productive as "Burbank." Ripe second week in February.

Hay's Seedling.—Tree hardy and a good grower; fruit round, skin dark purple, flesh yellow, firm, rich, juicy, and of exquisite flavour; ripens a week after "Burbank."

Superbe.—A cross between P. Simonii and Ogon, in growth identical with "Wickson." Fruit of immense size, and most delicious flavor. Color yellow, covered with small green specks. In shape, round and flattened, partaking of its parent Simonii. An ideal shipping plum, being very firm, and does not scald. Ripens a little in advance of Burbank.

Wright's Late.—A new seedling Japanese plum, of my own raising, that surpasses in flavor anything yet offered in the way of a Japanese plum. The fruit is of large size, with deep red flesh, and the stone is no larger than that of a cherry. It is of honeyed

sweetness, and has a decided vinous flavor, being quite distinct from any other plum. There is a total absence of bitterness in the skin, or acidity at the stone, so prevalent among a lot of the Japanese plums. Tree is a wonderful cropper. The fruit is covered with a heavy bloom, like a grape, is a late keeper, and will hang on the tree until March. Raised in New Zealand.—Raiser's description.

Maynard.—Specially imported by New South Wales Department of Agriculture from reliable American nurseries, who speak of the variety as "Burbank's latest and greatest effort in the plum line, and we believe he has reached the point of perfection." Fruit supposed to be a cross between P. Triflore and P. Simonii; is oval, large to very large; color deep clear purplish crimson, thin blue bloom; flesh light yellow, marbled with red, firm, delicious, highly flavored; unusually strong grower, with large broad leaves like an apricot; ripens just after Climax; surpasses all others in keeping and carrying qualities, being firm even when dead ripe.

NEW QUINCES, 1909.

2/- each.

Bereckzi.—Recommended as a fruit of enormous size; flesh sweet, skin glossy golden yellow, smooth; very prolific even on young trees.

Giant of Lescovaz.—A new quince imported from France, the fruits often attaining up to 3½lb.; flesh white, does not turn red when cooked; tree very prolific.

NEW BERRY.

Phenomenal Berry.—A cross between "Improved California Dew-berry" and the "Cuthbert" raspberry. Mr. Burbank describes it as larger than the largest berry ever before known; bright crimson raspberry colour; productive as could be desired, and the most delicious of all berries for pies, canning, jelly, or jams. 2/- each.

NEW ROSES

FOR 1909.

Albatross.—Hybrid Tea. (Wm. Paull and Sons, 1908.) Flowers extra large, color ivory white, faintly tinted with blush pink; of handsome conical form, in the way of “Frau Karl Druschki” and “White Lady,” but fuller and a more durable blossom than either. 3/6.

Ards Rambler.—H.T. (Alex. Dickson and Sons, 1908.) One of the most fascinating climbing or pillar roses it has been our privilege to distribute; a grand companion to “Ards Rover,” as its massive foliage lends a wonderful charm to it. Color is a velvety orange crimson, shading to rosy carmine; highly perfumed. 2/6.

Alice Chamrion.—Dwarf Polyantha (Dubreuil, 1908). Buds rose color, changing to pale flesh; of distinct and elegant form, very sweet; habit of Perle D’Or. 2/6.

Alix Roussel.—Tea. (Gamon, 1908.) Coppery yellow, with salmon centre; long buds, open flowers, reflexed; large, full, and very sweet; growth vigorous. 2/6.

Altmarker.—Hybrid Tea. (Schmidt, 1908.) Dark yellow, with cochineal flowers; large and full, of good form, with long bud; highly recommended. 2/6.

Beatrice.—Hybrid Tea. (Wm. Paull and Sons, 1908.) A variety of great depth of petal, very suitable for exhibition purposes; it is a full and substantial flower, of a deep rich pink, shaded with vermilion when opening; when fully developed the outer petals are very pale flesh, and the centre bright pink. 3/6.

Chateau de Clos Vougeot.—H.T. (Pernet-Ducher, 1908.) Velvety scarlet, shaded with fiery red, changing to dark velvety crimson as the flowers expand; handsome foliage; a splendid acquisition to this class. 2/6.

Comtesse Icy Hardegg.—H.T. (Soupert et Notting, 1908.) Bright carmine flowers, very large and full, perfect form; bud very long and pointed; a superb rose, and a decided acquisition. 2/6.

Climbing Pink Maman Cochet.—A climbing form of this most popular rose, sure to be a favorite. 3/6 each. Plants of this will not be sent out before June 1st.

Climbing Liberty.—H.T. (Wm. Paull and Sons, 1908.) A strong climbing form of the well known Hybrid Tea. This should prove to be one of the very best dark red climbers, as it is of genuine trailing habit. 2/6.

Dr. O'Donel Browne.—H.T. (Alex. Dickson and Sons, 1908.) This is a gloriously beautiful rose, of perfectly symmetrical formation and vigorous and erect growth. It is a veritable giant among Hybrid Teas. The blooms are very full, yet always opening well. The petals are smooth, shell-shaped, and massive; color, carmine rose. 3/6.

Deuil de L. Compagnon.—(Guillot, 1908.) Dark crimson purple, the darkest H.T. obtained; blooms large, full, perfectly formed, and freely produced. First prize at Clermont; second prize at Lyons. 3/6.

Duchesse Maurice de Broglie.—(Dubreuil, 1908.) Centre clear yellow, suffused very bright rose; flowers very large, full, opening well; very pretty form. Awarded several first class certificates. 2/6.

Elaine.—Hybrid Tea. (Wm. Paull and Sons, 1908.) Award of Merit, Temple Flower Show, 1908. A magnificent high-centred large and full flower, of palest lemon white, the buds being slightly tipped with flesh pink and rose; the growth is good and the habit branching. 3/6.

Florence Edith Coulthwaite.—H.T. (Alex. Dickson and Sons, 1908.) Flowers are large, full, and of perfectly imbricated form; the petals smooth, circular, and of great substance. The color—which varies somewhat—is deep cream, striped with bright rose on the inside of the petals, and reflected on the back, thus creating an indescribable delicate orange and peach glow, which makes it absolutely unique in color. 3/6.

Rose—Albatross. . (See 1909 Novelties).

Rose—Hector Mackenzie. (See 1909 Novelties).

- Erinnerung an Loni Westermann.**—H.T. (Welter, 1908.) Greenish yellow, streaked with a light red, which lends a special charm to the flowers, which are very large, full, and of beautiful form, highly perfumed. Excellent for all purposes. 2/6.
- Friedrichruh.**—Tea. (Turke, 1908.) Blood red, blooms are large, full, and well formed, flowering freely and continuously; excellent habit of growth. Awarded gold medal at Dusseldorf. A splendid rose.
- Frau Phil Geduldig.**—H.T. (Geduldig, 1908.) Rose edged, salmon, and shaded yellow; flowers very large, full, and of good form; very beautiful. 2/6.
- George C. Waud.**—H.T. A remarkably distinct and beautiful variety, possessing a shade of color hitherto unknown amongst roses, which is a glowing orange vermilion that does not fade. The flowers are large, full, perfectly formed, with highly pointed centre. 3/6.
- Grace Molyneux.**—H.T. (Alex. Dickson and Sons, 1908.) A chaste rose of rare beauty and fascination; the habit of growth is perfection, every shoot producing a bloom. A veritable pearl for garden decoration, for button-holes, and frequently for exhibition purposes. The color is creamy apricot, flesh in the centre, the outer petals when developed are delicate creamy white inside, with faint pink sheen on reverse. 3/6.
- Gloire de Chedane Guinoisseau.**—Hyb. Perpetual. (Chedane and Pajotin, 1908.) Very bright vermilion, sometimes velvety; of a very fine effect; of handsome cup shape, and with fine buds. 2/6.
- Hector MacKenzie.**—H.T. (Guillot, 1908.) Dark pink, changing to silvery crimson; flowers very large and full, perfect globular form; very floriferous, and sweetly perfumed. 2/6.
- John Cuff.**—H.T. (Alex. Dickson and Sons, 1908.) A rose of absolute distinctness, unique in color, and a most desirable addition to this most popular class, possessing grandly erect and vigorous growth. It is one of the earliest to expand its very large and beautiful blooms, which are of great substance and perfect symmetry. The buds are very long and highly pointed. The flowers, which are produced in marvellous profusion, are of warm, deep carmine pink color, with a most attractive and distinct deep yellow zone at the base of the petals. For either exhibition or garden purposes; a valuable acquisition. 3/6.
- Jean Note.**—H.T. (Pernet-Ducher, 1908.) Chrome yellow, changing to creamy yellow; large, full, and globular. 2/6.
- Joseph Lowe.**—H.T. A sport from Belle Siebrecht, with more substance in the flowers; color salmon pink, in the way of Mdm. Abel Chatenay, but flowers and petals much larger. Very fine. 2/6.

Kronprinzessin Cecile.—H.T. (Schmidt, 1908.) Pale silvery pink. The buds of this splendid rose are long and develop into large and well shaped flowers. Excellent for exhibition and decorative purposes. A free and continuous bloomer. It received a special prize at the Rose Show of Gladbach. 2/6.

La Galissiere.—H.T. (Schwartz, 1908.) Bright silvery rose, reverse of petals rosy carmine; flowers very large, opening well, beautiful form. A glorified Mrs. W. J. Grant. Superb. 2/6.

Lady Chelmsford.—H.T. (Wood, 1908.) A Queensland production of great merit, raised by Mr. T. H. Wood, of Mount Gravatt and Brisbane. Color deep crimson, changing to purple; buds pointed; petals thick and velvety. Quite distinct.

Lady Ursula.—H.T. (Alex. Dickson and Sons, 1908.) The flowers, which are produced on every shoot, are very large, full, and of great substance and perfect form, with high centre, from which the petals gracefully reflex. The petals are unusually large, smooth, circular, and of great thickness. The color is a delightful shade of flesh pink, and thoroughly distinct. A superb rose for exhibition purposes, garden decoration, and pot culture. 3/6.

Lady Faire (H.T.)—(Hugh Low, 1908.) A sport from Belle Siebrecht, which it much resembles, but the flowers are much larger, and the color approaches to that of Mdm. Abel Chatenay. 2/6.

Lady Muriel Bathurst (Tea).—(J. Jeffries and Sons, 1908.) Golden yellow, changing paler, and suffused with delicate pink; flowers small, growth vigorous. A beautiful button-hole variety. 2/6.

Les. Gloriettes (China).—Coppery red., base of petals clear yellow, of medium size, full and of imbricated form; very free blooming. 2/6.

Lyon-Rose (H.T.)—(Pernet-Ducher, 1907.) Buds coral-red tinted with chrome-yellow, at the base, open flowers shrimp-pink at the edges of the petals, with centres of coral-red or salmon-pink, shaded with chrome; large and broad petals, full, globular, and fragrant; perpetual flowering. 2/6.

Molly Sharman-Crawford (Tea).—(Alex. Dickson and Sons, 1908.) The blooms, which are very large and full, are perfectly formed, with a highly pointed centre, from which the petals gracefully reflex. The color is delicate eau-de-nil white, which, as the flower fully expands, becomes dazzling white. Delicately but delightfully perfumed. 3/6.

Madame Rene Oberthur (H.T.)—(Vigneron, 1908.) Rich porcelain white, centre shaded with pale salmon; the flowers are in the way of "Caroline Testout"; very distinct; a magnificent variety for pot culture. 2/6.

Mrs. David Jardine (H.T.)—The color is a delightful shade of bright rosy pink, shading in the outer petals to salmon pink; quite distinct from any existing variety. In this rose we have a flower possessing all the chasteness and floriferousness of a Tea, combined with the erect and vigorous growth of a Hybrid Perpetual. It will eventually supersede the Catherine Mermet type. Without doubt, one of the finest forcing roses yet produced. 3/6.

Madame Second Weber (H.T.)—(Soupert et Notting, 1908.) Rosy salmon; very novel; the blooms are enormous, petals large and firm; form absolutely perfect; the finest of the section, possessing splendid habit of growth. This novelty possesses the highest merit, and will be as distinguished and sensational as "Madame Constant Soupert" is amongst Teas. 3/6.

Madame Edward Vicars (Tea)—(Schwartz, 1908.) Bright carmine shaded pale rose, reverse of petals white, tinted reddish carmine; bud long and flowers large, full, pretty form, opening well. 2/6.

Madam Leon Constantin—Tea. (Bonnaire, 1908.) Satiny rose, shaded salmon; beautiful, long bud, flower very large, always opening well. 2/6.

Madame Pauline Bertnay—Tea. (Schwartz, 1908.) Nasturtium red, shaded orange yellow, reverse of petals rosy yellow, very pretty colors; flower medium size and full; very floriferous, very beautiful. 2/6.

Marianne Rascol—Tea. (Schwartz, 1908.) Salmon yellow, tinted salmon rose, darker centre, passing to creamy yellow; very beautiful; flower large, very full, imbricated form; very floriferous. A great acquisition. 2/6.

Mrs. Sophia Neate—Tea. (Bide, 1907.) This fine new Tea Rose was raised by Bide and Sons, of Farnham, Surrey, England, who were also the raisers of "Queen of Spain." It is a seedling from Madam Lambard and Anna Olivier. The flower is long and pointed; color a bright salmon, outside of petals dark pink. A fine exhibition variety, and very floriferous. Awarded silver Banksian medal, Holland House, July, 1907, and many other prizes. 2/6.

Mdm. Alice Koepke-Demoy—H.T. (Soupert et Notting, 1908.) Rosy white, tinted clear yellow; blooms magnificent in form, very large and full, always opening well; bud long and elegant; very long and beautiful. 2/6.

Mrs. Longworth—H.T. (Prince, 1907.) This is a striped sport from that good old rose, "Caroline Testout." It has the same habit and growth, and is a most continuous bloomer. The flowers are white, lightly splashed and striped with deep pink—giving a beautiful, fresh appearance; very pleasing and unique. 2/6.

- Mdme. L. Bailly.**—H.T. (Guillot, 1908.) Cherry red to bright crimson, reverse of petals carmine red; flowers medium size, full, and of globular form. 2/6.
- Madame P. Euler.**—H.T. (Guillot, 1908.) Vermilion silvery pink, very large flower on long stem, very full, and possessing great lasting properties and perfect form; fragrant. Awarded gold medal and first prize at Clermont. 2/6.
- Monsieur Emilano Oliden.**—H.T. (Schwartz, 1908.) White, centre rosy flesh, outside of petals satiny white, tinted rose; flowers very large, very full, and of beautiful form, opening well; petals large and smooth. Awarded first prize and large silver medal. 2/6.
- Mrs. A. R. Waddell.**—(Pernet-Ducher, 1908.) Rosy scarlet buds, opening reddish salmon, reverse of petals rosy scarlet; large and semi-double, fine bedding variety. 2/6.
- Professor J. Vendel.**—H.T. (Geduldig, 1908.) Dark rose, shaded clear red; flowers large and full, very distinct and good. 2/6.
- Rhea Reid.**—H.T. (E. J. Hill, 1908.) As large as "American Beauty"; as double as "Bridesmaid"; as fragrant as "La France"; as continuous as "Bride"; as red as "Richmond" in winter. Produces a profusion of long canes, and has a grand appetite for rich food. Has perfect constitution, which resists both mildew and black spot. This rose has been well exhibited during the past winter in the United States of America, and has received numerous awards. It is said to be a great advance upon both "Liberty" and "Richmond." We have received splendid reports regarding this rose. 3/6.
- Rosemary.**—H.T. (E. G. Hill and Co., 1908.) Shining silvery pink; flowers very full and large, very floriferous. 2/6.
- Rouge Angevine.**—H.T. (Guinoisseau and Chedane, 1907.) Geranium red; flowers full, large, and perfect form; bud long and pointed; marvellously free flowering. Awarded large silver medal, Angers, 1907. 3/6.
- Star of Queensland.**—(Williams, 1908.) Raised by John Williams, of Queensland. This is a cross between Etoile de France and Earl of Dufferin. Color deep velvety maroon, reverse of petals cardinal to cerise; of free blooming qualities. 5/-.

THE SCARLET SOUTH AFRICAN DAISY.

"Gerbera Jamesoni."

This exquisite and graceful flowering plant is easily cultivated, and is herbaceous in its character. The flowers are an intense rich scarlet crimson, $3\frac{1}{2}$ to 5 inches in diameter, and are borne well above the foliage, on splendid footstalks, from 24 to 36 inches in length. The plant blooms constantly. It is admirably suited to the climate of New South Wales; flowers will last in water some three weeks. Extra strong two-year-old plants. Price 2/- each, postage free.

WRITE FOR SPECIAL QUOTATIONS FOR LARGE QUANTITIES.

To our Customers & Horticultural Friends.

WE wish to take this opportunity of sincerely thanking our friends for the support given us during the past and previous seasons. The Catalogue we now present is the Fifty-eighth issued by the Firm, and we wish to start the season with the assurance that nothing will be left undone to satisfy our new Clients equally with those with whom we have been in business relations for over Fifty years. The present Catalogue is compiled very largely from the personal experience of members of the Firm, who have exceptional advantages, both at Hurstville and Camden, of seeing that our Buds and Grafts are true to name.

As to Novelties we have in some cases to rely on the description of the raiser, as we have not yet had an opportunity of testing them. This applies more particularly to imported Roses, which are, however, all obtained from firms of the highest repute.

In spite of the most extreme care, however, mistakes in nomenclature do occur, and we wish to state that in no case do we give any guarantee as to correctness, beyond replacing any stock which may prove untrue. As previously pointed out we anticipated legislation by the erection of our own Fumigator at Hurstville. The trees are put through, under the supervision of a Government Inspector, and our Clients may rely that the whole of our large stock is entirely free from disease.

During the year we have again largely increased our area under Fruit Trees, and have now at Hurstville and Camden over 60 acres under cultivation.

The soil at Hurstville has proved itself peculiarly adapted to the production of Citrus, giving fine sturdy trees, with an abundance of fibrous roots, and which stand transplanting remarkably well. The same remarks apply to Roses, which are stout and sturdy. In fact the whole of the Stock is particularly well grown and we cordially invite intending Planters to call and inspect.

We shall maintain our present high standard of Packing, which is so well and favorably known.

All Goods delivered free on rail Hurstville or Darling Harbour, or on the wharves, and on a receipt being obtained as delivered by us in good order and condition our responsibility ceases.

In the event of delay in receiving a consignment after receipt of our letter advising despatch, please notify us and also the Railway. We are prepared to book orders for delivery at any time during the Season. Otherwise all orders are despatched in rotation. Clients' letters are acknowledged as soon as received, and in the event of no acknowledgment being received within a few days it may be assumed that your letter has miscarried.

We especially direct our Customers' attention to the advantage of sending trees at Single Package Rates by Goods Train, which is a large reduction on ordinary Goods Rates. One hundred trees would weight about 1 cwt.

Our Terms are Cash on Receipt of Invoice. A Discount of 2½ per cent. for remittance with Order, Special quotations excepted. From unknown correspondents Cash with Order will always be required.

We shall be pleased to forward this Catalogue Gratis on application, and should feel obliged if our Clients will forward the names of any of their friends to whom a copy may be useful.

BE VERY CAREFUL OF OUR ADDRESS.

Some of the Best Remedies for Practical Orchardists.

Owing to the provisions of the new "Insect Pest Act," more care will have to be used in future in keeping down the various pests which trouble the up-to-date orchardist. Many of these have already taken measures far beyond those required by the Act, and these were hindered to a large extent by the apathy of their neighbours, who will now be brought into line. As we are continually being asked to suggest remedies, and more especially during the busy season, when time is money, we take this opportunity of placing before our clients a few of the most successful Remedies. These are all taken from a very excellent series of leaflets issued by our Department of Agriculture, and numbered 1 to 8, and we would refer our customers to these, which may be obtained free on application to the Department, for further information.

For SCALE ON CITRUS AND OTHER EVER-GREEN TREES, use Nos. 1 and 2.

For SCALE ON DECIDUOUS TREES, use No. 2. For WOOLLY APHIS ON APPLES, use Nos. 3 and 4.

For FUNGUS DISEASES OF ALL KINDS, use Nos. 5 and 6.

For CODLIN MOTH, or INSECTS EATING FRUIT, LEAVES, or BARK, use Nos. 7 and 8.

For PEACH AND OTHER APHIS, use Nos. 4 and 9.

No. 1.—KEROSENE EMULSION.

Directions for Preparing.—Formula: Hard soap $\frac{1}{2}$ lb., kerosene 2 gallons, boiling water (soft) 1 gallon. For use, dilute or dissolve in 7 gallons of water—winter strength; dilute or dissolve in 22 gallons of water—summer strength. Dissolve $\frac{1}{2}$ lb. of hard soap in 1 gallon of boiling water, after which the vessel is removed from the neighbourhood of the fire, the kerosene is added, and the whole churned for ten minutes. One essential condition of success in making this emulsion is that the liquids should be as warm as possible. It is also necessary that the water be as soft as possible. Rain-water is best. For winter spraying of deciduous trees, use winter strength.

No. 2.—SPECIAL RESIN WASH FOR CITRUS TREES.

Formula; Caustic soda, 70 per cent., 6 lb.; resin 16 lb., fish oil 3 pints, water 100 gallons. Boil 10 gallons of water and add the above, boiling the whole together from two to three hours, or until well dissolved. To facilitate dissolving the resin, it should be finely powdered and added slowly, stirring all the time. Add hot water, a little at a time, until there is not less than 20 gallons of hot solution. Keep well stirred. Dilute in the proportion of 4 gallons of hot water to 1 gallon of the hot solution, or so as to bring the whole up to

100 gallons. Never add cold water when cooking. This is the best spray the Fruit Expert knows of for scale on citrus trees, and can be applied summer or winter.

No. 3.—LIME, SALT, AND SULPHUR WASH: WINTER WASH FOR DECIDUOUS TREES.

A good general cleanser. Directions for making.—Formula: Lime 30 lb. (fresh slacked), sulphur 20 lb., salt 15 lb., water 60 gallons. Take 10 lb. of lime and 20 lb. sulphur, and boil them until thoroughly dissolved, then add the rest of the lime and the salt and water to make 60 gallons. Strain and spray when rather more than milk warm.

No. 4.—RESIN AND SODA WASH FOR WOOLLY APHIS.

Dissolve 3 lb. of washing soda and 4 lb. of finely-powdered resin over a fire in about 5 pints of water; then add water to make 5 gallons; boil well till the resin is thoroughly dissolved, and the mixture is of a dark brown colour, and then take 1 gallon of the mixture to 7 gallons of water, and apply milk warm.

No. 5.—BORDEAUX MIXTURE FOR FUNGUS DISEASES.

Directions for Preparing.—Formula: Copper sulphate (bluestone) 6 lb., lime 4 lb., made up with 22 or 45 gallons water, according to the season, the smaller proportion being the winter dressing. Copper Solution: It is immaterial whether hot or cold water be used to dissolve the bluestone. If the mixture is to be made in a hurry, it is best to boil the copper sulphate in water. If there is plenty of time, use cold water; but in this case the bluestone must be suspended in a porous bag (bit of muslin or sacking) as near the surface of the water as possible. If the copper salt is thrown into the vessel, and water poured on the top of it, it will not dissolve in a week. When suspended as described, it should dissolve in about twenty-four hours. The sulphate of copper solution, when made, must be diluted largely before the lime solution is added to it. This is a very important point. If the copper solution is too strong, the precipitate formed is thick and heavy, and liable to clog the nozzle of the spray pump. If the copper solution is made by dissolving the bluestone in a small quantity of hot water, it should be diluted to 20 gallons before adding the lime.

No. 6.—LATE STAGES OF FUNGUS DISEASES.

Directions for making Ammonio-carbonate of Copper.—Formula: Copper carbonate 5 oz., ammonia (liquor ammoniac sp. gr. '880) 3 pints water 45 gallons. Make a paste in a wooden bucket of the carbonate of copper and a little water. Add the ammonia, which will dissolve

the paste, and then dilute to 45 gallons. The first application should be made long before the leaves are half-grown.

No. 7.—ARSENITE OF SODA WASH FOR CODLIN MOTH, Etc.

Arsenite of soda wash, which is now much used in preference to Paris green by the apple growers as being more effective, is composed of the following materials:—White arsenic 1lb., washing soda 2lb., water 1 gallon. The materials are boiled until dissolved, which takes only a few minutes. When making up for use, add 40 to 50 gallons of water to a pint, and 4 to 6 lb. of fresh slacked lime. The stock mixture can be put away if not used at once, and will keep for any length of time if corked up. Spraying for codlin moth: The first remedy is spraying with Arsenite of Soda, and this should be done as soon as the petals fall from the calyx of the young fruit, for this is then open, and the poison lodges in the cavity. In most apples, and some pears, the sepals of the calyx close up over the cavity in about ten days' time, so that after this date

it is too late to spray, and some of the latest authorities say that one spraying, if thoroughly done, before the closing of the calyx (if no rain comes in the interval, when it should be repeated), is quite sufficient to destroy the first brood.

No. 8.—ARSENATE OF LEAD WASH FOR CODLIN MOTH.

Take 3 to 5 lb. of arsenate of lead, and dissolve in 100 gallons of water, when it is at once ready for use. This is now considered the simplest and most efficacious remedy for Codlin Moth, in conjunction with summer and autumn bandaging of trees.

No. 9.—SUNLIGHT SOAP WASH FOR PEACH APHIS.

Take 1lb. of strong Sunlight Soap and boil in 10 or 12 gallons of water, and apply with either spray pump or a brush, and if aphides are not dead in an hour or two, increase the quantity of soap. Where only a limited number of trees are to be operated upon, this wash is found very efficacious and easily prepared.

Parcels per Post.—To meet the convenience of our inland clients who are some distance from the railway, we can choose sturdy, specially grown trees and plants of nearly all those catalogued, which, if carefully packed in moss, will travel in perfect safety. For Fruit Trees, Roses, Dahlias, Carnations, etc., etc., this mode of transit enables our inland clients to keep abreast of the times in newly introduced varieties. A fumigation certificate accompanies each inter-State parcel, thus preventing any delay or inconvenience.

Approximate weight of 12 plants from pots, 10 lbs.

Approximate weight of 12 plants from open ground, 3 to 5lb. } medium-sized plants.

The rate is: For any Post Office in New South Wales, for the first 1 lb., 6d.; and 3d. per lb. for each lb. up to 11 lbs. For any other State, including New Zealand: For the first 1 lb., 8d.; and 6d. per lb. for each lb. up to 11 lbs.

All Nursery Stock can now be sent by single package, goods rate, which is far cheaper than stamped parcels rates.

FRUIT TREES.

GENERAL LIST.

APPLES.

Worked on Blight-proof Stocks.

WE would again draw attention to the fact that working Apples on Blight-Proof Stock does not insure the freedom of the upper part of the tree from the Woolly Aphis. All that is claimed is that the whole of the tree below the graft will never blight. On this account it is necessary to see that they are grafted on STOCK, say, at least six inches above the ground, and not merely on PIECES of Blightproof ROOT. Apples so worked are, of course, cheaper than those on Stocks, but as the scion almost invariably roots below ground, and is almost certain to blight, the object of Blight-proof stock is defeated.

PRICE 1s EACH, 10s 6d DOZEN. SPECIAL QUOTATIONS FOR 100 OR 1000.

EARLY VARIETIES.

ALLSOPP'S EARLY.—An extremely early variety, ripening long before Lord Nelson. A showy fruit, mainly cooking, but when ripe, fair dessert quality.

ASTRACHAN RED.—Fruit fairly large, roundish, covered with deep crimson; flesh quite white, juicy, with a rich acid flavour; an exquisitely beautiful Apple.

BEAUTY OF BATH.—Fruit medium size; skin yellowish green, beautifully striped and spotted with crimson in the sun; flesh slightly yellowish, with a brisk, rich, spicy flavour.

CARPENTER (See Gravenstein).

CAROLINA RED JUNE.—Fruit medium, oval, or conical; skin nearly covered with deep red, almost purple in the sun; flesh very white, tender, very juicy, with a rich sub-acid flavour.

CARRINGTON.—Fruit medium, roundish; skin pale yellow; clear light red in the sun; flesh white, very tender; has the reputation of being thoroughly blight-proof.

CLIMAX.—Raised in New Zealand, perfectly blight-proof; skin yellow, streaked with red; flesh yellow, crisp and juicy, and very sweet; ripens fairly early, and should be a very useful home and market variety.

COLDSTREAM GUARD.—A first-class early summer dessert apple, size medium to large, smooth, round, of bright colour, and very taking appearance; cannot be too highly recommended for market. Tree healthy, hardy, and a heavy cropper.

DEVONSHIRE QUARRENDON.—Fruit medium size, roundish, a little flattened; skin pale crimson in the shade, rich crimson in the sun; flesh whitish, crisp, and juicy, with a pleasant sub-acid flavour.

DUCHESS OF OLDENBURGH.—Fruit medium, streaked with red on a golden or yellow ground; flesh whitish, with a brisk, sprightly flavour; almost blight-proof.

EARLY RIPE.—A variety said to ripen very early; medium size; pale yellow; flesh white, tender and juicy, with a sub-acid flavour; good quality, and heavy cropper.

EARLY HARVEST.—Medium; roundish; bright straw color when ripe; ripens at wheat harvest, and for three weeks afterwards; needs good cultivation.

GRAVENSTEIN.—Fruit large, roundish, but a little irregular; skin rich yellow, streaked with bright red; flesh whitish yellow, crisp, with an abundance of rich vinous juice; perhaps the best Early Apple; blight-proof.

GANNON GROVE.—For planting in the warm districts, it will be found invaluable. In appearance, somewhat resembles a well-grown Carpenter; being deep orange, almost covered with stripes and blotches of rich vermilion, the whole having a very glossy appearance, as though covered with a coat of varnish; a perfect dessert, and equally good for culinary purposes; tree an early cropper.

HOARY MORNING.—An early variety, and specially recommended by the Manager Bathurst Orchards as doing well with him.

IRISH PEACH.—Fruit medium size, oblong

in shape; skin clear yellow, handsomely striped with bright red; flesh yellowish, white, tender, very juicy; quite blight-proof.

KESWICK CODLIN.—Fruit large; skin greenish yellow, with a faint blush; a grand Cooking Apple, lasting all through summer; tree, sturdy and productive.

KOROBOWKA.—Sturdy grower; very prolific; on the Continent considered the earliest of all known apples, and not subject to blight.

LORD NELSON.—Fruit of enormous size; skin clear lemon yellow, shaded and splashed with a clear bright red; a cooking apple, stewing down to a smooth jelly.

LORD SUFFIELD.—Fruit very large, rather conical, with several blunt angles at its sides; colour pale greenish yellow. One of the very finest early Cooking Apples.

MAIDEN'S BLUSH.—Fruit medium size, of a delicate waxen colour in the shade, and a brilliant crimson in the sun; flesh white, tender, with a pleasant sub-acid flavour.

MARJORIE HAY.—Avery early dessert apple, raised from Irish Peach. Fruit large, conical, striped and mottled with lovely red; flesh white, tender, juicy, and very crisp. Highly recommended by the raiser as the best early blight-proof apple.

RIVERS' EARLY PEACH.—A variety of well known Irish Peach Apple sent us by celebrated T. F. Rivers, of Sawbridgeworth, England, as being a variety specially recommended for early trade, being two weeks before Irish Peach.

SANTA CLARA KING.—Large, roundish; deep yellow, covered with red on sunny side, ripens fairly early, and in America is classed as one of the most profitable for local market.

SCARLET PEARMAIN (true).—Fruit medium size, rather conical; skin deep yellow in the shade, rich crimson in the sun; flesh white, with tinge of pink. A showy Dessert Apple.

SHARPE'S EARLY.—Medium size, roundish; skin deep golden yellow, beautifully striped and mottled with brilliant red and carmine; blight-proof.

SUMMER KING.—A valuable early variety; fruit large, beautifully striped crimson, red and orange; flesh tender, crisp, and very juicy, and of best flavour; a prolific and regular cropper. A valuable early summer apple.

THORLE PIPPIN.—Medium size, handsome, and regularly formed; its freedom from blight, early season of ripening, bright colour, clean growth, and hardness of the tree recommended it as an invaluable variety for all purposes; ripens immediately after "Irish Peach." 1s 6d.

TRIVETT'S SEEDLING.—Fruit medium size, skin yellow, streaked and splashed with broken crimson stripes. A showy apple, and a good market variety; blight-proof.

YORKSHIRE BEAUTY.—A large green cooking Apple of the very best quality for that purpose; fit for use some weeks before it is fully ripe; blight-proof.

MID-SEASON VARIETIES.

ALEXANDER.—Very large, regularly formed; skin greenish yellow, faintly streaked with red in the sun; a grand Cooking Apple; tree very vigorous and a regular cropper.

AMERICAN GOLDEN RUSSET.—Fruit medium size, roundish; skin dull yellow, sprinkled with a very thin russet; flesh yellowish, very tender, with a rich, spicy flavour.

ALLINGTON PIPPIN.—Probably the best dessert Apple in cultivation. A variety of Cox's Orange Pippin, medium sized, oval and conical; skin clear yellow, flaked with crimson; flesh white, firm and crisp. An early cropper, and appears to be free from blight.

BEAUTY OF KENT.—Fruit very large, roundish; skin greenish yellow, covered with broad, purplish stripes; one of the best Cooking Apples.

BETTY GEESON.—Fruit large, flattened; skin greenish yellow, with a brown, red cheek in the sun; a fine culinary variety; tree an enormous bearer.

BISMARCK.—A very large and very showy cooking apple of good quality for that purpose; fruit large, roundish, but flattened; skin yellow, completely covered with broken, crimson stripes and blotches; quite blight-proof, and a heavy and early bearer.

BLONDIN.—A fair sized, very showy Apple, ripening fairly late. Has a favourable reputation at the Bathurst Orchard.

CALDWELL'S KEEPER.—Fruit large; skin deep yellow, covered with deep red in the sun; flesh yellowish, very rich and aromatic; a very showy dessert apple.

COX'S ORANGE PIPPIN.—Fruit medium size, round, very regular; skin greenish yellow, with a dark red cheek; flesh yellow, crisp, with a rich, aromatic flavour.

CHARLES ROSS.—A seedling of Cox's Orange Pippin crossed with Peasgood's Nonsuch; fruit of the shape of Cox's Orange Pippin, but twice as large; flesh fine, delicious, highly coloured. 1s 6d.

ESOPUS SPITZENBERG.—A very handsome dessert apple; large, round, rather long; skin clear lemon yellow, with a beautiful carmine cheek; rich and aromatic.

FISHKILL.—A mid-season variety of first quality as table or cooking; pale yellow, with a beautiful red blush; very tender and juicy. 1s 6d.

JOHN SHARP.—An improved Pomme de Neige, perfectly blight-proof, and very productive; fruit is equally as handsome as its parent, and, we believe, will supersede that variety for orchard work.

KING OF PIPPINS.—Fruit of medium size,

roundish; skin pale yellow, with a fine red cheek. Flesh yellowish, firm, rich. Recommended as a good Export Apple.

LIGNE TILLISCH.—Fruit enormous size, and very showy; good quality; considered to be perhaps the heaviest cropping apple extant.

MOBBS' ROYAL.—Fruit very large, a little flattened; skin grass green, covered with brown red in the sun; flesh white, juicy, sub-acid. A grand cooking fruit.

MALA CARLE.—Fruit medium size; pale lemon yellow in the shade, and a brilliant crimson cheek in the sun; flesh white, with a delicate rose-perfumed flavour.

MARCHALES RED.—Fruit very large, oblong, quality very good, slightly acid in flavour, extremely heavy cropper, very popular in California. 1s 6d.

MILDEN.—Large, showy dark red variety of good quality, ripening in autumn; useful for either kitchen or dessert, and highly recommended. 1s 6d.

McINTOSH'S RED.—This famous apple, which has been realising such fancy prices in Sydney market for past year or two, we are now able to offer to the public. It is a greatly improved Fanny or Pomme de Neige, having the same snow-white flesh of Fanny, but is far more highly coloured and richly flavoured. In colour it is a deep glowing crimson, and at once catches the eye of the purchaser. Our stock is the genuine variety, being worked from trees fruiting under our notice at Camden. 2s each.

NELSON CODLIN.—A variety doing well at the Bathurst Orchard. With us it appears rather of dwarf habit.

PEASEGOOD NONSUCH.—In most respects similar to Gravenstein, quite as handsome, and of equal flavour, but twice as large, and a little later.

PRINCE OF PIPPINS.—Fruit medium size, a little tapering; skin deep yellow in the shade, rich red in the sun; flesh yellow, crisp. Very rich and good.

POMME DE NEIGE.—Fruit medium size, roundish, a little flattened; skin yellow tinged with red in the shade; deep red in the sun; flesh very white, juicy, and good; known as Fameuse Snowy, and incorrectly as Fanny.

REINETTE LITHUANIENNE.—Fruit medium sized, flesh white, juicy, and of excellent quality, bears early, and is extremely productive, quite small trees being weighed down with the weight of apples, thickly studded along the branches. Valuable for market and small gardens.

RIBSTONE PIPPIN.—Fruit medium size; skin dull yellow, patched, and streaked with dark and pale red; flesh crisp, with a most agreeable high flavour.

RUBY GEM.—A medium sized fruit, of very handsome appearance; skin brilliant red

all over; flesh white, crisp, and juicy; tree a strong grower, bearing when very young. Blight-proof.

SANDRINGHAM.—A new English dessert apple, having a splendid reputation of high spicy flavour, and heavy and constant bearing qualities.

TWENTY-OUNCE.—Fruit very large, roundish; skin greenish yellow, boldly splashed and marked with stripes of purplish red; very handsome cooking apple; blight-proof.

WORCESTER PEARMAIN.—Fruit medium size, skin almost covered with dark red stripes and marblings of crimson. A very handsome dessert apple.

WINTER VARIETIES.

ADAM'S PEARMAIN.—Fruit medium sized, rather oblong; skin yellow, splashed with red; a grand dessert fruit, sent to Sydney from Tasmania as Dutch Mignonne.

ALFRISTON.—Fruit large, roundish, a little ribbed; skin pale greenish yellow, flesh white, firm, sub-acid; a noted old English Cooking Apple.

AMERICAN BEAUTY.—A very large, showy Cooking Apple; skin yellow, almost covered with very deep red.

ANNIE ELIZABETH.—Fruit large, roundish, ribbed; skin pale yellow, with faint streaks in the shade, but bright red in the sun; tree a remarkably vigorous grower.

APPLE OF COMMERCE.—Fruit beautifully coloured, largest size, and nearly round; sound, hard, will cling to a tree during heaviest gale; said to be practically moth-proof.

BARRY.—Fruit large, somewhat conical, flesh firm, crisp, juicy and of best quality; skin yellow, with carmine; tree hardy and productive; very late keeper.

BALDWIN.—Fruit large, roundish, ribbed; skin yellow, covered with stripes of crimson; flesh yellowish, crisp; strongly recommended for the cool districts.

BAXTER'S PEARMAIN.—Fruit large, elongated, skin pale green, with streaks of red; flesh yellowish, sub-acid; valuable for both cooking and dessert.

BLENHEIM ORANGE PIPPIN.—Fruit large, roundish, oblate; skin deep orange, dull and dark red stripes; flesh yellow, breaking very sweet and juicy.

BEN DAVIS.—Fruit medium to large size; skin yellow, almost covered with splashes of two shades of red; flesh white, tender, fairly juicy and aromatic.

BOSTON RUSSET.—Fruit medium to large size; roundish; skin dull green, almost covered with brownish yellow russet; in cool districts keeps till spring.

BUNCOMBE (RED WINTER PEARMAIN).—Fruit medium size, oblong, conical; skin yellowish white, mostly shaded with maroon. A very regular bearer.

- BLACK BEN DAVIS.**—Seedling of that well known apple, Ben Davis, but a decided improvement, in that it is of a more solid red colour, better quality and keeper, and a much more certain cropper. So far it shows no blight.
- CALVILLE BLANCHE.**—A very showy pale yellow variety, slightly tinged red; size, above medium; very crisp and tender, of pleasant, sub-acid flavour, and one sure to sell freely; will keep until August in cool climate. 1s 6d.
- CANNON'S PEARMAIN.**—Fruit medium size; roundish conic; skin yellow, striped and marbled with red; flesh yellow, firm, with a very rich sub-acid flavour.
- CANADA REINETTE.**—Fruit largest size; skin a little brown in the sun, with many dots and russet patches; flesh nearly white; Triomphe de Luxemburg is identical.
- CHAMPION.**—In America is considered one of their best shipping varieties, being very late and firm; skin deep golden yellow, covered with scarlet stripes. An early cropper, and not liable to blight.
- CHICAGO.**—Fruit small, oblong, rich, warm, yellow ground, with a vermillion cheek, crisp, sprightly, sub-acid. Experts pronounce Chicago the best long-keeping winter apple known. Quality equal to Jonathan; late. 1s 6d.
- CLAYGATE PEARMAIN.**—Fruit medium size, roundish, conical; skin greenish yellow, nearly covered with brownish red; flesh yellow, tender, very rich and aromatic.
- CLEOPATRA.**—Fruit medium to large size, oblong to conical; skin a fine clear lemon yellow; flesh white, very juicy and rich; a grand dessert apple.
- COFFELT BEAUTY.**—Originated in Arkansas; roundish oblate in shape, medium to large; deep yellow, splashed with red; flesh tender, greenish yellow; mild, sub-acid flavour; first quality, very late. 1s 6d.
- CORONATION.**—A new apple, above medium size, skin pale yellow, striped and spotted with red, flesh firm, of a very nice flavour; late. 1s 6d.
- CREASES (FRAMPTON'S).**—Fruit large size, roundish; skin almost covered with bright red; flesh very juicy and rich; a fine cooking or dessert apple, and quite blight-proof.
- DELICIOUS.**—A variety of recent American origin. In colour like Jonathan, of most exquisite Ribston flavour. One of the best late-keeping apples. Should be a grand thing for our cool districts.
- DUMLOW'S SEEDLING (WELLINGTON).**—Fruit large, roundish, flattened; skin pale yellow, a light red cheek, and a little russet; a late cooking fruit of grand quality.
- FIVE CROWN PIPPIN (LONDON PIPPIN).**—Fruit large, roundish; skin pale yellow, with, in some districts, a dark red cheek. A grand all-round apple, drying well.
- FRENCH CRAB.**—Fruit medium size, globular; skin dark green; the very best keeping apple, keeping easily for a year. Largely grown for export in Tasmania.
- GOLDEN RUSSET.**—Fruit medium size; skin rough, dull yellow, covered with russet; flesh whitish yellow, very sprightly; recommended for export.
- GRANGE'S PEARMAIN.**—Fruit large, roundish, conical; skin yellow, with broken stripes of red; flesh yellowish white, tender, juicy, brisk, pleasant, acid. A fine culinary variety.
- GRIME'S GOLDEN PIPPIN.**—Fruit medium size, roundish, oblate; skin rich golden yellow, with a few grey dots; flesh yellow, crisp, rich, and sprightly, with a spicy aroma.
- GLORIA MUNDII.**—Fruit very large, roundish, oblate; ribbed skin, greenish yellow; flesh rather coarse-grained, juicy, with a pleasant acid flavour. Good culinary.
- GOOSEBERRY.**—Fruit large, roundish, with blunt ribs; skin deep green, becoming yellow when stored; with a brownish red cheek. One of the latest cooking apples.
- GRANNY SMITH.**—A very heavy bearer, and when grown in such districts as Orange will keep for the whole year. Strongly recommended for export.
- GLOWING COAL.**—A most imposing apple, and its name exactly describes its color. Is inclined to overcrop, and should be thinned. Will always bring good prices from its brilliant appearance.
- GREEN SWEET.**—Large green cooking variety, of first quality, ripening very late in season; flesh snow white, tender and juicy, with a lovely flavour when cooked. Imported by our Agricultural Department.
- HAWTHORNDEN.**—Fruit large size, roundish, flattened; skin smooth, fine green in the shade, rich red in the sun; flesh whitish, firm, juicy, sub-acid.
- HOOVER.**—Fruit medium size, roundish, slightly oblique; skin yellowish, covered splashed and striped with two shades of red; flesh yellowish, rather firm, tender, juicy, rich.
- HUNTSMAN.**—Large, unequal ovate; yellow, large distinct dots; flesh yellow, fine grained, sub-acid; very good.
- JENETON (RALLS).**—Medium, roundish, approaching oblong; pale red, striped light yellow; flesh nearly white; fine, mild; blossoms open 10 days later than usual, missing frosts; keeps through spring.
- JONATHAN.**—Fruit medium size, roundish, conical; skin light yellow, almost covered with light and dark red or purple in the sun; flesh whitish, a little pinkish; very tender and juicy, with a sprightly, vinous flavour. Highly recommended for shipping.
- KENTUCKY REDSTREAK.**—Fruit medium size, roundish; skin greenish yellow, shaded

with dull purplish red, flesh whitish, tender, juicy, mild, sub-acid.

KENTISH FILLBASKET (IMPORTED).—Fruit very large, frequently $4\frac{1}{2}$ inches in diameter, round, slightly ribbed; skin pale yellow, brownish red in the sun; slightly streaked.

LANE'S PRINCE ALBERT.—Fruit large, conical; skin clear grass green, with broken streaks of crimson; a very showy and profitable culinary variety.

LAME ABBEY PEARMAIN.—Fruit medium, roundish; skin deep yellow, shaded, splashed and striped with red; flesh whitish. A dessert apple of rich, spicy flavour.

LATE WINE.—Fruit medium size; skin shaded with light and dark crimson. A grand dessert fruit, identical with Crow's Egg.

LADY'S SWEET.—Large; yellowish green, with crimson stripes; tender, juicy and crisp; flesh greenish white, very sweet; good late dessert variety.

LEMON PIPPIN.—Fruit medium size, oval; skin entirely lemon yellow; flesh firm, brisk, sub-acid. A fine early winter dessert.

LORD WOLSELEY.—Fruit medium size, roundish, conical; skin clear, rich yellow; flesh very firm, juicy, sub-acid, brisk. Tree a constant bearer, and quite blight-proof.

LOY.—Is one of the largest and showiest apples in cultivation, rivalling that well known variety "Gloria Mundi"; ripens in April, and keeps for a long time. The tree is a strong, thrifty grower, and keeps remarkably free from woolly aphids. The large fruit hangs well, and they are difficult to shake off. The flesh is pale yellow, exceedingly rich, firm, and juicy, and of the most agreeable flavour. A valuable late keeping dessert and culinary variety, of the highest excellence, largest size, and most handsome appearance.

MAGG'S SEEDLING.—Fruit above medium size, roundish, a little flattened; skin yellow, striped and splashed with rich red; long keeper, and quite blight-proof.

MANNINGTON PEARMAIN.—Fruit below medium size, conical or truncated; skin yellow, splashed with red; flesh yellowish, tender, sub-acid. A first quality dessert fruit.

MUNROE'S FAVOURITE.—Fruit largest size, roundish, but tapering; skin clear yellow, with a reddish brown cheek. A late-keeping cooking apple of first quality.

MUIKLER.—Medium; conic, red, acid; good; long keeper. Was imported from America by our Agricultural Department, where it is considered one of their best.

MISSOURI Pp.—Received from America as one of their very best shipping apples, and was in the Sydney markets this spring from Canada in grand condition, realising at that time 4d each retail.

MRS. H. E. SHARP.—Roundish oblate; skin smooth, clear pale waxen yellow, streaked and dotted with lively crimson and darker stripes; eye closed, set in an irregular basin, stalk long, inserted in a deep cavity; flesh snow-white, crisp, exceedingly juicy and pleasantly flavoured; fruits of large size and beautifully formed. A valuable addition to dessert apples. In season from April to November.

NICKAJACK.—Fruit large, roundish, oblate; skin yellowish, striped, shaded, and splashed with two shades of red; flesh yellowish, firm. Tree an enormous and regular bearer.

NORTHERN SPY.—Fruit large, oblate, conical; skin pale yellow, with light and dark purple stripes; flesh yellowish. Tree a very strong grower, and blight-proof.

NEW YORK PIPPIN.—(See Cleopatra).

NEWTOWN PIPPIN.—Fruit medium size, roundish, ribbed; skin olive green, with a faint dull brownish blush; flesh juicy and crisp, with an exceedingly rich flavour.

NEWTON WONDER.—A large, well coloured apple of splendid cooking quality. Tree vigorous and very productive. One of the best late apples.

PERFECTION.—Fruit medium size, roundish; skin yellow, but deep, rich red in the sun; flesh whitish, crisp, very rich. Does remarkably well in the colder districts.

PRINCE ALFRED.—Fruit large, elongated, conical; skin yellow, striped with clear red; flesh yellowish, firm, juicy, and rich. A grand export apple, as it keeps for months.

PURITY.—A very large American cooking apple, very firm in texture, a heavy bearer, and quite blight-proof.

PARAGON.—Fruit large, roundish, somewhat flattened, dark red; flesh firm, yellow, crisp, aromatic, sub-acid, and juicy; it is a very late keeper, and of excellent quality.

PRIDE OF TEXAS.—Medium size; deep yellow; quality first-class, of distinct flavour; very late. Imported by our Agricultural Department.

PALOUSE.—Medium large; yellow, striped red; rather crisp, yellow flesh; fairly late; specially recommended. Imported by our Agricultural Department.

PARLIN'S BEAUTY.—Fruit large, roundish, conical, skin smooth, greenish yellow, covered with a delicate bloom; flesh yellow, firm, crisp, very juicy and sweet, and pleasantly flavoured. Tree is a vigorous grower, and an abundant and regular cropper. A valuable late keeping dessert apple, and profitable to grow.

ROKEWOOD.—Fruit medium size, slightly conic, skin rich crimson, a little russet; flesh whitish, very firm, crisp. A most prolific bearer, and, from its keeping qualities in cool districts, a most profitable variety.

ROYAL LATE COOKING.—A most remarkable:

- late keeping culinary apple, of English origin. Fruits of largest size, flesh pale yellow, exceedingly rich and juicy; tree extremely hardy and productive, also a most vigorous grower. We recommend this with the greatest confidence.
- RED MAJESTIC.**—Described as an Improved Munroe's Favorite, fully half the fruit being covered with glowing red and pink. Should become very popular.
- REINE LOUISE DE DANEMARK.**—A valuable late keeping, medium sized, dessert apple, of highest excellence. Flesh white, firm, crisp and juicy; skin slight yellow, flushed dark red on sunny side.
- ROME BEAUTY.**—Fruit large; skin greenish yellow, mottled and shaded with light red and streaks of darker red. Owing to its late blooming, it escapes late frosts.
- RYMER.**—Fruit large, roundish, flattened; skin greenish yellow; a few streaks of pale red in the shade, deep red in the sun. A good quality culinary apple.
- ROYAL RUSSET.**—Fruit medium size, roundish; oblate; skin yellowish green, mostly covered with brownish russet; flesh greenish white, firm; a rich acid.
- REINETTE BAUMANN.**—Fruit medium roundish, oblate; skin yellowish grey; covered with brown dots; flesh yellowish white, sugary, perfumed; quite blight-proof.
- SALOME.**—A splendid late-keeping apple of American origin; fruit medium size, skin pale yellow, striped, shaded, and splashed with light and dark red.
- SCARLET NONPAREIL.**—Fruit medium size, roundish, oblate; sage green, striped and shaded with deep red; flesh yellowish white, very firm, juicy, very rich and spicy.
- SURESOME.**—A chance seedling raised by Mr. H. E. Sharp, of New Zealand; fruit large, roundish, oblate; sometimes conical, even and regular outline, skin yellow, almost entirely covered with bright crimson, and darker stripes; flesh white, solid, very crisp, juicy and sweet; in use from middle of April to September. Tree a vigorous grower, and absolutely blight-proof. An invaluable market apple on account of its high colour and splendid appearance.
- SHARPE'S LATE RED.**—Fruit large; skin is bright red, striped, on a yellow ground; flesh yellow, red beneath the skin. In season June to September.
- SHOCKLEY.**—Fruit below medium size, roundish, conical; skin pale yellow, overspread with red, with a few dots; flesh crisp, juicy. A grand dessert fruit. A good keeper.
- STANSILL.**—Fruit medium, roundish; skin yellowish green, sometimes a blush in the sun; flesh yellowish, firm, rich. Comes into bearing very early, and is a splendid keeper.
- STURMER PIPPIN.**—Fruit medium size, roundish, oblate; skin a fine yellow, almost covered with brownish-red; flesh firm, crisp, and very rich. Grown largely in Tasmania for export, reaching Sydney as late as October.
- STEWART'S SEEDLING (BALLARAT SEEDLING).**—Fruit of largest size, roundish, flattened; skin pale yellow, with a brown, red cheek; flesh white, very firm and solid.
- SWAAR.**—Fruit large, regular, roundish; skin a fine dead gold colour, with numerous distinct brown specks; flesh yellowish, fine-grained, tender. Prefers a warm climate.
- SHANNON.**—Exceptionally large; pale yellow; flesh yellow, crisp and juicy; flavor mild; sub-acid; quality good; ripening late autumn.
- SUTTON.**—Fruit fairly large; pale yellow, almost overspread with crimson stripes; flesh white, crisp, and juicy; first-class dessert or kitchen variety; fairly late.
- SENATOR.**—This apple was exhibited at the Chicago World's Fair for the first time, and by its striking appearance created a sensation. Fruit not too large, and more brilliant than Pomme de Neige. Tree a vigorous grower and regular cropper.
- STONE PIPPIN.**—(See Winter Pearmain).
- STAYMAN WINESAP.**—Sent us from America as the very best and most handsome, long keeping and shipping apple. Said to be a great improvement of old Winesap; a variety largely exported from America to Australia. This variety we would specially bring under the notice of growers of apples for shipping.
- WEALTHY.**—Fruit medium size; oblate; skin whitish yellow, broken stripes in the shade, deep rich crimson in the sun; flesh white, a little stained with red.
- WILLIAM ANDERSON.**—Fruit of large size, roundish, slightly conical; skin greenish yellow, brilliant red in the sun; flesh firm, very rich and spicy. A heavy and constant cropper.
- WINTER MAGETIN.**—Fruit medium size, roundish, skin dark green, covered with brown red in the sun; flesh whitish, with a brisk, sub-acid flavour. Quite blight-proof.
- WELCOME (BLACK COAL).**—In size medium to large, roundish, conical; dark, black red; flesh very crisp and juicy; white, stained with red; sub-acid flavour. Recommended as one of the best; fairly late; suitable for either cooking or dessert.
- WINTER PEARMAIN.**—Fruit medium size, roundish, inclined to be conical; skin pale yellow, with a red cheek; flesh whitish, firm, crisp, very juicy. A splendid cooking apple.
- WINESAP.**—Fruit medium size, roundish oblong; skin smooth, a fine dark red in the sun, a little yellow in the shade; flesh yellow, firm, crisp, with a rich high flavour.

WINTERSTEIN.—As its name implies, a late variety of Gravenstein or Carpenter. Raised by Luther Burbank, of Wickson Plum Fame, who describes it as a clean grower and heavy cropper. Fruit like Gravenstein, are very highly coloured, and a perfect desert variety.

WHITE DOCTOR.—Large; roundish; greenish yellow; acid; autumn; good cropper.

WALKER BEAUTY.—Very large; yellow and red; flesh firm and sub-acid flavour; a splendid variety; very late.

YATES.—Fruit small, conic; skin whitish yellow, splashed with shades of red; flesh white, stained next the skin. An enormous bearer, and comparatively blight-proof.

YELLOW FOREST.—Medium to large; skin yellow; flesh tender and juicy; sub-acid; an excellent dessert variety, and valuable for cider making; ripens fairly late.

YORK IMPERIAL.—Medium oblong; angular; yellow, shaded red; flesh yellow, firm, juicy; an excellent shipping variety; always commanding good prices.

Dwarf Apple Trees.

THESE trees are most suitable for filling spaces along walks, or in places where there is not sufficient room for standard trees. They produce the finest samples of fruit, are remarkably heavy bearers, are easily gathered, and less liable to be blown off. The following varieties have been selected as best adapted to this mode of culture:—

PRICE, 2s EACH; 21s PER DOZ.

CARRINGTON

EMP. ALEXANDER

FIVE CROWN PIPPIN

GRAVENSTEIN

GRANNY SMITH

IRISH PEACH

JONATHAN

LORD NELSON

TWENTY-OUNCE

Cider Apples.

WE OFFER VARIETIES, specially imported by our Department of Agriculture, as the very best apples for producing Cider. These are the most profitable varieties where the making of Cider is an enormous industry. All worked on blight-proof stocks:—

PRICE, 2s EACH.

List of Varieties on application.

CUSTARD APPLE (Cherimoyer).

THIS delicious fruit is well worth a trial in the warm inland districts, as, when established, it is much more hardy than is generally supposed.

PRICE, 1s. 3d. EACH; 12s. PER DOZEN.

ROUGH FRUITED.—Only differs from other variety in having a rough skin.

APRICOTS.

WE now work our Apricots on three stocks. First on Apricot Seedlings, which we consider, in nearly all situations, the most suitable. We also use largely the Seedling Peach Stock, which stock is largely in demand in Queensland and coastal districts of this State. We also raise a quantity on the Plum Stock, to supply the demand of New Zealand and our own moister districts.

PRICE, 1s EACH; 10s 6d DOZ. SPECIAL QUOTATIONS PER 100 OR 1000.

ALSACE.—Fruit large, roundish; skin deep rich yellow, shaded with brownish red; flesh deep yellow, very rich. Of Moorpark type. Ripe first week in January.

ANGOUMOIS HATIVE.—A fine apricot, ripening first week in January. Fruit medium size; deep yellow, dark brown in the sun. Flesh deep yellow, rich and juicy.

BLENHEIM (SHIPLEY'S).—One of our very best late apricots, ripening here the week after New Year. Fruit largest, a little pointed; skin clear yellow, bright red cheek; flesh deep orange.

BOBBY ALLEN.—A second early apricot, succeeding Masculine by ten days. Fruit large, conical, of good colour, bearing moderate crops every year. Known as Allen's Early.

BUSCHE PECHE.—Fruit medium size; skin pale yellow, but bright red in the sun; flesh deep yellow, rich, and sugary. Ripe last week in December.

BELLE DE TOULOUSE.—Fruit very large, rather pale, but rich and juicy; a constant cropper, of good size. Ripens 10th December. Is a good carrier.

BUNGOME.—Very early, rather small, juicy, of good flavour. Comes in before any other apricot. Is 6d.

CAMPBELLFIELD'S SEEDLING.—Fruit very large; skin rich orange, with large red blotches; flesh deep orange, very rich, juicy. Ripe December 20. This is one of our very best.

CAMDEN PALE SUPERB.—Fruit very large, oval; skin pale yellow, bright red in the sun; flesh pale, very meaty. Tree must be thinned. Ripe first week December.

CARRINGTON.—A colonial variety, must be heavily thinned; fruit large; skin brownish in the sun; flesh rich and vinous; ripe after Christmas.

CALIFORNIAN ROYAL.—An American form of the famous Royal; fruit medium size, round; skin rich orange, not spotted; very rich and juicy; ripe December.

DUNDONALD.—A very favourite variety in Victoria and Tasmania; fruit very large; skin deep orange, flesh deep orange. A fine variety, ripening with, and after, Moorpark.

DEFARGES.—A French variety; medium to large, golden orange, with purple cheek; flesh firm, sugary, and juicy, deep orange yellow. Ripens December.

DE CHANCELLOR.—Large, of excellent quality, deep orange yellow, high flavour. Heavy and constant cropper, and considered one of the best varieties in France.

DENHAM COURT.—A variety received by us from Denham Court. Described as a most profitable market variety, being of large size, very showy, and a constant bearer.

ELRUGE.—Fruit always large; skin clear, deep yellow, dark red in the sun; flesh firm, with an abundance of rich, luscious juice. Fruit ripens here first week in December.

EARLY MOORPARK.—A very fine apricot, ripe here second week in December; very large, deep, rich orange in skin and flesh; very rich, vinous juice; appears a constant cropper.

EARLY GOLDEN.—A little known variety, ripening a little after Masculine, but much larger; skin and flesh deep orange. A really first-rate sort.

GOURLAY.—A Californian variety, largely grown there for canning.

HARRIS.—A new American variety with the very highest reputation. Said to be remarkably hardy, standing uninjured the rigours of New York winters, and also the extreme heat of their summers; fruit of largest size, roundish; skin deep golden yellow, very clean, bearing constantly every year.

HEMSKIRKE.—Fruit largest size, roundish, flattened on both sides; skin deep orange, bright red in the sun; flesh deep yellow, very meaty. Ripe here middle of December.

HATIVE d'AUVERNE.—An enormous fruit; in shape long, conical. The tree needs the knife in summer, but very little in winter. Ripe here second week in December.

KAISHA.—Very strongly resembles Pineapple. Ripe here third week in December. Its size and appearance will recommend it to planters for market.

LARGE EARLY.—A variety with a high reputation. Tree very vigorous, and must be

pruned lightly in winter. Said to ripen two weeks after Masculine.

LUIZETTE.—A French variety, very largely grown for the Paris market.

LARGE ORANGE.—A most profitable apricot, bearing every year an enormous crop of large, very highly-coloured fruit; the flavour when fully ripe is first-rate. Quite ripe third week in December, and fully coloured two weeks earlier.

MOORPARK (TEMPLE'S).—Fruit very large, round, one-sided; skin deep reddish orange, with an abundance of rich juice; needs good cultivation, which it well repays. Ripe end December.

MANSFIELD SEEDLING.—Very large, somewhat like Moorpark; skin deep orange, with a few red dots; a heavy bearer, ready to gather at Christmas; one of the very best.

MONTGAMET.—Fruit only medium; skin pale yellow, a little red next the sun; flesh yellowish; a clingstone.

MAUGER.—A variety imported from France, and claimed to be one of the best. It is a seedling of the Peach Apricot, ripening earlier, and far superior quality. Same size and form as peach, but more juicy and sugary.

NEWCASTLE EARLY.—Ripens third week November, or 14 days after Red Masculine; a larger fruit, of fine yellow colour, and a heavy bearer.

OULLIN'S EARLY.—Fruit large; skin deep rich yellow, flesh deep orange, very rich; ripe third week December, and is eagerly purchased by canners.

OULLIN'S IMPROVED.—As its name implies, an improvement on its parent, "Oullin's Early." Fruit very large, deep rich yellow; very sweet, of true "Moorpark" flavour. A heavy and constant cropper, and sure to be a favourite for fresh fruit trade, and particularly so for canning.

PINE APPLE.—A fine apricot, which, in our experience, never fails to bear a crop; fruit large, roundish; skin bright yellow; very clean. Ripe here Christmas week.

PEACH.—Is of Moorpark type, and does well all over Riverina. Recommended by our Agricultural Department as a canner especially.

ROYAL.—A well known variety; a heavy and constant cropper; fruit large, roundish, oval; skin deep yellow, tinged with beautiful red in the sun; flesh deep yellow, with

an abundance of rich, vinous juice. Ripe third week December.

RED MASCULINE.—The earliest apricot we have, ripening here November 9; fruit small, round; skin yellow, beautifully red in the sun.

ROMAN.—Probably the very hardest apricot; fruit large, roundish, oval; skin fine yellow, with a pale red cheek; fairly juicy. Ripe first week in January.

RIVERSIDE.—A variety of S.A. origin; fruit largest; larger than Moorpark; in appearance somewhat resembling Royal; skin tinged red where exposed; flesh deep orange yellow, and very luscious; ripens just as Oullin's is finished, and is especially valued for packing when quite solid; a very heavy cropper, coming in at a good season.

RIVER'S LARGE RED.—A most prolific bearer, fairly large, round; bright red in the sun; flesh orange, very rich and vinous; ripe third week in December.

ROYAL GEORGE.—A good fruit, hanging till New Year here; of good size, and fine flavour. Its fault is want of colour; but its season makes it valuable.

ST. AMBROISE.—Fruit large, roundish, deep yellow, rich red in the sun, very clean and smooth; flesh deep yellow. Should ripen end November.

SUNRISE.—Described as the largest of early apricots, coming in with Newcastle; fruit deep orange, covered with minute red dots, tender and juicy; a good cropper.

SMYRNA.—Fruit large to very large, resembling HemsKirke, sweet and juicy, parts freely from the stone; remarkable on account of the kernel, being free from the prussic-acid flavour, and is in Smyrna used as an almond. 1s 6d.

SPARKS' MAMMOTH.—Extra large size, pale yellow, flesh clear yellow, very juicy and sweet. 1s 6d.

SUPERBE.—A variety highly recommended by Continental Pomological Societies, being of specially fine quality, and very sugary, ripening fairly late in season. 1s 6d.

TURKEY.—Fruit medium, round, smooth; skin fine deep orange, brownish red in the sun; flesh yellow, firm, juicy; ripe last week December.

WARWICK.—Fruit very large, oval; deep orange, with brilliant red in the sun; flesh orange, very firm, rich and vinous. Its size and appearance will always sell it. Ripe third week December.

BANANAS.

ALTHOUGH, strictly speaking, a tropical fruit, the Banana will bear well in many parts of the State, especially in the interior. Of course, a sheltered situation must be chosen.

CAVENDISHII.—The well known dwarf banana, producing immense bunches of large, delicious fruit, with a delicious flavour. Price 2s each.

LADY'S FINGER.—A splendid flavoured variety, fruit long and slender, produced in enormous bunches. Very hardy, and of finest flavour. Price, 1s 6d each.

PLANTAIN.—The hardest of the tribe, ripening its fruit even in this locality. Price, 1s 6d each.

SAPIENTUM.—The common banana, very hardy and, although not so rich as the preceding, of good flavour. Price, 1s 6d each.

GIANT SUGAR.—Fruit small, but produced in immense bunches; flavour particularly rich and delicious. Price, 2s 6d each.

CHERRIES.

WORKED ON SEEDLING MAZZARD STOCK, AND SO AVOIDING THE SUCKERING SO TROUBLESOME WHERE THE COMMON SUCKERS ARE USED.

THE CHERRY requires a deep, warm, dry soil, with special regard to drainage. If these conditions are observed, there is no more profitable fruit crop.

PRICE, 1s. EACH; 10s. 6d. DOZ; SPECIAL QUOTATIONS PER 100 and 1000.

ARCHDUKE.—Fruit large, skin bright red, becoming very dark when mature; flesh half melting, juicy, with rich sub-acid flavour; ripens a month after May Duke.

BEDFORD PROLIFIC.—Fruit large, roundish, skin dull brownish black; flesh tender and rich; a fine cherry, and a heavy and constant cropper; early.

BELLE DE ORLEANS.—Fruit above medium size, roundish; skin yellow, half-covered with pale red; an enormous cropper, ripening just after Early Purple Gean.

BIGARREAU ROCKPORT.—Skin a beautiful bright red; flesh firm, juicy, sweet, and rich. Ripens a few days before May Duke.

BIGARREAU GAUCHER.—New early cherry. Fruit very large, nearly round; skin brownish red; flesh reddish, firm, juicy, and good. After E. P. Gean.

BELLE DE MONTREUIL.—Fruit very large, round, marbled with red; flesh firm, deep red. Sugary, perfumed. An early variety, and hardy.

BELA DI PISTOIA.—An early variety. Fruit very large, round, dark red; flesh soft, sweet, and very perfumed. 1s 6d.

BIGARREAU PELLISIER.—Beautiful large fruit, often measuring one inch in diameter; skin dark glossy red; flesh rosy, firm and crisp; recommended to us as a valuable early cherry.

BIGARREAU ABEL.—Fruit very large, heart-shaped; black flesh, firm, juicy, highly flavoured; tree very productive; late.

BIGARREAU ELTON.—A variety specially selected by Continental fruitgrowers as being one of the earliest and most profitable; should ripen early in November in this country.

BIGARREAU M. GOUCHER.—Fruit very large, nice red colour, heart-shaped, firm, juicy, delicious; ripening late in season; tree very vigorous and prolific.

BIGARREAU RIVERCHON.—Large, almost black, flesh firm and good.

BIGARREAU TWYFORD.—Fruit large, obtuse heart-shaped; skin a bright shining red; strongly recommended for growing for market, on account of its extreme earliness.

BIGARREAU NAPOLEON.—Fruit of the largest size, regularly heart-shaped; skin amber in the shade, with a fine crimson cheek; flesh firm and crackling, juicy.

BIGARREAU, BLACK.—Fruit very large, heart-shaped, skin smooth and even; jet black; like St. Margaret, but appears to succeed in a warmer climate. Very late.

BIGARREAU MONSTREUX DE MEZEL.—A very large, handsome cherry of excellent quality; medium.

BLACK EAGLE.—Fruit above medium size, borne in pairs and three; skin almost black; flesh deep purple; superior to Black Heart, with which it ripens.

BLACK REPUBLICAN (LEWELLING).—A hybrid of Napoleon and Black Tartarian; fruit of large size, deep shining black. Ripens latest.

BLACK TARTARIAN.—Fruit of largest size, heart-shaped; skin glossy, purplish black; flesh purplish, half tender; a superb fruit, ripening a week after May Duke.

BIGARREAU JABOURLAY.—Described as the earliest Bigarreau Cherry fruit large; dark red, rich flavour; very highly spoken of on the Continent: a very strong grower.

BLEEDING HEART.—Fruit medium size, quite heart-shaped; skin dark, dull red; flesh firm, but juicy, of fair flavour; a heavy cropper. Mid-season.

BURGDORFF'S SEEDLING.—A magnificent large dark red, very early variety, ripening just after Early Purple Guigne, and, in our opinion, is going to supersede this variety for early market purposes; appears to stand warmer climate than most varieties; doing famously within 20 and 30 miles of coast line of New South Wales. 1s 6d.

CALIFORNIA ADVANCE.—A variety from California, a seedling from Early Purple Guigne; ripens one week earlier; much larger, and a heavier cropper. Colour, dark purple, firm fleshed.

CHAPMAN.—A seedling of Black Tartarian, larger and finer, a better bearer, and ripens immediately after Purple Guigne.

CLAREMONT.—Finest early pale cherry, ripening in Goulburn early in November. Fruit large, a little flattened; skin waxen white, clear, rich vermilion in the sun; flesh firm.

CENTENNIAL.—A seedling from that fine cherry, Napoleon Biggareau. It excels it parent in size considerably.

DOWNTON.—Fruit large, rather blunt; skin pale cream, splashed with light red; flesh white throughout, tender, with a delicious rich flavour. A partial clingstone.

EARLY BROWN BIGARREAU.—Fruit large, distinctly heart-shaped; skin liver colour; flesh brownish; very rich and good. Mid-season.

EARLY LYONS.—Fruit very large; skin deep red in the sun; flesh red, very juicy, firm, and very solid. A grand market variety, ripening a week after Early Purple Gean.

EARLY PURPLE GEAN.—Fruit medium in size, roundish, heart-shaped; skin smooth, rich purple; flesh purple, tender. The earliest variety to reach the market.

EARLY RIVERS.—Fruit large size; skin purplish black; flesh rich and agreeably perfumed; ripening a week after Purple Gean. An enormous cropper, requires thinning.

ELTON.—Fruit large, rather pointed; skin pale yellow in the shade; flesh fairly firm, with a delicate flavour; ripens a little after May Duke.

EMPRESS EUGENIE.—Fruit large; skin dark purplish black; flesh purple, of a rich luscious flavour; similar in appearance to May Duke; but ripening ten days earlier.

FLORENCE.—Fruit large, roundish, heart-shaped; skin pale amber, nearly covered

with bright red; flesh amber, very firm, with a rich sweet flavour; a favourite fruit for market on account of its lateness; will hang for some time after ripening.

FRUHURST DU MARK.—Another very early cherry received from Continent, where it is described as one of the earliest; medium size; dark red in both skin and flesh; very sweet, and good market sort.

GUIGNE ANNONAY.—Fruit very large; dark black, somewhat resembling Early Rivers, but is 8 to 10 days earlier and firm fleshed; free, vigorous grower, and constant cropper.

GOVERNOR WOOD.—Fruit large, roundish, heart-shaped; skin yellow, marbled with bright red; juicy, sweet, rich and delicious; ripens ten days after May Duke.

GREAT BIGGAREAU.—Very large, dark red to black, firm, yet juicy; strong grower and very productive; late. 1s 6d.

HEART OF MIDLOTHIAN.—A fine, mid-season cherry, but liable to overbear; fruit large, obtuse heart-shaped; skin black; flesh purplish black; very juicy and rich.

LAMBERT.—Largest size, bright, rich colour, glossy, with small russet dots; flesh reddish. Very firm, and unsurpassed in quality. Later than Big. Napoleon. 1s 6d.

LATE DUKE.—Fruit large, heart-shaped, but flattened; skin a rich, dark red; flesh yellowish; similar to May Duke in appearance, but a month later.

MERVILLE DE LANGSUR.—A fairly late variety. Fruit very large, oval, skin dark red, very juicy, of a sweet acidulous flavour. Tree prolific and of upright growth. 1s 6d.

MAY DUKE.—Fruit medium; skin rich dark red; flesh reddish, tender and melting; the most popular of the early cherries.

MORELLO.—Fruit medium; skin dark red; flesh dark purplish red, full of a rich, purple juice; the favourite cooking and preserving cherry.

NOBLE.—Very large, dark red, flesh firm, good flavour; tree hardy and prolific; reputed to be the best dark cherry grown, and will become a great favourite. 2s.

OLIVET.—A fine new cherry from France. It bears a strong resemblance in shape and texture to Morello, but ripens nearly a month before that variety.

OHIO BEAUTY.—Fruit large, obtuse heart-shaped; skin light yellow, almost covered with fine red; flesh whitish, tender, very juicy; ripens ten days before Napoleon.

PONTIAC.—Fruit large; purplish black; late; this variety is reported as being one of the hardiest and best croppers in Wagga district.

PRECOCE DE BOPPARD.—Sent to us from the Continent as the earliest cherry known, ripening there in March. This being equivalent to September or October in this country, should see this cherry ripe three weeks to a month before Early Purple Gean; fruit dark glossy red; striped and spotted; a good grower and constant cropper.

REINE HORTENSE.—Fruit very large, roundish, elongated; skin a bright lively red, a little mottled; flesh tender, very juicy, slightly sub-acid; ripens two weeks after Bigarreau.

RAMEN OLIVAR.—Dark glossy red; flesh firm and sweet; very large, measuring up to 1½ inch in diameter; growth of tree a good deal resembles Early Lyons, but more erect growing.

ST. MARGARET.—Fruit very large, roundish

heart-shaped; skin shining black; flesh purple, very juicy, with a strong brisk flavour; a grand cherry, ripening with Florence, and always commanding high prices.

WERDER'S EARLY BLACK.—Fruit large, heart-shaped; skin black; flesh purplish, tender, very rich; perhaps the most profitable variety for market culture.

WHITE HEART.—This is only Bigarreau under another, and perhaps better known, name.

CITRUS FRUITS.

FOR the reason, among others, that it has really no dormant period, the Citrus tribe require a little more care than most fruits. Being a very shallow rooter, it suffers in time of drought, and must be mulched—anything will do, dead weeds, or grass, rotten sawdust or manure. Further, it will not stand excess of moisture, nor of cold, but both these can easily be avoided in selecting a site.

PRICE, 1s. 6d EACH; 12s. DOZ. SPECIAL QUOTATIONS PER 100 and 1000. 50 TREES AT 100 RATES.

ORANGES.

WORKED ON SEEDLING ORANGE OR LEMON STOCKS.

BAHIA, or NAVEL.—Fruit very large, round, skin thin, very juicy and rich; the very best of oranges, but, unfortunately, not a very heavy bearer; prefers a warm situation.

BLOOD (MALTESE).—Fruit medium size, flattened; skin deep red; filled with an abundance of deep red juice; tree a free grower, and the fruit ripens early.

BUCKEYE NAVEL.—Another improved Washington Navel from same source as foregoing; a true navel orange in every way, ripening early in season; distinct and delicious flavour, and is a good cropper. Stock limited. Price, 2s 6d.

GOLDEN NUGGET NAVEL.—A variety from California, far and away superior to Washington Navel; fruit very smooth, solid, and thin skinned, of very fine texture; colour, strong gold; tree of pendulous habit of growth, and is a regular and even cropper. Stock limited. Price, 2s 6d.

HOLDFAST.—A colonial seedling; valuable chiefly on account of the remarkable way in which it hangs to the tree; fruit large, roundish; skin pale yellow, very smooth.

HOMASASSA.—Fruit medium size, somewhat flattened; skin very smooth and thin; a splendid Californian variety, where it is ranked as best for shipping.

JAFFA.—Imported from California, and there considered to be "unsurpassed by any other variety"; tree a strong, vigorous grower, very productive.

JOPPA.—Fruit large size, oblong; skin particularly thin, smooth and bright; pulp very juicy, rich and sugary, and without any seeds; tree a vigorous upright grower, quite thornless, a constant and early bearer. Of sweet and high flavour from the time it begins to colour, and yet may be allowed to hang for weeks after ripening without deterioration.

MEDITERRANEAN SWEET.—Its great value consists in its being an early, prolific and continuous bearer; absolutely thornless, medium sized, slightly oblong.

MEXICANA.—Fruit large size, roundish oval; skin smooth, very thin; very juicy, of good quality; tree a free grower and hardy.

THE NAVELENCIA.—As its name implies, is a cross between the popular Valencia and Washington Navel; retains the good qualities of Washington, together with hardiness and lateness of Valencia, and is reported to ripen from 30 to 60 days later than Washington. This should be a valuable variety for citrus growers. Stock limited. Price, 2s 6d.

PARRAMATTA.—Fruit large size, round; skin deep yellow; when the trees attain a little age, of splendid quality; perhaps the best for market from its productiveness.

QUEEN.—Fruit medium to large, flattened; skin deep yellow, and with age remarkably thin; very juicy, of fair flavour; tree a very sturdy grower.

RIO.—Fruit large size; skin deep yellow, fairly thin; flesh very juicy, of good flavour; a very heavy and constant cropper; tree very vigorous and very hardy.

SILETTA.—Fruit of largest size, roundish; skin pale yellow, very smooth and thin; abounding in juice. An enormous bearer, and perhaps the hardiest.

ST. MICHAEL.—Fruit of largest size, roundish; skin deep yellow, smooth and thin; very juicy, and but few seeds; the most profitable for market. Bears carriage well.

THOMPSON'S IMPROVED NAVEL.—A variety from America, where it is reputed to be a distinct improvement on Washington Navel; fruit equal in every way to its parent, but is earlier, and is a good, even, consistent cropper. Stock limited. Price, 2s each.

VALENCIA, LATE.—One of the best varieties grown. Fruit very large, oblong; very firm and solid; pulp fine grained, with a high, rich flavour. The very latest to ripen.

WASHINGTON NAVEL.—A splendid orange; fruit very large, very even, of perfect shape and colour; pulp very fine-grained, remarkably juicy, with a rich, racy flavour.

WHITE SILETTA.—One of the earliest oranges to ripen; skin very fine and thin, pulp rich and very juicy; will usually ripen before the frosts come.

MANDARINS.

BEAUTY OF GLEN RETREAT.—A Queensland variety, of noble size and appearance, and most luscious flavour; an enormous cropper. Is doing well in this State.

ELLENDALE BEAUTY.—Pale colour, very fine skin, flavour not equal to Jacobs', but on account of its huge size and favourite colour, will always sell in Sydney markets. 1s 6d.

PARKER'S SPECIAL.—A Queensland seedling raised by Mr. Parker, said to be of larger size and equal in quality to "Beauty of Glen Retreat." The fruit ripens earlier in Queensland than any other, and the trees in the nursery show a most vigorous habit.

CANTON.—Similar to Scarlet, described below.

EMPEROR.—The largest of the Mandarins; skin almost red, and loosely attached; flesh very juicy, not so highly flavoured as Thorny; tree spreading. The most profitable for market.

FEWTRELL'S EARLY SHIPPING.—Skin and flavour like an orange, but peels and quarters like a mandarin; very robust, and heavy cropper. Should be an acquisition to this section. 1s 6d.

JACOBS' IMPROVED THORNY.—Very fine skin, juicy and highly coloured. Splendid free grower, and good cropper. Flavour between Thorny and Scarlet. 1s 6d.

SCARLET.—Fruit very large in size; skin almost scarlet; flesh very juicy, but not of best flavour. Very productive, and very handsome.

"OONSHI" (JAPANESE).—A very hardy tree, said to stand frost well, pendulous habit, no seeds; flesh firm; thin skin; mid-way between an orange and a mandarin in size.

THORNY.—The best flavoured of the mandarins; fruit medium sized, quite flat, with a very high flavour. The tree requires to have the wood thinned out annually.

Preserving Varieties.

CUMQUAT.—Fruit very small, round; skin deep yellow; only used for preserving. Tree a vigorous grower and a heavy bearer.

POORMAN'S (TRUE).—Fruit very large; skin rather thick; very hardy; an enormous cropper; fair flavour.

SEVILLE (ROUND).—Fruit large size, roundish, rather flattened; very solid. The best variety for marmalade.

SEVILLE (FLAT).—Similar to preceding, except in shape. Considered more valuable for marmalade by the factories.

LEMONS.

BELAIR.—A newly imported variety from Italy.

These were introduced by us with the idea of giving growers an opportunity of placing the identical variety on the market as the cured lemons reaching here from the Mediterranean.

COMMON.—A very hardy lemon, bearing when the finer varieties do not.

GENOA.—Fruit medium size, oval, with a very thin rind, and a strong, pleasant, acid flavour. Tree remarkably early bearer.

LISBON.—A splendid old variety, which is too well known to need description.

LISBON VARIEGATED.—Similar to Lisbon, but fruit and foliage variegated; a little coarser than Lisbon. A very vigorous grower, and good bearer.

LISBON THORNLESS.—Fruit larger than Lisbon, a little coarser. Tree a spreading, vigorous grower.

MESSINA.—This is the lemon which has been so largely in evidence in Sydney during the present season, and which commanded such fabulous prices.

SICILY.—A lemon of splendid quality, almost destitute of rag, and with an abundance of richly acid juice; of medium size; thin, smooth, very tough skin.

SWEET RIND.—The best of all lemons, being above medium size, and very even. Sells very freely in the markets.

VILLA FRANCA.—Introduced as a summer bearing lemon. Tree a strong, vigorous grower, with very few thorns; pulp very rich in acid, and with a total absence of rag.

LIMES.

EAST INDIAN.—Fruit of large size, very juicy; tree a free grower, very prolific.

PERSIAN.—Fruit small, very sweet and juicy; very productive.

TAHITI.—Fruit very large, with an exceedingly thin rind and few seeds; very juicy; does well in Queensland.

WEST INDIAN.—Fruit small, of excellent flavour; makes the best lime juice; free bearer.

Valencia Late, on Orange.

Camden Sherry on Resistant Stock,

SHADDOCKS.

- COMMON.**—Fruit of large size; an abundance of highly acid juice.
- BLOOD.**—Fruit enormous size; very solid flesh with a sweet juice.
- MANILLA.**—Fruit small; juice rich and sweet; the best of its class.

CITRONS.

- BENGAL.**—Fruit large, round; a grand preserving variety.
- GIANT.**—Fruit of large size, roundish; skin rough.
- KNIGHT'S.**—Fruit large, oblong; skin rough; the best for candied peel.
- DWARF.**—Similar to Knight's, except the tree is dwarfy; very prolific.

FIGS.

PRICE, 1s. EACH; 10s. 6d. DOZEN.

- ADAM.**—Fruit of very large size, long; very blunt; skin pale brown; an enormous early fig; not equal to some in flavour, but always selling readily from its size.
- ANGELIQUE BORDEAUX.**—Fruit medium size, roundish; skin pale greenish yellow, with light-coloured dots; flesh white, a little rose-coloured in the centre. A good cropper, usually bearing twice. Early.
- BLACK GENOA.**—Fruit very large, long ovate; skin dark purple, almost black, with a blue bloom; flesh bright red, juicy, very rich and saccharine.
- BLUE ISCHIA.**—Fruit medium size; skin very dark purple, almost black when ripe; flesh deep red, sweet and luscious. An excellent bearer, sometimes called Black Ischia.
- BLUE PROVENCE.**—Fruit small, roundish; skin purple; flesh deep red, very rich and juicy. An enormous bearer, fruiting nearly all the season.
- BROWN ISCHIA.**—Fruit large, roundish, obovate; skin chestnut colored; flesh purple, very sweet and rich. A splendid fig.
- BROWN TURKEY.**—The very best and hardiest of figs; succeeding everywhere, and bearing two and, in favoured localities, three crops annually. Fruit large, oblong, or pyriform.
- BRUNSWICK.**—Fruit largest size, pyriform in shape; skin fine violet, brown in the sun, dotted with pale brown specks; flesh reddish brown, pinkish near the centre.
- CASTLE KENNEDY.**—Fruit large, short, and thick; skin deep reddish brown; flesh pink, very rich and sugary; early; a constant and heavy cropper.
- DE L' ARCHIPEL.**—Fruit very large, pear-shaped; skin pale brown, with stripes of dark brown; flesh deep red, almost transparent, quite syrupy; early.
- EARLY VIOLET.**—Fruit small, roundish; skin brownish red, covered with blue bloom; flesh red, of good flavour; though small, this is a fine fig on account of its productiveness.
- GREEN ISCHIA.**—One of the hardiest light-coloured figs in cultivation; fruit large, roundish; skin covered with a pale brown tinge in the sun; flesh purple.
- MARSEILLES (WHITE GENOA).**—Fruit above medium size, quite round; skin pale yellowish green; flesh white, exceedingly rich and sugary; a splendid fig for drying.
- WHITE ADRIATIC.**—Fruit of large size; skin white, thin, but tough; flesh red, very rich; turning amber colour when dried. All our plants are from trees imported from California.

GRAPE VINES.

PRICE, 6d. EACH; 4s. PER DOZEN; 20s. PER HUNDRED. SPECIAL QUOTATIONS FOR LARGE QUANTITIES.

- ALMERIA OR DARIA.**—Bunches very large; berries largest size, roundish; skin very tough, of a beautiful light amber colour. Will keep for weeks.
- BLACK HAMBRO.**—Bunches large; berries large, roundish; skin deep black; a very heavy and regular cropper.
- BLACK CHAMPION.**—Bunch and berry large; deep shining black; ripens fairly early.
- BARBAROSSA.**—Bunches long, tapering; berries large, round; skin purple or grizly; will thrive in the cooler districts.
- BLACK FRONTIGNAC (BLACK MUSCAT).**—Bunch medium; berries small, thickly set, with a rich, muscat flavour. Sometimes called Jura Muscat.
- BLACK DAMASCUS.**—Bunches large, rather loose; berries large, roundish; skin deep

ROSES BY THOUSANDS: TRY OUR SPECIAL COLLECTIONS.

- black; flesh rich and sugary; a fine late table grape.
- BLACK PRINCE.**—A noble looking grape; bunches long; berries largest size, oval, rather thinly set; skin thick, deep black; very rich and sugary; late.
- BLACK ST. PETER'S OR BLACK ALCANTE.**—Bunches large, shouldered; berries very large, oval; skin tough, rather thick, jet black with a blue bloom; hangs well.
- BLACK MONUKKA.**—One of the very few seedless grapes; bunch and berry of largest size; skin deep, shining black; very rich; late. 1s each.
- BLACK TOKAY.**—This is the grape marketed from Howlong a couple of seasons back, in the month of May. Has fruited in this district, and gives promise of becoming one of the most popular varieties for market. 1s each.
- BOWOOD MUSCAT.**—A seedling of Muscat of Alexandria; equally rich in muscat flavor; a large berry, and a much better setter. In this district ripens all March.
- BUCKLAND'S SWEETWATER.**—A very early grape, of good quality; bunch and berry large, pale amber; a very heavy cropper.
- BAXTER'S SHERRY, OR CAMDEN SHERRY.**—This grape is largely grown in this district; hangs uninjured all March, becoming a deep golden colour, with a reddish bloom.
- BLACK LADY'S FINGER.**—Same shape and flavour as Lady's Finger, but skin a deep, shining black; more hardy and not susceptible to black spot.
- BLACK MALAGA.**—Bunches large and tapering; berries very large, oval; skin deep black, very thick. A valuable grape, on account of its lateness. A splendid carrier.
- CANNONHALL MUSCAT.**—A large, deep yellow Muscat. Berries roundish. Sets well in this district. Rich muscat flavour.
- CHAMPION MUSCAT.**—A grape of recent introduction; berry very large, round; skin tough, deep, rich red; flesh very rich, with a high muscat flavour; medium. 1s each.
- CHASSELAS VIBERT.**—Bunches very long and tapering; berries large, round, deep amber; very juicy and rich; medium season.
- CHASSELAS ROSE.**—A new and promising grape; berries large, of a pinkish colour.
- CRYSTAL.**—This is the grape so largely grown in Adelaide for market, reaching Sydney when grapes are all but over; berry large, round, clear, pale amber.
- CENTENNIAL.**—Berries simply enormous, closely set in correspondingly large bunches; in colour a rich, deep amber, and with a most delicious flavour; as a market grape it is unsurpassed, its gigantic size and wonderful beauty always selling it at fabulous prices. 1s each.
- DORADILLO.**—Grown largely in South Australia for the Sydney markets, where it arrives towards the end of March in grand condition; berry very large, rich amber.
- DUKE OF BUCCLEUGH.**—A grape of truly enormous size, and of splendid quality. Will command fancy prices for its size alone.
- EARLY SHERRY.**—A profitable, early White Grape, largely grown for market in this district.
- EMPEROR.**—Strong, vigorous grower, leaves very large, bunches large; berries dull purple, oval, and very firm. Spoken of in California as good shipping grapes.
- FERDINAND DE LESSEPS.**—A very distinctly flavoured grape; like none other that we know; a very strong grower; berries fairly large, closely set; skin thin; pale yellow.
- FEWARRA.**—A fine late grape, remarkable for its tough skin. Will hang weeks. Does well in our warmer districts. Deep, shining black.
- FLAME TOKAY.**—A very late ripening variety, which is doing well with us here; bunches rather loosely set, which is a decided advantage in a late grape. 1s each.
- GOLDEN CHAMPION.**—Berries of largest size, round; skin tender; deep golden. A very grand grape, but does not stand the wet. Fairly early.
- GOLDEN HAMBRO.**—Berries large, rather oval; skin tender, deep amber, very rich in flavour, and requires good cultivation; later than Golden Champion.
- GOLDEN CHASSELLAS OR ROYAL MUSCADINE.**—Bunch and berry medium size; round; skin fairly tough; deep golden; very juicy and good; thoroughly hardy; early.
- GROS COLMAN.**—Berries very large, round; skin tough, deep purplish black, with a heavy bloom. A very fine late grape, very free bearer, and bears when young.
- GROS MAROC.**—A large late black grape; berries larger and better flavoured than Gros Colman, and colours better. Price, 1s each.
- GORDO BIANCO.**—An improvement on Muscat of Alexandria in that it sets the fruit much better; in flavour, size, and appearance strongly resembles Muscat Alexandria.
- GREEN GASCOIGNE.**—A very hardy, free-bearing grape, but as yet little known; bunch and berry large, roundish; skin greenish yellow, very tough.
- LADY DOWNES.**—Bunches long, rather loose; berries large, roundish, oval; skin thick; reddish purple, becoming quite black; flesh firm, sweet and very rich.
- LADY HAMPDEN.**—A Muscat of New South Wales origin. Seems likely to prove extra good. 1s each.
- LADY'S FINGER OR CORNICHON.**—Bunches very large; berries largest size, peculiarly pointed; skin very tough, deep yellow, beautifully tinged with pink.
- MUDGE BLACK SHERRY.**—The late black grape so largely grown in Mudgee district, reaching Sydney market up to Easter, being a firm, tough berry, it will withstand moist weather, and is splendid for shipping.

MRS. PEARSON'S GOLDEN QUEEN.—Berries large, roundish, oval, deep golden colour; forms a handsome bunch; firm, juicy, and rich; does well in hot climate. 1s each.

MUSCAT OF ALEXANDRIA.—The standard of flavour for all White Muscats. It sets its berries rather loosely, which is its only fault.

MUSCAT-HAMBRO (SNOW'S).—Bunches very large; berries very large, rather oval, sometimes almost round; skin deep purple; flesh very juicy, with a rich and distinct muscat flavour. Perhaps the best of black muscats. Ripens during all March.

MORILLION.—This is a comparatively new grape in this colony, and from our experience, identical with Doradillo. Season very late, and will hang until April.

MRS. PINCE'S BLACK MUSCAT.—A really splendid late Black Muscat; berries largest size, deep, shining black; skin thin, very tough; very rich in muscat flavour.

MADRESFIELD COURT BLACK MUSCAT.—Equally rich in muscat with the foregoing; berries very large, and thickly set; a very heavy and constant cropper; late.

MRS. HALL'S PERFECTION.—A Muscat raised in New South Wales. It comes to us with a high reputation, but has not yet fruited with us; 1s each.

OEILLIADE OR BLUE IMPERIAL.—A most handsome grape, and for market had to excel; berries very large, thickly set; skin blackish purple; medium.

PRINCESS ALEXANDRIA.—A new Red Muscat, which appears to do well in the County of Cumberland; a good bearer, with a high, rich flavour. 1s each.

RAISIN DES DAMES.—Berries largest size, closely set; skin tough, a beautiful yellow; flesh tender, of most exquisite flavour; mid-season.

ROYAL ASCOT.—Berries very large, of a deep purple colour; flesh tender, with a rich and distinct flavour. A grand grape, especially if grown in a warm situation.

RED PRINCE.—Berries very large, quite round, of a deep red colour; sets closely, not like Black Prince. A noble grape, but requires a warm situation and light soil.

RED HANNEPORT.—A valuable market variety; a copper-coloured grape, with a rich, strong muscat flavour. Hangs until middle of March. 1s each.

ROSE OF PERA.—A grape strongly recommended by our Agricultural Department as very suitable for our warm districts. A heavy cropper, and very hardy.

RED MALAGA.—Identical with Black Malaga, except in colour, which is coppery red. A noble looking grape, revelling in heat.

SWEETWATER.—A grape strongly resembling Royal Muscadine in size, shape, and colour; in fact, it is not so good as that variety, except that it ripens a fortnight earlier.

SYRIAN.—A truly superb variety as to size, some bunches having reached the enormous weight of 19lbs.; berries large, oval; skin thick, white at first, becoming tawny at maturity; flesh firm and solid; will hang remarkably late. 1s each.

SULTANA.—Bunches medium size, long; berries medium size, oval; skin pale yellow; flesh without seeds. A very fine table grape, but chiefly valuable for raisin-making. 1s each.

SABAIKOWSKI.—A very large grape, the berries tapering; skin a deep pinky red; a splendid looking grape; does well in hot climates. 1s 6d each.

SANTA PAULA.—A most peculiar grape of Lady's Finger type; berries cylindrical, nearly 1½ inches long; flavour fairly good. Price, 1s each.

TOKAY.—Berries large, roundish; skin clear, transparent yellow; flesh white, very juicy, with a delicate rosewater flavour; a very fine table grape.

TRENTHAM BLACK.—Bunches large, tapering and shouldered; berries above medium, oval; skin tough, jet black, covered with a thin bloom; flesh melting, juicy, rich, vinous.

THOMPSON'S SEEDLESS.—This is said to be an improved Sultana, in that it is a far heavier cropper, and berries set better. 1s each.

TERRET.—A grape much resembling Black Hambro, but larger. Largely used for jam-making, owing to its few seeds. A most healthy variety.

WANTAGE.—Bunches large; berries large, roundish; skin thin, of a handsome bright red. A most striking grape; requires a warm climate; very late.

WAX.—A noble looking grape, being almost transparent; berries large, oval, quite white; flesh tender, very juicy and rich; will not stand too much wet; late.

WORTLEY HALL.—Bunches large, well shouldered; berries very large, oval; skin thick, deep purple, with a heavy bloom; a most handsome grape; late.

WALTHAM CROSS.—Bunches very large; berries very large, round; skin thin, but tough, clear amber. A most magnificent grape; suited to the warmer districts; late.

WHITE HANNEPORT.—A new White Muscat, introduced from S. Africa. Has fruited for several seasons in this district, and appears to be an improvement on Gordo, owing to its freedom from spot. Price, 1s each.

ZANTE CURRANT.—The dried currants sold in shops are made from this grape, and as the process of manufacture is simplicity itself, it is a most profitable crop to grow. The vine requires to be long pruned. Quite seedless.

American Varieties.

These are splendid vines for trellising, being strong, vigorous growers. They all possess, in some degree, the peculiar foxy flavour which is so appreciated by some.

PRICE, 1s. EACH.

- ANNA.**—Berries large for this class; skin a shining pink.
- BELL'S SEEDLING.**—Of the Isabella type, but larger berries; skin deep, blackish purple.
- CATAWBA.**—Bunch and berry fairly large; skin deep red, with a thin lilac bloom.
- CLINTON.**—Berries small; skin black; flavour brisk; should be allowed to hang till frost.
- CONCORD.**—A fine looking, large-sized grape; skin black; ripens ten days before Isabella.
- DR. HINDLEY.**—An improvement on the usual type of American grapes, in that the berries are larger; a strong grower, with the usual flavour.
- DUC DE MAGENTA.**—A newly introduced grape from Canada, with a good reputation and a distinct flavour; black.
- ELSINBERG.**—Valuable on account of its flesh being melting and not pulpy, like most of this class; berries small, round; quite black.
- ISABELLA.**—A well known variety; berries large, black; a very strong grower.
- ISRAELLA.**—Fruit rather larger than Isabella, not so pulpy; skin black.
- PERKINS.**—Received by us from Hugh Dixon, Esq., who considers this the best American grape, with a peculiar raspberry flavour; pink.
- PIERCE.**—A very large berried grape, with heavy foliage; very strong aroma.
- POCKLINGTON.**—Berries medium size, jetty black; a heavy bearer.
- MILES.**—Berry small, round, black; ripens about the first of American grapes.
- SALEM.**—Berries large, round, a shade deeper in colour than Catawba.
- WILDER.**—Berry large, round, black, slight bloom; the berries adhere well to the stalk.

French Varieties.

The following were introduced by our Agricultural Department, as being the best of the French Chasselas Grapes. They have now fruited here, and can be recommended to those who prefer the Chasselas type. Price, 1s each. Quotations when required for large quantities.

- CHASSELAS DUHAMEL.**—Big, round berries; golden yellow; about a week earlier than ordinary Chasselas.
- CHASSELAS VRAI MUSQUE.**—Bunch short, cylinder shaped; compact berries, light, but fine; muscat flavour; it hangs well.
- CHASSELAS BLANC (Chasselas De Fontainebleau, Chasselas Fendant Roux).**—Medium sized bunch, tapering, sometimes shouldered; berries not compact, round, medium sized; skin thin, but firm, white, turning to light yellow, and often to a golden pink on the side exposed to the sun; juicy; ripens early. In Switzerland and in some parts of France, as well as in some districts of Australia, is also successfully used for wine-making.
- CHASSELAS FENDANT.**—Medium sized bunches, tapering, compact; medium berries of a greenish colour; flesh sweet, juicy.
- CHASSELAS FENDANT VERT.**—Medium sized bunches, tapering, compact; berries rather small; thin skin; white, sweet, juicy.
- CHASSELAS FENDANT BLANC.**—Bunch small and loose; medium sized berries; skin tough and firm; juicy.
- CHASSELAS DE JESUS.**—Medium sized bunches; medium berries, loose, round; rather tough skin; not so early as other Chasselas.
- CHASSELAS DE JUILLET.**—Rather small bunches; compact; berries of medium size, round; skin thin, but firm; white flesh, firm and juicy.
- CHASSELAS DE MONTAUBAN.**—Big, round berries; skin rather tough, golden yellow; fruit sometimes does not set well; ripens five or six days earlier than the ordinary Chasselas.
- CHASSELAS ROSE.**—Same as Chasselas Rose Royal; medium sized bunches, tapering, often shouldered, loose; berries rather big, light pink; firm flesh and juicy.
- CHASSELAS BOUCHES DU RHONE.**—Small bunches and compact; berries medium size; tough skin, white; flesh firm.
- CHASSELAS NAPOLEON.**—Bunches medium size; berries large, mixed with others of smaller size; skin tough, white; flesh firm, sweet, juicy.

GRAPES ON RESISTANT STOCKS.

These are now an assured success in N.S.W. Young vines, 2 years grafted, bearing 20 lbs. to the vine. All should give them a trial.

We beg to offer the following varieties grafted on this Stock, and can supply in large quantities in the leading varieties.

It is becoming recognised that, owing to the spread of Phylloxera, Commercial Vineyards in the future must be planted on these Stocks. The adaptability of either Riparia or Rupestris is now definitely settled, as flourishing vineyards are now scattered throughout New South Wales, and perhaps no better object lesson could be found than the district immediately surrounding our Camden Nursery, where vineyards planted in stiff clay, in white sand, and in red sandy loam, both on the hills and on the flats, may be found. Some of these have so impressed the officers of our Agricultural Department as to induce them to take photographs for reproduction in the "Gazette."

Owing to their extraordinary vigor, we recommend planting at a greatly increased distance, which enables the cultivation to be done by horse power, and, of course, economy in working.

Those marked x can be supplied in large quantities.

PRICE, 1s. EACH; 10s. PER DOZEN (except where otherwise priced). Special Quotations for large quantities.

GUAVAS.

 MOST excellent fruit, either for dessert or preserving. The purple variety is thoroughly hardy, and will stand pretty severe winters.

PRICE, 1s. 6d. EACH; 15s. PER DOZ.

PURPLE.—The hardest variety; fruit small, but borne in immense crops. Sometimes called Strawberry Guava, from its flavour resembling that of the Strawberry.

PARKER'S HYBRID.—An enormous fruit, twice

the size of the ordinary yellow Guava. Requires a warm locality.

YELLOW.—Fruit as large as a hen's egg, semi-transparent; splendid for dessert, and makes a grand jelly.

WRITE FOR SPECIAL QUOTATIONS FOR LARGE QUANTITIES.

LOQUATS.

A MOST useful fruit, coming in before any other fruit is ripe. Many worthless seedlings are grown, and the fruit is little more than seeds.

CALIFORNIA ADVANCE.—A variety claimed in California to supersede anything yet raised in loquats. Fruit large, deep golden yellow, being nearly all pulp, flavour distinct and delicious. Stock limited. Price, 3s 6d each.

MAMMOTH.—An extremely large variety, with very thick flesh and a single small seed. Flavour very rich and good; very juicy. Grafted plants, 1s 6d each.

GIGANTEA.—A Japanese variety, bearing fruit of prodigious size. A regular and very heavy cropper. Grafted plants, 1s 6d each.

COMMON.—Grown from selected seed, and with fair treatment producing enormous crops of large and very juicy fruit; a profitable shelter tree. Price, 1s each.

EARLY GOLDEN.—A variety from South Australia, not quite so large as Mammoth, but much earlier. Worked plants, 1s 6d each.

HERD'S LARGE.—This variety is of enormous size, and when thinned and annually manured, is the size of a hen's egg. Our stock is from the original trees. Budded plants, 1s 6d each.

ONE-SEEDED.—A variety of large size, a free bearer, with usually only one seed. Worked plants, 1s 6d each.

QUICK'S EARLY.—A very early and most prolific variety; ripens when there is practically no fresh fruit on the market. Worked plants, 1s 6d each.

MULBERRIES.

SOME of the free-growing varieties are very suitable for planting for shelter for trees.
PRICE, 1s. 6d. EACH; 15s. PER DOZEN.

BLACK ENGLISH.—The best variety, very long-lived, and makes a handsome tree. 2s each.

CAPE.—A fast growing tree, useful for shelter, and the fruit useful for culinary purposes.

DOWNING'S EVER-BEARING.—Full, large, measuring 1½ inch long, juicy, with an agreeable flavour. Ripens its fruit gradually during some weeks. An enormous cropper.

HICK'S FANCY.—Produces its fruit continuously during three months. Fruit of large size, very juicy, with a fine, acidulous flavour.

ALBA.—The Silkworm Mulberry.

MULTICAULIS.—This variety is used for the early feeding of silkworms. We can offer both these in large quantities.

MEDLARS.

THIS delicious fruit is hardly grown in this country, and, except to persons from the other side of the world, hardly known. The fruit must be gathered as soon as ripe, and stored inside till it becomes quite soft, when it is most delicious.

PRICE, 1s. 6d. EACH; 15s. DOZ.

DUTCH.—One of the best. Fruit not large. A heavy bearer.

NOTTINGHAM.—Fruit medium size, but of fine flavour.

MONSTREAU.—The largest of the medlars. Tree with a peculiar crooked growth.

ROYAL.—A variety highly esteemed in England for its flavour and productiveness.

NUTS, FILBERTS, &C.

THE cultivation of the different varieties of Nut-bearing trees is an industry which should have a great future in New South Wales. During the present season, green almonds brought 8d per lb. in the Melbourne market, and the supply was unequal to the demand. The importations of the various Nuts from abroad are annually enormous, the whole of which may be secured by growers of Nuts in New South Wales, as in this country they very soon come into bearing, and are mostly long-lived, and very beautiful trees.

Almonds.

Worked on Seedling Almond and Peach Stocks.

PRICE, 1s. EACH; 10s. 6d. PER DOZ.; £4 PER 100; 50 AT 100 RATES.

Special Quotations for Large Quantities.

BRANDE'S JORDAN.—An upright-growing variety, bearing large, sweet nuts, of the paper shell class, and, parting readily from the husk, is easily prepared for market.

BURBANK'S SEEDLING.—Tree extremely hardy, and a great bearer; recommended as one of the best for this climate, and flowers much later than other sorts.

GOLDEN STATE.—Originated in California; described as a great and regular bearer; large, with a full, smooth-skinned kernel and a soft shell.

GROSSE TENDRE.—A new almond, very large, thin-shelled, good grower and heavy bearer. 1s 6d.

HATCH'S NONPAREIL.—A very fine almond, large kernel, and very thin shell. The shell of this almond is the thinnest we know of, thus losing very little weight after being shelled. 1s 6d.

I.X.L.—A sturdy, upright grower, with large foliage; nuts large, with, as a rule, single kernels; soft shell.

LARGE PAPERSHELL.—A variety of common Papershell, but much larger; shell very tender, easily broken between the finger and thumb; kernel large, white, and sweet.

NONPAREIL.—Of weeping habit of growth, but forms a beautiful tree; an extraordinarily heavy and regular cropper, with very thin shell of Papershell type.

NE PLUS ULTRA.—Extremely prolific, producing its nuts in bunches all over the twigs; nut large and long, almost invariably one kernel; of fine flavour; hulls readily.

PRINCESS.—The finest of all Papershell type; nuts $1\frac{1}{2}$ inch long, with large, richly flavoured kernels; flowering much later than the other varieties, it should be valuable for districts liable to frosts. 1s 6d.

RIVERSIDE PEERLESS.—A variety of Australian origin, and is reputed to be a heavy and constant cropper; growth pendulous, and fairly vigorous; nut somewhat resembling Brande's Jordan, but if anything a trifle larger, and is far more highly flavoured; husk soft, being easily broken between finger and thumb; a valuable variety to

plant alternately with Brande's Jordan for fertilisation. 1s 6d.

SULTANA.—A tender shell almond of excellent quality. Fruit rather smaller than Papershell, and narrower, but of superior flavour. The tree is of slender growth.

WHITE NONPAREIL.—The tree is a strong grower, of spreading habit; nuts very large, with white shell; a far heavier bearer than "Brandes Jordan." 1s 6d.

Caryas or Hickories,

PRICE, 2s. EACH.

PECCAN NUT (Carya Oliviferous).—A quick-growing tree, being in full bearing at eight years old. Fruit $1\frac{1}{2}$ inches long, borne very abundantly. The most delicious of all Walnuts.

Chestnuts.

PRICE, 1s. TO 2s. EACH.

SPANISH.—The well known Sweet Chestnut, bearing its fruit in burrs; a splendid shade tree, attaining a great age and enormous size; the chestnuts form an important item in the food of many nations of Southern Europe; comes into full bearing about the sixth season of planting.

JAPANESE GIANT CHESTNUT.—As its name implies, a large Chestnut from Japan, bearing fruit three times the size of the Spanish, and coming into bearing at a very early age; tree thoroughly hardy, and makes a handsome shade tree. 2s.

Filberts.

PRICE, 1s. 6d.

GOSFORD.—Nut large, oblong, husk hairy, shell remarkably thin; kernel of excellent flavour.

FRIZZLED.—Nut of medium size, oval, compressed, husk hairy, deeply cut, shell thick, kernel sweet and good.

RED.—Remarkable for the crimson skin of its kernel. Nut of medium size, ovate, shell thick, kernel with a peculiar excellent flavour.

WHITE.—Resembles the foregoing, but with a light yellow or white skin. Nut ovate. Husk long and tubular.

WEBB'S PRIZE COB FILBERT
 WEBB'S PRIZE DAVIANA
 WEBB'S PRIZE EXHIBITION
 WEBB'S PRIZE RED-SKINNED
 WEBB'S PRIZE WHITE SKIN FILBERT

Victorian varieties of proved merit, and there considered to be far in advance of the older varieties.

Walnuts.

CHABERTE.—A large variety of French origin; very productive; excellent dessert. The tree develops its leaves and bloom late in the spring. 2s 6d each.

JUGLANS REGIA.—The English or Persian Walnut; a most handsome shade tree, and deserves planting on that account, apart from its value as a nut producer; there is an idea that our climate is too warm to

make walnut growing a commercial success, but in California, with a similar climate, a walnut plantation is considered the most valuable form of orchard. Price, 1s to 2s.

JUGLANS NIGRA.—The American Black Walnut; perhaps a little quicker-growing than Regia, and nuts not so large. Price, 2s each.

JUGLANS SEIBOLDII.—A Japanese variety, very hardy, and a very handsome tree; bears while young; nuts produced in clusters of from fifteen to twenty in each; husk thin; kernel very mealy and rich. Price, 2s.

JUGLANS CORDIFORMIS.—Also of Japanese origin. The nut is flat, or heart-shaped, something like a chestnut; shell very thin, smooth, not furrowed; kernel deliciously sweet, and easily extracted whole when the shell is cracked. Price, 2s.

Macadamia Ternifolia (Queensland Nut).

A valuable tree, either for shade, or for the fruit. Hardy as far south as Melbourne, attaining a height of 60ft., and a fairly quick grower. Reaches the nut-bearing stage in seven years. In flavour the nut resembles the Hazel. Price, 1s 6d each.

NECTARINES.

THIS fruit, being so closely allied to the Peach, requires a similar soil and treatment to that fruit.

PRICE, 1s. EACH; 10s. 6d. PER DOZEN. Special Quotations per 100 and 1000; 50 at 100 rates.

ALBERT VICTOR.—Fruit very large; skin yellowish white, with a carmine blush; flesh greenish white, very juicy. A freestone, ripening here first week in January.

BALGOWAN.—Fruit large, roundish, rather pointed; skin pale green, deep red in the sun; flesh greenish, very rich and melting. Ripe third week in January. Freestone.

BOSTON.—Fruit very large and handsome, roundish, oval; skin bright yellow, with a very deep, bright red cheek; flesh quite yellow. Freestone. Ripens early January.

CAMDEN SUPERB.—This magnificent nectarine originated at Camden Park, from, we think, Stanwick, which variety it strongly resembles, but excels it in size, and is almost free from the cracking so prevalent in the Stanwick. Freestone.

CARDINAL.—A valuable very early nectarine; very brilliant colour, and ripening ten to twelve days ahead of Early Rivers; very prolific, and this, coupled with its earliness, should make it a valuable variety for the orchardist.

DARWIN.—A new late nectarine from Rivers (England). Fruit fair size, very brilliant red and yellow skin; flesh yellow, of delicious flavour. Fairly late.

DOWNTON.—A nectarine of the very largest size and most beautiful appearance. Skin greenish white with a deep-red bloom. Ripens early in February. Freestone.

ELRUGE.—Fruit largest, roundish; skin greenish, dotted with red in the shade; flesh fine-grained, rich, and very juicy. A freestone, ripening first and second week in January.

EUGENIE.—Fruit medium size, round, with a nipple; skin yellowish, striped with brownish red; flesh greenish white, juicy. Ripens last January. Clingstone.

EARLY RIVERS.—Fruit very large, weighing 8oz.; skin rich crimson in the sun, light yellow, marked with red in the shade; flesh tender, juicy, with a Stanwick flavour. A freestone.

GOLDMINE.—Size enormous, measures 9 $\frac{1}{2}$ in. by 7 $\frac{1}{2}$ in. Skin nearly all covered with bright bronzy red; flesh beautiful cream colour, juicy, melting and sugary. A freestone, with a particularly small stone.

GRAND ADMIRAL.—Probably the latest nectarine known. Fruit fairly large, even, and well coloured, and should be an acquisition to the orchards.

GOLDONII.—A fine dark coloured variety of excellent quality.

Mrs. Pearson's Golden Queen (on Resistant Stock).

Red Hanneport on Montpellier
(Resistant Stock).

- HARDWICKE.**—Fruit large, roundish, inclining to oval; skin pale green, with a deep violet red cheek; flesh pale green; a freestone, ripening end of January.
- HUNT'S TAWNY.**—Fruit large, round; skin yellowish, with a deep purple cheek; flesh orange; particularly rich and juicy; a freestone, ripening second week in January.
- HUMBOLDT.**—A new variety, of largest size; deep yellow skin, with a very dark crimson cheek. Flesh deep orange, very rich and good. Ripens after Elruge.
- IRREWARRA.**—Fruit above medium, very highly coloured, and of a splendid flavour; a freestone, and which last year ripened on the 7th November.
- JUDD'S SEEDLING.**—Fruit very large, roundish, deep purplish, red skin with rich yellow flesh. Ripens first and second week in March, when good nectarines are not to be had.
- KONSTANZE.**—Beautiful fruit, of dark blood red colour, flavour distinct, and very agreeable. Stands cold weather better than any other variety. Early. 1s 6d.
- LUSTED'S XMAS.**—As its name implies, is a variety ripening Xmas week. In colour and appearance it much resembles Lord Napier, and may possibly be a seedling.
- LADY CARRINGTON.**—A large and very showy variety; a clingstone, with a thick, juicy flesh, and therefore splendid for market; ripe first and second weeks in January.
- LORD NAPIER.**—Fruit largest size, inclined to oval; skin yellowish, covered with vermilion; flesh whitish, very juicy, a little red at the stone; a freestone, ripening third week in January.
- LEE'S SEEDLING.**—A variety raised in Victoria; fruit large, handsome and richly flavoured; described as thoroughly hardy.
- LILY BALTET.**—Medium size, peculiar and exquisite flavour; flesh nearly white, melting, very juicy, and fine quality. Tree vigorous and very prolific. In season it should come in just after "Early Rivers." 1s 6d.
- LIPPIATT'S PROLIFIC.**—Large, highly coloured, rich and sweet; tree of upright growth, hardy, and prolific; early. 1s 6d.
- MADAME DE LA BASTIE.**—Medium size, skin purple-red, darker on the sunny side; flesh yellowish white, red near the stone, firm, melting, very juicy, sweet, well perfumed, of first quality; freestone; medium. 1s 6d.
- MRS. DR. CHISHOLM.**—A valuable nectarine, whether for size, colour, or season; fruit globular, covered with bright red; flesh whitish, very juicy and rich; freestone.
- NAPOLEON.**—Fruit large, round, rather long; skin greenish, covered with stripes of dull red in the shade; flesh greenish white; a freestone, ripening second week in February.
- NEWINGTON.**—A fine clingstone nectarine of the largest size, quite round; skin whitish green, covered with brightest red in the sun; ripens second week in January.
- NEW BOY.**—Largest size, very handsome, covered with brilliant crimson; flesh white, juicy and sugary and good flavour. Recommended by the raiser as a very valuable late variety, ripening end of February.
- OLDHAM HILL.**—Is evidently a seedling of Stanwick; resembles that variety in flavor, but is almost twice its size, and ripens fully one month later. It is not liable to crack with wet weather, and for the orchardist will prove a great acquisition.
- OLDENBURG.**—Fruit large, perfectly round; skin dull green in the shade, with stripes of dull red; flesh greenish, juicy; a freestone, ripening second week in January.
- PRECOCE DE CRONCELS.**—A new nectarine from France, described as one of the earliest, ripening before all others; fruit large, yellowish, with dark plum colour; freestone, and highly recommended. 1s 6d.
- RIVERS' ORANGE.**—Fruit medium; skin rich orange yellow, with a brown red cheek; flesh deep yellow; a freestone, ripening third week in January.
- STANWICK.**—A well known variety; fruit of the largest size; flesh greenish white, very juicy, with a rich, high flavour; a freestone, ripening middle of February.
- SYDNEY MARKET.**—A showy nectarine, always sells well; fruit large, rather pointed; skin deep purplish red; flesh white; a clingstone, ripe third week in January.
- STANWICK SEEDLING.**—A seedling from old Stanwick, which it strongly resembles. It is, however, not so liable to crack.
- SPENSER.**—A new variety from Rivers, of England, but which has not yet fruited with us.
- SHARPE'S EALY.**—A variety raised by Mr. Sharpe, of Ingleburn; of large size, very highly coloured. A splendid early variety, and a profitable market sort.
- VIOLETTE HATIVE.**—Fruit large, pale yellowish green in the shade; the sunny side covered with deep purplish red; flesh white, very melting and rich. Ripens end of January.
- WEeping.**—A highly ornamental variety, the branches drooping nearly to the ground. Fruit of good quality.
- W. C. FRIPP.**—A New South Wales seedling, brought under our notice by Mr. W. C. Fripp. Fruit very large, dark yellow, with a bronzy red cheek, flesh pale yellow; a clingstone, ripening end of February, when nectarines are valuable. Does not show any sign of cracking, a fault with so many late nectarines.
- WILKINSON'S FREE.**—A remarkably early nectarine, ripening in Baulkham Hills district early in December; fruit resembles Lord Napier in colour, size and flavour, but ripens at least 3 weeks earlier. In Sydney market it realises up to 8s per $\frac{1}{2}$ -case.
- WILKINSON'S CLING.**—Another variety from the same raiser as foregoing, who speaks of it as earlier than Lady Carrington; better colour and equally as heavy cropper.

OLIVES.

THE following varieties are the most noted in Europe, either for their oil-producing qualities or as being especially suitable for pickling.

PRICE, GRAFTED PLANTS, 2s. EACH.

BOUQUETTIER.—Fruit medium size, an enormous bearer, and produces a great yield of oil.

BLANQUETTE.—Chiefly valuable for its oil, but is also suitable for pickling.

BLANQUETTE, LATE.—Very similar to the preceding, but ripens much later.

BLACK ITALIAN.—The best variety for pickling, on account of its large size and good flavour.

GROS REDOWNOW.—A very large-fruited variety, and very highly esteemed for pickling. It also makes a splendid oil, but is not a heavy yielder.

LARGE FRUITED.—The fruit of this variety is of the very largest size, and is very similar to that sold in bottles under the name of large Spanish.

LUCCA.—From this variety the famous Lucca oil is made; an enormous cropper, and gives a very high percentage of oil.

PICHOLINE.—The very hardiest variety, doing well in any soil; fruit oblong, not large; an enormous cropper; considered one of the best for pickling.

SALOME.—A very fine variety, fruit large; very highly esteemed for pickling.

VERDALE.—An oil variety, producing a large quantity of good quality oil.

Newly Introduced Olives.

PRICE, 2s. EACH.

Recommended by the Department of Agriculture as the most profitable for oil production. The yields are in each case from 6lb. of fruit.

	Date of Gathering.	No. to lb.	Weight of Oil.
PIGALE	June 10	90	11 oz.
CORREGGIOLA	June 28	132	14
PLEUREUR	June 8	160	14
BOUTILLANE	July 3	200	11½

PEACHES.

Worked on Seedling Peach Stocks.

THIS beautiful and most profitable fruit succeeds best on a deep open loam, thoroughly drained, and with a moderately warm climate. The season of ripening is for Camden district, each variety having fruited with us.

PRICE, 1s. EACH; 10s. 6d. PER DOZEN. SPECIAL QUOTATIONS PER 100 and 1000; 50 at HUNDRED RATES.

EXTRA EARLY VARIETIES.

ALEXANDER'S.—Fruit large size, nearly globular; skin greenish white, purple in the sun; flesh greenish white, half-melting, juicy, rich and vinous. Freestone; ripe 14th December.

ADMIRAL DEWEY.—An early yellow-fleshed freestone variety that should revolutionise peach growing, coming in as it does with Briggs' Red May; fruit of most handsome appearance, deep rich yellow, almost covered with purplish crimson; flesh yellow, like Crawford.

AMSDEN'S JUNE.—Fruit very large, roundish; skin greenish, rich deep red in the sun, a little mottled; flesh greenish white, juicy; very vinous. A freestone; ripe with Briggs'.

BELL'S NOVEMBER.—EARLIEST PEACH IN EXISTENCE, ripening 7th to 12th November. In appearance it resembles Briggs' Red May, but is hardly so highly coloured. Like all early peaches, it is a partial slipstone. Its main recommendation is that it is so remarkably early, being the first peach of the season; in some time before

- Queensland Flat China, and nearly three weeks before Briggs'.
- BRIGGS' RED MAY.**—The standard of extra early peaches; fruit not largest, roundish; skin whitish green, bright red in the sun; flesh tender. Freestone.
- CHAMPION.**—New, hardy, early variety, of large size, high flavour, and claimed to be the best shipper of early varieties; a perfect freestone, creamy white with bright red cheek; handsome in appearance; a first-class market variety.
- DOWNING.**—Fruit large size, round; skin pale green, almost entirely covered with purplish crimson; flesh greenish, tender, juicy, with a high flavour. A partial freestone. We consider this about the best of this class. It ripens 10th December.
- DUCHESS OF CORNWALL.**—An early peach, ripening with "Alexander," medium size, freestone, skin creamy yellow with a red striped cheek; melting and delicious, with a distinct nectarine flavour; grows well and bears freely. "The Gardener's Magazine," of 4th August, 1900, says: "A finer flavoured peach could not be described, and we shall expect to find 'Duchess of Cornwall' taking a leading position among early varieties. Price, 1s 6d."
- EDWARD VII.**—Another remarkably early peach, said to ripen early in November, but has not yet fruited with us.
- FLAT CHINA.**—This peach is now almost superseded by the American varieties in all but the districts near the coast. Fruit flat. Skin pale yellowish white, with a pink cheek.
- GOVERNOR RAWSON.**—Another remarkably early peach, coming on the market early in November. It is a perfect freestone, fairly large in size, and of a deep red colour. Like all extra early peaches, it comes into bloom long before the frosts are gone, but, being of such a hardy and robust habit, the fruit is not affected by moderate frosts. The raiser of this variety claims to have had it fruiting for the past three years, and pronounces it the earliest, best, and most profitable peach in cultivation, and, having every confidence in the raiser, we place this variety before the public. Price, 2s each.
- GOVERNOR GARLAND.**—Fruit large; skin pale greenish white, almost covered with rosy red; flesh whitish, fairly firm, very juicy, rich and vinous.
- HIGH'S EARLY CANADA.**—This peach ripens a week before Briggs', and is in every respect superior to it; fruit very large; skin yellowish white, with broken stripes and markings of crimson; flesh greenish, tender and melting.
- SNEED.**—This peach comes to us from America, with the reputation of ripening a fortnight before Briggs'.
- SURPASSE AMSDENS.**—Large, roundish, deep glowing red colour; a perfect freestone, ripening a few days in advance of Amsden's June. Specially recommended by Pomological Society of France. 1s 6d.
- TRIUMPH.**—It bears a strong resemblance to a good specimen of Crawford, same large size, handsome appearance, and rich flavour. Added to this, it ripens within a day or two of Briggs'. We very strongly recommend this fine peach.
- ULATIS.**—A white-fleshed peach, coming in before Hales' Early and after Briggs'. Colour bright red. Perfect freestone, and a good carrier.
- WATERLOO.**—Fruit large; pale yellow, covered with purplish red; ripens here as early as the last week in November, but, occasionally varying very much in its season of ripening. Never later than Briggs'.

SECOND EARLY VARIETIES.

- BRADDOCK'S.**—Fruit large; skin brownish red nearly all over; flesh yellowish white, very juicy; its season—just succeeding Briggs'—will always get it top prices; an enormous bearer.
- CAMDEN SUPERB (DEVLIN'S RED).**—This peach originated at Camden Park, and is the very earliest cling we have; a most profitable market sort; skin almost covered with deep red; ripe by Christmas.
- EARLY BEATRICE.**—Fruit medium size; straw-coloured, with marbled-red cheek; flesh very rich, fine vinous flavour; a freestone, ripening at Christmas.
- EARLY NEWINGTON.**—Fruit large size, round; skin light yellow, covered with deep purple in the sun; flesh firm, very juicy. A clingstone, ripening end of December.
- EARLY RIVERS.**—A most handsome peach; skin a waxen white, with a clear carmine cheek; flesh whitish; third week in December: freestone.
- HALES' EARLY.**—Fruit medium size, roundish; skin pale yellowish white, deep red in the sun; flesh tender, very juicy; freestone, ripens with Early Rivers.
- LADY INGOLD.**—Yellow-fleshed peach; ripening immediately after Hales' Early; fruit of large size, very even; skin rich yellow, crimson in the sun; a freestone.
- RUBY RED.**—A clingstone, ripe early in January; a heavy and constant cropper, and in the market realises 50 per cent. over other peaches in at same time. It is wonderfully firm, having been picked and handled for seven or eight days without any injury.
- WIGGINS.**—A fine peach, ripening here Christmas. Always of good size, fair amount of red. Valuable for its season; freestone.

MIDSEASON VARIETIES.

- AMELIA BERTA.**—Equal in size and appearance to Elberta, and ripens between Hales' Early and Crawford. Yellow freestone, exquisite flavour.
- BELLEGARDE.**—Fruit large, roundish; skin pale yellowish green, almost covered with deep purple; flesh rather firm and rich. Freestone. Ripens third week in January.

- CAMDEN EXCELLENT.**—Fruit large, round; skin pale yellow in the shade, deep red in the sun; flesh tender, with a rich flavour. Freestone, ripening end of January.
- CRIMSON GALANDE.**—Fruit medium to large, roundish; skin yellowish white, covered with blackish purple in the sun. Freestone, ripening 15th January.
- CHRISTIANA.**—Fruit of large size; skin pale yellow, with a rich red in the sun; flesh yellowish, juicy, with a most delicious flavour; succeeds Elberta.
- DR. HOGG.**—Fruit large, globular; skin pale lemon colour, dotted and splashed with deep crimson. Freestone, ripening first week in January. The tree is liable to overbear.
- DUKE OF EDINBURGH.**—Fruit large; skin whitish yellow, with a rich red cheek; flesh tinged with yellow, with a brisk flavour; a freestone; ripe second week in January.
- EARLY ALBERT.**—Similar to Early Rivers, but a fortnight later. Flesh white to the stone, of delicious flavour, invaluable for home use. Ripe second week in January.
- EARLY CRAWFORD.**—Fruit very large, oblong; skin rich yellow, with a fine red cheek; flesh yellow; in great demand for jam or canning; a freestone; ripe third week in January.
- ELBERTA.**—This still remains the very best peach of its season, its great beauty and size commanding top prices; freestone; ripens end of January.
- FOSTER.**—Fruit large size, sides flattened; skin a deep orange red; flesh yellow, very rich and pleasant; a grand freestone, ripening a few days after Crawford.
- GRAND ADMIRABLE.**—Fruit very large, with a distinct nipple, roundish; skin a fine rich orange, with a rich red cheek in the sun; flesh yellow, firm, very juicy, and good; a very fine clingstone, ripening last week in January.
- GEORGE IV.**—Fruit large size, quite round; skin pale lemon colour in the shade, carmine in the sun; flesh whitish yellow; a freestone, ripe first week in January.
- HAINES' EARLY.**—Fruit large size, roundish; skin brownish yellow, deep crimson in the sun; flesh whitish, very juicy; a freestone, ripening 20th January.
- JUPP'S WONDER.**—A valuable and very showy clingstone, ripening towards the end of February; skin a deep rich crimson, and a very free bearer.
- KIA-ORA.**—A seedling from Elberta. Identical in size and general appearance of the fruit with that most esteemed of all yellow-fleshed peaches, but of superior flavour; a much better cropper, and hardier tree.
- LOUIS GROQUET.**—A variety specially recommended to come in after Hales' Early; fruit large and highly coloured; flesh white, fine, sugary; freestone.
- LEOPOLD 1st.**—Fruit large size, roundish; skin pale yellow, splashed with carmine; light red in the sun; flesh pale yellow; freestone, ripening third week in January.
- MALTESE.**—Fruit large size, round; skin yellowish, covered with fine red in the sun; a freestone, ripening 10th January.
- MOUNTAIN ROSE.**—Fruit of largest size; skin whitish yellow, almost entirely covered with clear bright red; flesh whitish, tender, and very rich; splendid freestone, ripens second week in January.
- MUIR.**—Introduced from America as the very best drying peach; contains much sugar and very little water; freestone, ripening about a week after Lemon Cling.
- NEWINGTON.**—Fruit largest size, quite round; skin pale yellowish white, covered with deep crimson in the sun; flesh yellowish white, firm, of grand flavour.
- PRINCESS OF WALES.**—Fruit medium size, distinctly pointed; skin straw colour, and a rich red cheek. A freestone, and one of the most highly-flavoured peaches.
- POWELL'S BEAUTY.**—A splendid peach, of Elberta type. Our reason for introducing it is, that in some sections it is considered an even better all-round peach than Elberta.
- RIVERSIDE RED ELBERTA.**—Something unique in peaches. This magnificent peach is a sport from the well known Elberta. The fruit is large, oblong; skin almost smooth, and brilliantly coloured (far higher colour than Elberta). The tree is unlike any other peach tree; it has very long and narrow leaves (often 9 inches and about $\frac{3}{4}$ -inch wide), short jointed wood, which generally commences to branch after it has grown six inches. It is an easy tree to prune, and is less subject to curl leaf than Elberta. When loaded with its highly coloured fruit is a beautiful sight; and is a good cropper.
- ROYAL GEORGE.**—Fruit of large size, quite round and even; skin pale yellowish white, almost covered with fine rich red, with a total absence of down; flesh whitish, very tender and juicy; a freestone, ripening end of January.
- ROYAL GEORGE, CLING.**—Fruit large size, quite round; skin light yellow in the shade, almost covered with fine red in the sun; flesh whitish, firm, but melting, with a rich vinous flavour; a clingstone, ripening 20th January.
- ROYAL CHARLOTTE.**—Fruit large; skin pale greenish white, with a deep marbled red cheek; flesh whitish, pale red at the stone; freestone, ripening end of January.
- ROBERT STEWART.**—Fruit large size, round, a little pointed; skin whitish yellow, with a brilliant red cheek; flesh very tender, with a rich, spicy flavour; ripe end January.
- REINE DES VERGER'S.**—Fruit medium, quite round; almost entirely covered with pur-

- plish crimson; flesh white, deep red at the stone; freestone, ripening last of January.
- SHANGHAI.**—Fruit frequently weighing eight ounces, oblong, with a distinct swollen point; skin creamy white, with sometimes a light crimson cheek; flesh whitish, very juicy, with a rich flavour; a clingstone, ripening third week in January.
- STARK.**—A variety from America, where it is claimed to be an improved Elberta in every way. Being very firm fleshed, it can be packed to travel almost any distance, opening up in perfect order. Flesh deep apricot yellow as in Elberta, but skin almost entirely covered with rich deep red; freestone, ripening with Elberta. 1s 6d.
- SHANGHAI SEEDLING, or RED SHANGHAI.**—A splendid form of the favourite Shanghai, but showing a beautiful red cheek, equal in size. The tree is not dwarf like Shanghai, and is simply an enormous bearer. Ripens same time as Shanghai.
- SHANGHAI FREESTONE.**—A most valuable seedling of Old Shanghai. It is a perfect freestone, quite as large as its parent, and instead of dull, dingy colour of Shanghai, is a pale yellow; splashed and washed with brilliant bright red. A most striking variety for market.
- STIEME'S SEEDLING.**—Fruit of large size, oval; skin creamy white, faintly streaked with red; flesh yellowish-white, deep red at the stone, very juicy, of fine flavour; freestone.
- UP-TO-DATE.**—The flesh is fine grained, and of most delicious flavour. It has little or no colour next to the stone, a point much sought after by canning factories. Possessing so many good qualities, we can safely predict for it a great future as a market and canning peach. Ripens with Elberta. Raised in New Zealand, and foregoing is the raiser's description. 1s 6d.
- WHEATLAND.**—A magnificent yellow-fleshed peach, after the type of Elberta, rather round; ripens end January to first week in February.

LATE VARIETIES.

Comprising all those ripening after 1st February.

- AKARANA.**—Another New Zealand seedling, ripening in February; fruit large, round and highly coloured; flesh sweet, sugary and peachy; a sure cropper.
- BALDWIN'S LATE.**—Fruit large size, oblong; skin greenish, with a dull red cheek in the sun; flesh firm, juicy, and for so late a peach, of good flavour; a freestone.
- BILYEUS LATE.**—Fruit of large size, roundish; skin white, with a bright red cheek; flesh white, firm, very rich and juicy. Comes in about the end of February.
- BARRINGTON.**—Fruit large; skin a fine clear white, with a rich crimson cheek; flesh yellowish white; ripens middle of February; a constant, but not a heavy bearer.
- BONANZA.**—Fruit of large size, round and even; skin almost white in the shade, with a fine carmine cheek; flesh white; ripens first week in March.
- BRANDYWINE.**—A splendid yellow flesh freestone, strongly resembling Early Crawford; ripening, however, is at least three weeks later than Crawford.
- CHAIR'S CHOICE.**—A very large, late, yellow-fleshed freestone peach, of the very finest quality; flesh deep orange. A splendid peach, ripening second week February.
- CAMDEN GOLDEN.**—Fruit of largest size; skin clear golden color with a bright red cheek; flesh yellow, firm, but melting; very rich and sugary. Ripens end of March. Can be recommended as one of the best late peaches.
- CALIFORNIA.**—An enormous yellow-fleshed clingstone, rivalling that favourite, "McDevitt's Cling." California is a heavy and constant cropper, and sure to be a prize-taker wherever exhibited. Fruit very large, round, having heavy purplish cheek where exposed; flesh deep rich yellow, of exquisite flavour. Splendid for bottling. Price, 1s 6d.
- COMET.**—Fruit of largest size, round, with a slight point; skin a fine yellow, covered with deep dark red in the sun; flesh deep yellow, a little red at the stone; very juicy and melting, with a highly vinous flavour; a freestone, ripening last two weeks in March.
- EMMA.**—Said to be superior to Elberta, and should ripen in this State first or second week in February. Perfect freestone, highly coloured.
- EMERT'S LATE.**—A magnificent freestone, ripening end of February; of handsome appearance, and ripening at a time when good peaches are scarce, it will prove invaluable.
- FULTON.**—Fruit large size, roundish; skin very pale yellow, covered with a deep red bloom; flesh white, firm, rich, and juicy; clingstone; ripening third week in March.
- GLOBE.**—Fruit very large, quite round; skin a bright gold colour, with a deep crimson cheek in the sun; flesh tender and melting, with a rich and spicy flavour; a freestone, almost as good as Elberta, and ten days later.
- GOLD DUST.**—It is a large, solid, yellow-fleshed cling, of very handsome appearance, coming in, say, a week before Lord Palmerston. Gold Dust we can recommend.
- GOLDEN EAGLE.**—Somewhat after the style of Lady Palmerston. It is a heavy cropper, above medium size; good color; yellow-fleshed. Ripe second week in February.
- HAWKESBURY CHAMPION.**—A peach of recent introduction, and extremely valuable, first, for its season, ripening as it does at the end of March; also for its size and beautiful appearance.

ALL TREES FUMIGATED BEFORE SENDING OUT.

- HENRIETTA.**—This is the peach which takes in America the place Yellow Italian does with us; it is a heavier bearer than Italian, but not quite so large. A most handsome and profitable variety, ripening a fortnight before Italian.
- HEATH.**—Fruit very large, oblong; skin cream color, with a faint blush or tinge of red in the sun; flesh greenish white; very tender and melting, exceedingly juicy, with the richest, highest, and most luscious flavour. A clingstone, ripening first week in March.
- LA FRANCE.**—A valuable variety from France, specially named for market by Pomological Society there. Fruit very large, dark carmine red; flesh white, melting, juicy, and of excellent flavour; should ripen during February.
- LADY PALMERSTON.**—Fruit medium to large size, quite round; skin greenish yellow, with a deep red cheek; flesh pale yellow, tender; a freestone, ripening 20th February.
- LORD PALMERSTON (PAVIE DE POMPONE).**—Fruit of very large size, quite round, skin creamy white, with a rose red cheek; flesh white; a clingstone.
- LATE ADMIRABLE.**—Fruit very large, roundish oval; skin pale yellowish green, with a pale red cheek; flesh greenish white; a clingstone; ripening second week in March.
- LATE CRAWFORD.**—Fruit above medium size, roundish; skin deep yellow, mottled with dark red; flesh pale yellow. A good Peach to fill the gap in second and third week in February.
- LEMON CLING.**—Fruit medium to large, oblong; skin clear lemon yellow; a tinge of red in the sun; flesh clear yellow; a clingstone, ripening first week in February.
- LOVELL.**—Originated in California; largest size, perfectly round; yellow freestone, of very rich flavour, and much valued for table or bottling; also dries well; ripe during February; a good cropper.
- MAORILAND.**—A seedling of largish size and showy appearance; a perfect freestone, ripe middle March; flesh pale; invaluable to growers in cool climates, to meet the February-March market.
- MAHUTA.**—A seedling raised by Hay and Son, Auckland, who describe it as a fruit of largest size, and most handsome appearance; a perfect freestone, ripening February and March. deep golden yellow flesh, somewhat resembling Foster.
- McDEVITT'S LATE CLING.**—Since introducing this peach, we have had it fruiting in poor land, and can conscientiously say that we consider it "the finest Peach of its class yet introduced." Its size is enormous, good even shape, and in colour is beyond anything we have seen, being a deep rich yellow, almost entirely covered with dark purple, almost black. It is in perfection about third week in February, when good peaches are not to be had.
- NICHOLL'S ORANGE.**—Fruit of large size, quite round; skin deep orange, with a red rich cheek in the sun; flesh deep yellow, rather firm; a favorite canning Peach, on account of the absence of red at the stone. A clingstone, ripe 20th February.
- OSCEOLA.**—Large golden yellow, with red cheek; flesh orange yellow; sugary and buttery, with flavour of apricot; a grand variety, ripening February.
- ORANGE FREE.**—A freestone variety, much resembling its namesake, Orange Cling, and ripening about same season. Very highly recommended by American Pomologists.
- PRINCE OF WALES.**—Fruit very large; skin very downy, green in shade, but deep red in the sun; flesh greenish white; a freestone, ripening first week in March.
- PRINCESS ROYAL.**—Fruit very large size, round, a little pointed; skin creamy white in the shade, deep red in the sun; flesh greenish white, firm, but melting; very rich. A clingstone, ripening 20th February.
- PRIZE.**—A large yellow-fleshed peach of type of Brandywine; very highly coloured, and, coming in first and second week in February, should be a valuable variety.
- PICQUET'S FREE.**—Large to very large, round, yellow, with red cheek; flesh yellow, sweet, rich and fragrant; freestone; ripens second and third week in February.
- RED JUNE.**—Fruit large size, a little inclined to oval; skin almost covered with fine, dark red; flesh greenish white, firm; moderately juicy; clingstone; ripening April.
- RUNYON'S ORANGE.**—Fruit of largest size, quite round; skin deep orange in the shade, blackish crimson in the sun; flesh deep orange, with that absence of red at the stone so necessary in a canning peach; a clingstone, ripening 25th February.
- RED ITALIAN.**—Free; fruit very large, round, with a very slight point; skin rich yellow in the shade, deep crimson in the sun; flesh deep yellow, fine-grained, very tender, luscious; juicy, with a very rich flavour; a freestone, ripening 10th March.
- RED ITALIAN CLING.**—A variety of Old Yellow Italian, ripening with that variety, but differs from its parent in that it is rounder. Its colour is a deep, rich red.
- ROSER.**—One of the hardiest and best late-peaches ever introduced; a perfect freestone of the best quality; the fruit is large and somewhat oblong, with a beautiful flush.
- RUDING'S LATE.**—White, with bright red cheek, juicy, and highly flavoured, very productive; a regular and heavy bearer; ripe third week in February.
- SALWAY.**—Fruit medium size, round, skin yellow, fine red in the sun; flesh fine yellow, firm, juicy, with a flavour peculiar to this peach alone; one of the best for bottling or canning; freestone, ripening second week in March.

SHIPLEY'S LATE RED.—Ripens at the end of February, and is a heavy and regular cropper; fruit large size, roundish; skin yellowish white, with a blush-red cheek; flesh whitish.

SEA EAGLE.—Fruit very large; skin pale yellow, almost covered with bright, rich red; flesh pale yellow, almost white; ripening second week in February; freestone.

STUMP THE WORLD.—Fruit of enormous size, inclining to oblong; skin greenish white in the shade, dark red in the sun; a splendid preserving peach; a clingstone; ripening third week in February.

SEA EAGLE IMPROVED.—As the name implies, this is an improvement of the well known Sea Eagle. It is rather more highly coloured than the old form, and, from our experience of both, a much heavier cropper.

STEVENS' RARERIPe.—A beautiful white freestone; ripe with the last of Late Crawford, and continuing for three weeks.

SUSQUEHANHA.—Fruit large in size, very handsome, almost globular; skin deep yellow, almost covered with rich red in the sun; flesh deep yellow, fine-grained, tender, juicy, and melting; a freestone, ripening second week in February.

WONDERFUL.—Fruit of largest size, rather oblong; skin golden yellow, with a brilliant carmine cheek; flesh yellow to the stone; very tender and juicy, with a very rich and luscious flavour; a splendid freestone, ripening about 20th March.

YELLOW ITALIAN CLING.—Fruit of largest size, oblong, pointed, one-sided; skin deep orange, with a rich red cheek; flesh deep yellow, firm, very meaty, juicy, very vinous; ripens here middle of March, and will hang for two weeks.

PEARS.

THE demand for Pears is a growing one, and, although longer in coming into bearing than most trees, the high prices which are always obtained for good samples, and the great age to which the trees attain, combine to make them the most profitable crop grown. A deep rich soil, or a well-worked clay, is essential for the finest fruit, and some shelter from prevailing winds, otherwise the pear needs less attention than most fruits. Worked on Seedling Pears.

PRICE, 1s. EACH; 10s. 6d. DOZEN. SPECIAL QUOTATIONS PER 100 AND 1000; 50 AT HUNDRED RATES.

EARLY VARIETIES.

BEURRE D'AMANLIS.—Fruit large, obovate; skin dull yellowish green, with a pale, brown-red cheek; flesh yellowish, buttery, melting and rich; ripe end of January.

BEURRE DE L'ASSUMPTION.—Fruit large, irregular in shape; skin fine yellow, marbled with red in the sun; flesh white, melting, juicy; ripens middle of December.

CITRON DES CARMES (MADELINE).—Fruit medium, obovate, tapering; skin yellowish green; flesh white, with a delicate perfumed flavour. The earliest, ripening early December.

CLAPP'S FAVOURITE.—Fruit very large, obtuse pyriform, strongly resembling Bartlett in shape, but without the stinging flavour of that variety; a very handsome early pear.

DEARBORN'S SEEDLING.—Fruit below medium, roundish pyriform; skin clear, light yellow; flesh white, very juicy and melting, sweet and sprightly; a grand, very early pear.

DOYENNE D'ETE.—Fruit small, roundish obovate; skin yellow, shaded with bright red; flesh white, melting, juicy. An early bearer, ripening middle of December.

JARGONELLE (ENGLISH).—Fruit large, pyriform; skin smooth, greenish yellow, brown in the sun; flesh yellowish white; tree a pendulous grower, is not liable to decay at the core; ripens early December.

JARGONELLE (FRENCH).—The fruit of this variety is exactly similar to the preceding, except that it requires to be gathered early and ripened inside, otherwise it will decay at the core; tree a strong, upright, vigorous grower.

LAWSON (COMET).—Fruit largest, obtuse pyriform; skin bright yellow; flesh juicy, and very rich; on account of its great beauty, heavy crops, and, above all, freedom from leaf disease, should become very popular in the warmer districts.

ROUSSELET STUTTGART.—Small to medium, skin yellow with bright red cheek, very juicy and sugary; can be allowed to ripen on the tree.

WILLIAMS' BON CHRETIEN (Bartlett).—This pear is too well known to need any description, and is being largely planted for canning, marketing in a green state, and home use. The most popular pear we have.

WINDSOR.—Fruit large, bell-shaped; skin lemon yellow, with a tinge of red; flesh yellowish white, rather coarse, with an abun-

dance of sweet, watery juice. Ripe at Christmas.

WILDER.—Perhaps the earliest pear. Fruit medium size, bell-shaped, skin pale yellow, with a brown red cheek; flesh tender, fine-grained, juicy, vigorous grower.

MIDSEASON VARIETIES.

BEURRE DU BUISSON.—This is one of the best flavoured pears in cultivation, coming in after "Marie Louise" is over, and the fruit grows to a great size under favourable circumstances, measuring to 4 inches in length, and 2½ inches in diameter. The shape is obtuse, pyriform, colour of skin pale greenish yellow on the shaded side, sometimes marked with red where exposed to the sun, the whole surface covered with russet spots and veinings. 1s 6d.

BEURRE FONGUERAY.—Large and handsome, of very best quality, heavy cropper. First-class certificate from Royal Horticultural Society. 1s 6d.

BEURRE BOSC.—Fruit large, pyriform; skin smooth, dark yellow, covered with streaks of cinnamon russet, flesh white, melting, very buttery, with a rich, delicious flavour; ripens in March, and is much improved by keeping.

BEURRE DIEL.—Fruit large; skin lemon yellow, with marblings of russet; flesh yellowish white, a little coarse at the core, but rich, sugary, half melting; a very regular cropper; may be picked end of March, and will keep inside for two months.

BEURRE DE CAPIAMONT.—Fruit medium size, long, turbinate; skin smooth, clear yellow, with a light cinnamon red cheek; flesh fine-grained; ripe early autumn.

BEURRE HARDY.—Fruit large, skin greenish, covered with light russet; flesh buttery, melting, juicy; a fine, free-growing, productive pear, ripening all autumn.

BEURRE BALTET PERE.—A pear received by us from Belgium. It comes with the very highest recommendations as a mid-season, medium-sized dessert pear.

BEURRE GOLDEN.—A valuable mid-season variety, doing remarkably well on the coastal lands of this State; very highly coloured and good flavour.

BEURRE SUPERFINE.—Large and delicious melting pear; one of the best for dessert; tree hardy and prolific bearer.

BROCKWORTH PARK.—Fruit large, obtuse, pyriform; skin smooth, pale yellow, flushed with red in the sun; flesh white, buttery, melting, very juicy, vinous and rich.

CHINA (SAND) PEAR.—Fruit very large; skin clear lemon yellow, with a little red in the sun; tree a vigorous and very healthy grower, and an early bearer; in flavour something like a quince; only valuable for cooking.

COMTE DE LAMY.—Fruit medium, oblate pyriform; skin clear yellow with a brownish

red cheek and patches of russet; flesh white, fine-grained, buttery, melting, and sweet. Very good, ripening end March and early April.

DOYENNE DU COMICE.—Large, rich, and melting; fruit medium, oblong or pyriform; skin clear yellow, covered with a deep rich red in the sun; flesh fine-grained, rich, melting, and juicy. Well adapted for the warmer districts.

DOYENNE BOUSSOCK.—Large, handsome and melting; bears profusely on quince stock, and is highly recommended.

DESIRE CORNELIS.—A variety ripening fairly early in season; that should be an acquisition.

FERTILITY.—A variety raised by Mr. Rivers, ripens same time as Louis Bonne of Jersey; large fruit of brilliant colour and high flavour. The tree is a vigorous and healthy grower, and most valuable for market.

FLEMISH BEAUTY.—Fruit very large, obtuse, pyriform; skin pale yellow, covered with reddish brown in the sun; flesh yellowish, juicy, melting; requires to be gathered before it parts readily from the tree; and ripens inside during March and April.

GARBER'S HYBRID.—This is another of that class of pears which is becoming immensely popular in America. Enormously productive; bears at three years from the nursery, and they average half a pound each; it took 80 of them to make a heaped bushel.

GREGOIRE BORDILLION.—Large fruit, somewhat resembling Duchesse d'Angouleme; first quality, hardy and prolific.

HOWELL.—Fruit large, light waxen yellow, heavy bearer, following "Williams' Bon Chretien," a first-class market pear, and should be largely grown.

KEIFFER'S HYBRID.—Fruit medium size, roundish oval; skin yellow, orange in the sun; flesh whitish, a little coarse; an enormous and early bearer. Ripens during April.

IDAHO.—Fruit is very large and handsome, skin golden yellow, streaked with russety spots; flesh melting, juicy, with a sprightly vinous, delicious flavour.

LE LECTIER.—A cross between Bartlett and Bergamont Fortune. Fruit of large size; true pyriform; skin grass-green, mottled with dark green; very juicy; ripens last of April, when pears are scarce.

LE CONTE.—A pear of recent introduction, but which has already fruited with us. Of fairly large size; skin very smooth and clean, of a clear lemon yellow. Flesh smooth in texture, very melting, with a rich vinous flavour.

LAFFER'S BERGAMONT.—Said to be cross between "Winter Nells" and "Williams' Bon Chretien." It is a first-class Bergamont, medium to large size; good flavour, rich, melting, juicy; ripe in March. 1s 6d.

LOUISE BONNE OF JERSEY.—Fruit large, oblong, pyriform; a little one-sided; skin glossy, pale green in the shade, covered with brown red in the sun; flesh greenish white, very juicy and melting, with a rich and excellent flavour. Ripens end March.

LUCY GRIEVE.—Fruit medium, oblong, obtuse, pyriform; skin clear, deep lemon yellow; few russet dots; flesh moderately firm, fine grained, tender, juicy. Ripens in April.

MARGUERITE MARILLAT.—A Continental variety, which proves a grand addition. Fruit large, showy, with sugary, aromatic, luscious flavour. Handsome in colour and shape, and one of the finest of its season. Ripens in February.

MAGNATE.—Raised by T. F. Rivers, England; fruit very large; skin rich yellow in the shade, bright crimson in the sun; flesh yellow, very fine, tender, melting.

MARIE LOUISE.—Fruit medium, oblong, pyriform; skin fine deep yellow, sprinkled with russet in the sun; flesh white, exceedingly buttery and melting. One of the finest autumn pears, but not a heavy bearer.

MADAME TREYVE.—Fruit medium size; skin pale yellow, with a red cheek in the sun; dotted with minute brown dots; flesh tender, melting. Ripens in March.

MARIE MARGUERITE.—From France, where it is strongly recommended as a high-class and very profitable dessert fruit, and, when ripe, of a lovely clear gold colour.

ORANGE BERGAMONT.—Largely sold in Sydney, and which comes from Tasmania, where it is considered their best autumn pear; a very handsome, high-flavoured fruit.

POIRE DU BERRIAYS.—Medium, roundish obovate; skin golden yellow, flesh melting and juicy; good market variety.

PACKHAM'S TRIUMPH.—All who have seen this splendid fruit have appealed to the raiser to propagate and put on the market; but it is only after four years' thorough testing that Mr. Packham consents to dispose of bedwood to us. To fruit exhibitors it is not necessary to describe this variety; nor to the public generally, who assemble at annual Sydney shows, is it necessary to more than remind them of that attraction, "The bunch of pears from Molong." We are offering one-year maiden trees, on pear stock; and as supplies of this **STERLING NOVELTY** are not too plentiful, we would advise placing orders early. 1s 6d each.

PITMASTON DUCHESSE.—Fruit very large; skin fine yellow, with light russet near the stalk; flesh yellowish white, melting, buttery, and juicy. Ripens late autumn.

SOUV. DE PRESIDENT CARNOT.—A new French pear. Fruit large and handsome; flesh very fine, juicy, delicious flavour. Promises to be a really good thing. In season March and April.

SECKLE.—Fruit small, regularly formed, obovate; skin dull, yellowish green, with a lively russet-red cheek; flesh whitish, very buttery; considered in America the richest and most exquisitely flavoured pear known. Ripens early in March.

TRIOMPHE DE VIENNE.—Large, skin russety, good flavour; free brearer.

URBANISTE.—Fruit large; skin smooth, pale yellowish, with grey dots and a few russet streaks; flesh white, buttery, very melting and rich. Ripens in March.

VICTOR HUGO.—A grand new pear, ripening in March. Fruit large, pyriform, and very showy; flesh tender, melting, juicy, and richly flavoured. Tree remarkable for its robust, hardy, and symmetrical growth. One of the best varieties of recent introduction.

WHITE DOYENNE.—Fruit almost large; skin smooth, sometimes a fine red cheek; flesh white, fine-grained, very buttery, melting, rich and delicious. Ripens in March, and, if carefully handled, may be ripened inside till end of May.

WINTER VARIETIES.

BAILEY'S BERGAMONT.—Fruit medium size, in shape like Gansell's, but a month later, and more certain cropper; a variety which should prove more profitable than Gansell's for these reasons; ripens end of April.

BERGAMONT ESPERANCE.—Fruit large, obovate; skin deep clear yellow, with rich crimson in the sun, and thickly covered with small brown dots; flesh firm, yellowish white, rich and vinous; a noble pear.

BERGAMOT (GANSSELL'S).—Fruit large, roundish, obovate, flattened; skin yellowish brown, much covered with russet; flesh granular, white, with an abundance of rich, aromatic juice; somewhat a shy bearer in some localities; ripens in March.

BELLE GUERANDAISE.—A very fine French variety; very large, oblong, attaining one foot in circumference; flesh fine, juicy, melting, of very good flavour. In season April to May.

BEURRE PICQUET.—Medium size, of peculiar yet exquisite flavour; flesh nearly white, melting, juicy, and very fine quality; tree vigorous and prolific.

BON CHRETIEN BONNAMOUR.—Fruit large, skin smooth, and slightly tinted on sunny side; flesh fine, melting, juicy, sugary, well perfumed, and of best quality; tree vigorous and prolific bearer.

BROOMPARK.—Fruit medium size, roundish; skin smooth, clear yellow, with a brown red in the sun; flesh whitish, very melting, rich and vinous; ripens April to May.

BEURRE CLAIRGEAU.—Fruit largest, with unequal sides; skin warm yellow, shaded with orange and crimson, thickly covered with russet dots; flesh yellowish, a little granu-

lar, buttery, with sugary, perfumed, vinous flavour; ripens March to June.

BEURRE EASTER.—Fruit very large, somewhat square in shape; skin greenish yellow, with sometimes a brownish red cheek; flesh white, very fine-grained; one of the very best late pears, ripening July and August.

BEURRE RANCE.—Fruit medium size, obtuse pyriform; skin dark green, with numerous russet specks; flesh greenish white, with a rich, sweet juice of excellent flavour. Requires a warm situation to bring it to perfection.

BEURRE d'ANJOU.—Large, melting and juicy. One of our best export varieties.

CATILLAC.—Fruit very large, broadly turbinate; skin yellow, with a brownish red cheek; flesh firm and only fit for cooking, for which it is admirably suited; sometimes called Flat Baking.

CHAUMONTEL.—Fruit large pyriform; skin a little rough, yellowish in the shade, rich deep red in the sun, with many russet dots; flesh buttery and melting.

CONFERENCE.—Fruit large, pyriform; skin very smooth and shining, with occasionally a sprinkling of russet; flesh a most beautiful shade of salmon pink; very juicy and melting, with a high vinous-flavour.

DOYENNE DE MERVILLE.—Fruit medium, roundish; skin a greyish yellow; flesh white, fine-grained, very buttery, melting, rich and delicious.

DR. NELIS.—Fruit medium size, roundish, pyriform; skin greenish yellow, a little red in the sun, with a little russet; flesh whitish, juicy, melting, slightly vinous.

DURANDEAU.—Fruit medium, elongated, narrowing to the stalk; skin dull green, with a slight brown-red cheek; flesh firm, whitish, very rich; ripens early winter.

ELIZABETH COLE.—Fruit above medium; skin green, partly covered with yellow; flesh very tender, buttery, with a rich and honeyed sweetness; ripens about April.

FAME.—A new pear from United States, where it has the reputation of being extremely hardy, and a constant cropper; fruit is of largest size, fine russety brown; is often quite seedless, and when stored is very juicy, melting and rich.

FORELLE or TROUT PEAR.—Medium sized, handsomely speckled, melting, and good; colour of skin most attractive.

GLOU MORCEAU.—Large obovate; skin yellow; flesh buttery, melting, and very juicy, of best dessert quality.

JOSEPHINE DES MALINES.—Fruit medium size, roundish, oblate; skin pale greenish yellow, netted and patched with russet; flesh pinkish white, juicy, melting, sweet, with a delicate aroma; in perfection, if kept inside till July.

JAPANESE GOLDEN RUSSET.—A cooking pear, remarkable for early bearing.

KNIGHT'S MONARCH.—Fruit medium size, roundish; skin yellowish green, with many brown and grey russet specks; flesh yellowish, melting, rich and juicy. A valuable pear, succeeding well both in cold and warm districts.

LINCOLN CORELESS.—A new pear, of first quality; very large, good shipper, and exceedingly handsome. It is also claimed that the variety is coreless and seedless.

L'INCONNUE.—Fruit medium; skin light yellow, netted with russet; flesh whitish, juicy, melting, very sweet. A fine very late pear, ripening end of July.

MADAME COLE.—Fruit medium size, obtuse, pyriform, skin yellow, almost covered with brown russet; a dessert pear of the highest excellence, ripening from May to July.

PACKHAM'S LATE.—Another variety from Mr. Packham, who speaks in glowing terms of this, his latest production. Fruit fairly large; heavy cropper, and promises to rival Triumph. Price, 2s.

P. BARRY.—Fruit very large, elongated, pyriform; skin deep yellow, nearly covered with a rich golden yellow; flesh whitish, fine, melting; ripens middle of June.

PRINCESS.—A seedling from Louise Bonne of Jersey; in size and general appearance it much excels its excellent parent; the flesh is particularly melting, with a rich, refreshing flavour, and will easily keep till July.

PRESIDENT D'OSMANDVILLE.—A new French pear of considerable merit. In flavour and general appearance strongly resembling that fine pear, White Doyenne.

UVEDALES ST. GERMAINS (Large Baking).—An enormous pear, sometimes weighing three pounds. Valuable for its cooking qualities. If carefully gathered, will keep all winter.

VICAR OF WINKFIELD.—Fruit large size, long, pyriform; skin smooth, pale yellow, with occasionally a brown red cheek; flesh greenish white, juicy, sometimes buttery, with a vinous sprightly flavour. Ripens May and June.

WINTER COLE.—Raised in Victoria from Winter Nelis, which it rather resembles. Fruit medium size, almost round; skin pale yellow, with a little russet; flesh yellowish, fine-grained, buttery; one of the finest and richest pears.

WINTER BARTLETT (TRUE).—We are now offering trees of this variety from wood procured from the raiser in California. All know the famed "Williams" pear, and in the above we have a duplicate of the old favourite, but ripening at least three months later. No further recommendation is necessary. Price, 2s.

WINTER NELIS.—Fruit medium size, roundish, obovate; skin yellowish green, covered with russet in the sun; flesh yellowish white, fine-grained, buttery, and very melting, abounding with juice of a rich, saccharine, aromatic flavour; in perfection in May.

Dwarf Pears on Quince Stock.

HAVING imported the variety of Quince used in England as a stock for dwarfing, we are offering a selection of those Pears which succeed as dwarfs.

Dwarf Pears are in full bearing at the fourth year, and, although not so long lived as when worked on seedling pears, the quality of the fruit is in many varieties much improved. We offer the following varieties as those which do best on the Quince.

PRICE, 1s. 6d. EACH.

BARTLETT
LOUISE BONNE OF JERSEY
WINTER COLE

BEURRE BOSC
NAPOLEON
WINTER NELIS.

PERSIMMONS.

OUR own raising, as we have discarded the importations from Japan for several reasons. Our plants will move as well as any ordinary fruit trees. In fact, our soil seems admirably adapted to produce fine fibrous roots in the Persimmon.

PRICE, 1s. 3d. EACH; 12s. PER DOZ.

AMONG.—Fruit medium size, roundish; skin light orange; flesh brownish; an early variety, which is edible from the tree.

CARRINGTON.—A New South Wales seedling, of a very large size. A popular variety for market.

DAI DAI MARU.—Fruit of the largest size, square, or four-sided, rather flattened, skin deep orange; flesh yellow, almost seedless; a fine variety, fairly early.

HAYCHI YA.—Fruit very large, oblong; rather pointed; skin light red, russety at the point, and turning black towards the tip when quite ripe; an excellent and high-flavoured variety, with very few seeds.

HAYAKUME.—Fruit very large, round, covered at the end with heavy russet; skin vermilion, flesh brown, rich and luscious; should be allowed to hang till touched by frosts, and then placed inside till soft; few seeds.

JUBILEE.—A colonial variety, and a good one. In shape rather flattened or square. Very large, and needs ripening inside.

KUROKUMO.—Fruit medium size, almost round; skin yellowish red; flesh orange, with very few seeds; and of the highest flavoured varieties, and may be eaten from the tree.

OKAME.—A little-known variety, of the favorite square shape; very large, rather flattened; skin reddish orange, and almost seedless.

SUGARLOAF.—A long conical variety. Colour rich dark red, very few seeds. Will hang until frosts come, and must be ripened inside.

TANENASHI.—This is a seedless variety, and is largely grown for market under that name. Fruit of the largest, conical; skin bright yellow, flesh yellow; when thoroughly ripe and soft, is a very fine variety.

YEDDO-ICHII.—Fruit medium size, round, rather pointed, skin light yellow, russety; flesh amber, with rather many seeds. A late variety, and perhaps the best, if allowed to become soft.

YEMON.—Fruit large, rounded, rather flattened, with distinct ribs; skin clear deep yellow, with little russet; flesh orange, with no seeds.

ZENJI-MARU.—Fruit small, round, very russety; skin deep orange black at the end. Flesh brownish, with a good few seeds. May be eaten from the tree, but is improved by hanging till frosts.

We shall be pleased if our Clients will forward the names of any of their friends to whom a copy of this Catalogue may be useful.

F. FERGUSON & SON,

Postal Address: Hurstville.

Hurstville and Camden, N.S.W.

HURSTVILLE AND CAMDEN, N.S.W.

PLUMS.

Worked on Seedling Myrobolan, Mariauna, also Peach Stocks.

PRICE, 1s. EACH; 10s. 6d. DOZEN; 50 TREES AT 100 RATES. SPECIAL QUOTATIONS PER 100 AND 1000.

EARLY VARIETIES.

ANGELINA BURDETT.—Fruit above medium size, round, skin thick, dark purple, with a heavy blue bloom; flesh yellowish, very juicy and rich. A freestone, and an enormous cropper.

ALEXANDRIA.—Fruit resembles "Diamond" in general appearance, but is much more even in outline, and very much more productive. Trees annually laden with heavy crops. Fruit is of largest size, skin dark purple, flesh yellow. A valuable variety for all purposes, which we recommend with the greatest confidence. Price, 1s 6d.

BLUE ROCK.—Raised by Mr. Rivers, England; large and very rich; one of the very best dessert plums. Price, 1s 6d.

BELGIAN PURPLE.—Fruit large, roundish, oval; skin deep brownish purple, covered with a blue bloom; flesh greenish, juicy, rich and sugary. A clingstone.

BLACK CLUSTER.—A heavy and constant cropper. Fruit medium size, roundish; skin almost black, with a thick blue bloom; flesh greenish, juicy, and sugary.

CHERRY, or EARLY SOUTH AMERICAN.—Fruit small, round; skin a fine lively red; flesh greenish yellow, very juicy, with a pleasant lively flavour. This is an invaluable early cooking plum, and may be gathered when quite green.

COLUMBIA.—Fruit of the largest size; skin brownish purple; flesh orange, very rich, sugary and excellent. A freestone, with a remarkably small stone.

CLYMAN.—Fruit of large size, round; skin a dark purple, with a heavy blue bloom; flesh yellowish, firm, juicy, of a rich, delicious flavour. Requires to be heavily thinned.

DENNISTON SUPERB.—A seedling of the Green Gage, fruit round, a little flattened; skin yellowish green; flesh very thick, with a rich flavour; a perfect free.

DIAMOND.—A magnificent fruit of the very largest size, and most handsome appearance; fruit oval; skin black, covered with a blue bloom; flesh deep yellow, not very juicy, with a fine sub-acid flavour; a splendid preserving variety, ripening mid-season.

DIAPRE ROUGE.—Fruit large, almost round; skin pale red, with a lilac bloom; flesh greenish yellow; a very heavy and constant cropper, ripening with Diamond.

EARLY ORLEANS.—Fruit medium size, oval; skin dark red, purple in the sun; flesh yellowish green; richer than Old Orleans, and ripening ten days earlier; a freestone.

EVANS' EARLY.—A splendid, very early plum; fruit medium size, roundish, oval; skin deep purple; flesh greenish, very juicy; an enormous cropper.

GOLIATH.—Fruit very large, roundish, oblong, a little one-sided; skin a fine deep red, almost purple; flesh yellow; juicy, with a brisk and sprightly flavour; a clingstone.

GREEN GAGE.—The highest flavoured and most delicious of all dessert plums; fruit of medium size, round; skin yellowish green; flesh pale green, very juicy and melting; in the warmer districts is not usually a heavy bearer.

HARRIS MONARCH.—A magnificent plum of largest size, six fruit weighing 20 oz.; oval in shape, skin dark red covered with minute grey dots, and covered with a thin blue bloom. Flesh yellow, good flavour, very juicy. Ripe first week in March. One of the finest plums yet introduced. Price, 1s 6d.

HERON.—A new culinary plum from Rivers, of England, who describes it as of very large size; skin red and purple. An enormous bearer.

LINCOLN.—Fruit very large, said to be 6½ inches in circumference; deep reddish purple, the earliest large European plum; a heavy annual cropper.

OCTOBER GREEN GAGE.—A decided improvement in every way on the old Green Gage, being equally highly flavoured and luscious, at least twice its size, and earlier; also, it appears to do remarkably well in warm climates, which could never be claimed of old Green Gage.

OULLIN'S GOLDEN GAGE.—Fruit large, roundish oblong; skin rich yellow; flesh yellow, very tender, juicy, and sugary. Most productive, large and showy. A clingstone.

PRINCE ENGLEBERT.—Fruit large; skin very deep purple; flesh yellowish; a freestone, and, on account of its early and constant bearing, a most profitable plum.

PRESIDENT.—We consider this the best acquisition to this class of fruit. The fruit is large, oblong shaped, over two inches long, beautiful purple colour, pretty bloom, and covered with white minute dots, flesh firm and sweet, and fruit perfect freestone; will prove a great acquisition as a

market variety on account of its good keeping quality after having coloured on the trees. 1s 6d.

RIVERS' EARLY PROLIFIC.—Fruit medium size, roundish oval; skin reddish purple, with a full blue bloom; flesh yellowish, juicy, rich, and very good. A freestone.

THE CZAR.—Fruit large, oval; skin quite black; flesh yellow, tender, and of excellent flavour; gears fruit in clusters, and is improved by thinning.

WASHINGTON.—Fruit of the largest size, roundish oval; skin dull yellow, with a pale crimson blush; flesh yellow, firm, very sweet and delicious. A freestone.

YELLOW DIAMOND (ENGLISH).—A sport of the "Diamond" plum; instead of dark purple, it is of a clear yellow colour. 1s 6d.

YELLOW GAGE.—Fruit medium size, round; skin pale yellowish green, with a few reddish dots and a good deal of bloom; flesh pale yellow, sweet, and juicy; freestone.

LATE VARIETIES.

ADMIRAL.—Fruit closely resembles "Monarch," somewhat later; the tree has, however, quite a different habit, a close grower, forming abundant spurs, bears profusely; a most valuable late kitchen and market plum. 1s 6d.

AMERICAN DAMSON or FROST PLUM.—Fruit medium oval; skin deep purple, flesh greenish yellow, juicy, sweet, and rich. A splendid very late plum; a clingstone.

BELLE DE SEPTEMBER.—Fruit medium size, roundish, inclining to oval; skin reddish purple, with a blue bloom; flesh orange yellow, juicy, sweet; a clingstone.

BRADSHAW.—Fruit large, oval, sometimes with a neck; apex rather sunk; skin reddish purple, with a light blue bloom; flesh yellowish, rather coarse, but juicy, rich, and pleasant. Not quite a freestone; ripens with Pond's Seedling.

BRYANTONE GAGE.—Fruit medium size, oval; skin dull pale yellow, with a bronze cheek; a very thin bloom; flesh yellow; a partial clingstone.

COE'S GOLDEN DROP.—Fruit of very large size, oval; skin light yellow, with a few dark spots; flesh firm, not extra juicy, rich, sweet and delicious. A grand plum for both warm and cold districts, and making a splendid prune when dried.

COE'S LATE RED.—Fruit of medium size, nearly round; skin light purplish red, with a thin, blue bloom; flesh yellowish, rather firm, juicy, rich and vinous; a freestone.

CRITTENDEN'S DAMSON.—The very best of the Damsons, bearing more fruit than leaves; fruit large for a Damson, oblong; skin deep purple, with a heavy blue bloom.

DENBEIGH.—Fruit large, roundish, oval; skin clear, shining red; flesh yellowish, very firm, rich, and juicy; a most handsome plum, and a good culinary variety.

DENYER'S VICTORIA.—Fruit large, roundish oval; skin light yellow, with lilac shadings; flesh golden yellow, rich and vinous. A freestone; also known as Sharpe's Emperor.

DUANE'S PURPLE.—Fruit very large, roundish, oval, or oblong; skin reddish purple in the sun, pale red in the shade; flesh rich amber; adheres partially to the stone.

FRENCH DAMSON.—A good Damson, with fewer spines than any other. An enormous cropper, with a much more delicate flavour than the ordinary Damson.

GOLDEN TRANSPARENT.—Fruit large, bright golden when ripe; a most delicious late plum; first class certificate Royal Horticultural Society, England. 1s 6d.

GLOIRE DE EPINAY.—Fruit large, round; black red; flesh yellow, firm and melting; tree extraordinarily prolific. Price, 1s 6d.

GRAND DUKE.—One of the very finest late plums. Fruit large, almost oval; skin purplish black, with a heavy bloom; flesh deep yellow, firm, very rich and juicy. This plum is a valuable acquisition, and will be largely planted when better known.

IMPERIAL DE MILAN.—Fruit large, roundish, oval, a little one-sided; skin deep purple, with a thick blue bloom; flesh greenish, juicy, very rich and sugary; a clingstone.

JEFFERSON.—Fruit largest size, oval; skin golden yellow, with a purplish red cheek; flesh deep orange, very rich, juicy, and luscious. Perhaps the very best plum of its season.

KIRKES.—Fruit medium size, roundish, oblong; skin dark purple, a few golden dots and an unusually heavy blue bloom; flesh greenish yellow, firm, and very rich. A freestone.

LATE BLACK ORLEANS.—Fruit medium size, nearly round; skin deep black, a thick blue bloom, and many brown dots; flesh deep yellow, juicy, and sugary; a clingstone.

LOUTHERBORO.—Fruit large, roundish oval; skin almost black, with a deep violet bloom; flesh yellowish, firm, not very juicy, and highly esteemed for its enormous crops.

MAGNUM BONUM (RED).—Fruit large, oval, a little swollen on one side; skin pale in the shade, deep red in the sun; flesh greenish, rather firm, juicy; a freestone.

MAGNUM BONUM (WHITE EGG).—Fruit very large, frequently six inches in circumference, oval; skin a deep golden; flesh yellow, with an agreeable acidity. A clingstone.

MIRABELLE GLOIRE DE LOUECINNES.—Described as somewhat similar in size and shape as Mirabelle de Nancy, but three times as large; very fine. 1s 6d.

MONARCH.—Fruit very large, roundish, oval; skin dark purplish blue. Will hang for weeks after ripening. A valuable addition to the very late plums.

POND'S SEEDLING.—Fruit very large, oval; skin yellowish, nearly covered with carmine; flesh yellowish, juicy, and sugary; a beautiful plum.

PRINCE OF WALES.—Fruit large, inclining to oblong; skin reddish purple, with brownish dots; flesh greenish yellow, a little coarse, juicy, rich, and sprightly; a partial freestone.

PURPLE GAGE.—Fruit medium size, roundish; skin violet, dotted with pale yellow; flesh greenish yellow, very highly flavoured; will hang on the tree till it shrivels.

REINE CLAUDE DE BAVAY.—Fruit large, roundish; skin greenish yellow; flesh yellow, with a sugary rich flavour; one of the very best plums; a freestone.

REINE CLAUDE TARDIVE DE CHAMBOURCY.
—Size and aspect of Green Gage; free; very vigorous and prolific.

REINE CLAUDE D' ALTHAN.—A very fine late red plum; freestone; an excellent dessert; classed as a Gage (T. F. Rivers' description).

SHROPSHIRE DAMSON.—The well known English Damson; an enormous cropper; the fruit and juice when cooked are of a rich purple.

SULTAN.—Fruit medium, round; skin dark purplish red, dotted with minute brown specks, with a thin blue bloom; flesh greenish yellow, firm, brisk, sweet. A partial clingstone.

PRUNES.

On Myrobolan Stocks.

THIS FRUIT presents great possibilities in Australia, as the value of Prunes annually is enormous. The process of manufacture is very simple, very little plant being required; in fact, in California they are simply sun-dried, and in that form realise a higher price than those dried in evaporators.

Our list comprises all the newest, as well as the best of the old varieties, and as we anticipate Prune-drying is likely to enormously develop, we are raising them by thousands.

PRICE, 1s. EACH; 10s. 6d. PER DOZ.; SPECIAL QUOTATIONS PER 100 AND 1000. 50 TREES AT 100 RATES.

BULGARIAN.—A new prune, and one which has not yet fruited with us; fruit of largest size, roundish oblong; skin deep purple, with a thick, heavy blue bloom; flesh yellowish, firm, very meaty.

CLAIRAC MAMMOTH D'ENTE.—Is the parent of D'Ente, and was raised near Clairac, in France. It is a very large and fine prune; colour reddish purple, fifteen days earlier than French Prune, and has a thinner skin. It is delicious when fresh, and dries with good weight and colour. Price, 1s 6d.

FELLEMBERG or ITALIAN PRUNE.—Fruit medium to large size, long, oval; skin dark purple covered with a dense blue bloom; flesh rich yellow, very thick, and with a rich, syrupy juice; dries with less loss of weight than any prune; a clingstone.

GOLDEN PRUNE.—Fruit very large, roundish oval; skin thin, tough, of a beautiful golden colour; flesh yellow, very rich and sugary, and exquisite flavour. Dries beautifully, 24 dried prunes weighing 16 ounces; a perfect freestone.

GIANT.—Fruit of very largest size, deep purple; a heavy cropper. Makes a splendid market fruit from its size and appearance, apart altogether from its value as a prune.

HUNGARIAN or POND'S SEEDLING.—A true prune, although its handsome appearance makes it one of our best market plums.

Fruit largest size, oval; skin yellowish, nearly covered with bright red or carmine; flesh yellowish, very thick.

IMPERIAL (TRUE).—Described as uniformly large, more oval than d'Agen, almost the same colour, ripens earlier, and has a thin skin. Fruit analysed shows 20.4 per cent. of sugar, against 18.53 per cent. for d'Agen; very extensively planted in Californian prune orchards. Price, 1s 6d.

OREGON SILVER.—A seedling of the famous Golden Drop, same shape, same huge size, but will bear heavily in warm districts. Professor Wickson, of California, states that there Silver Prune bears on an average four times as much as Golden Drop; a clingstone.

PACIFIC.—The noblest of the plum family, larger than Diamond, of a deep maroon colour. As a drying plum it is unsurpassed, being firm, very meaty, and making no waste. Fruit of very largest size, true oval.

PRUNE D'AGEN (FRENCH PRUNE).—This is the prune almost exclusively used in France for drying. Although small as compared with some of the new varieties, it is of such high sugar contents, that for commercial purposes it is unrivalled. Fruit medium size, oval, with a neck; skin violet purple, with a thick bloom; flesh greenish yellow.

PEARL.—Another of Burbank's productions, a seedling of d'Agen; white, semi-transparent, with a heavy bloom; makes a splendid prune, of attractive flavour and fragrance. 1s 6d.

ROBE DE SERGANT.—Very similar to d'Agen in shape and colour, but larger; and what makes it valuable is that it ripens ten days before that variety; an equally heavy bearer.

SUGAR.—This new prune was raised by Luther Burbank, who describes it as his greatest wonder among prunes, being far superior to P. d'Agen in that it is a better grower, better bearer, and requires less careful pruning. Fruit even in size, and very large, averaging 13 or 15 to the lb. Very rich in sugar (hence its name), and is being extensively planted in California. 1s 6d.

ST. MARTIN'S QUETSCH.—Fruit medium size; skin thin, pale yellow, with a white

bloom; flesh pale yellow, separating easily from the pit; makes a delicate pale prune.

ST. CATHERINE.—Fruit medium size; skin thin, a very pale yellow; flesh yellow, very thick, with a very small stone, very juicy, with a delicate flavour. In France used to produce the highest class of table prunes.

SPLENDOR.—Unlike d'Agen, Splendour is a perfect freestone; like it, it is productive to a fault, and while not so large as Giant, as a drying fruit it excels it, or, in fact, any prune we yet have; ripens ten days before d'Agen.

TRAGEDY.—A Californian variety, largely planted there for its early season of ripening. Fruit quite large, oblong, pointed; skin thick, deep purple; flesh yellow, rich in sugar, with a rich vinous juice; a free-stone.

JAPANESE PLUMS.

WING to their adaptability to nearly all situations, their great beauty and enormous bearing qualities, Japanese Plums are now very largely planted.

WORKED ON PLUM AND PEACH STOCKS.

PRICE, 1s. EACH; 10s. 6d. PER DOZEN. SPECIAL QUOTATIONS PER 100 AND 1000; 50 AT 100 RATES.

ADMIRAL TOGO.—Fruit round and handsome, skin bright crimson; flesh solid, yellow, rich and juicy. Tree vigorous grower and prolific bearer. Ripe just after the Cherry Plum. A splendid shipper, and valuable market variety. Price, 1s 6d.

ABUNDANCE (BOTAN).—Fruit fair to large size; skin brilliant carmine; flesh thick yellow, very juicy, of fair flavour; ripe ten days before Burbank; clingstone.

APPLE (HYBRID PLUM).—It bore fruit during the past summer, and was of large size and striking appearance; fruit ripens soon after Burbank.

AMERICA (HYBRID PLUM).—The result of a cross between Robinson and Botan; fruit is of large size; colour glossy coral red; flesh yellow, moderately firm, and delicious.

AKARANA.—Fruit much resembles Botan; a vigorous grower, having luxuriant foliage, which should be a safeguard against sunscald so prevalent in Japanese plums. It is said to ripen with the Cherry Plum; large size, firm, and should be invaluable as an early variety to supersede the old Cherry.

BARTLETT.—Fruit medium size; skin mottled with red on a red ground; flesh yellow, with a rich, piquant flavour; tree a very handsome, sturdy grower.

BOTANKIN.—A very handsome plum; skin clear yellow, nearly covered with reddish purple; flesh deep orange, very juicy,

with a high, racy flavour; an enormous cropper.

BURBANK.—Fruit largest size, round; skin deep yellow, cherry red in the sun, with a hazy lilac bloom; flesh deep orange, in flavour more nearly the best English plums than any of this section; should be thinned. Ripe second week January; clingstone.

CLIMAX.—Raised by Luther Burbank, who says:—"The most wonderful early plum ever grown, and one that will change the whole business of early fruit shipping. A new king amongst fruit. Fruit as large as Wickson, heart-shaped, and more highly coloured; delicious flavour; ripens very early (before any other good plums). Tree vigorous, upright growth, leaves very large."

COMBINATION.—Raised by Burbank, and pronounced as "the best plum ever tasted." Fruit large, globular, very uniform in size, straw colour, extremely sweet, with a distinct pine-apple flavour.

CHALCO.—The fruit, which ripens just before Burbank, is large, and like a tomato, deep reddish purple, with very sweet, fragrant yellow flesh; the fruits are almost stemless. The fruit can be gathered when quite green, and kept for a month.

CHABOT.—Fruit large, heart-shaped or oval; skin clear, bright red, with a rich purple bloom; flesh yellow, juicy, of good flavour; a close clingstone; ripe end January.

- DELAWARE.**—A blood plum of drooping habit; fruit large, very rich and juicy; ripens after Satsuma.
- DORIS.**—The earliest of the Japs; fruit of fair size, bright red, juicy but firm; to be recommended for the early markets.
- FIRST.**—Another new hybrid by Burbank, and said to be the earliest, largest, handsomest, and most prolific of all early plums; fruit large for an early plum; pale amber, faint bluish on sunny side, half transparent.
- GOLD.**—In appearance a marvel of beauty, the golden globes being borne all along the limbs, not in clusters, but singly; in color, clear, deep golden; flesh very firm, juicy, of fair flavour. Will sell anywhere from its appearance alone.
- HALE.**—A beautiful plum, of a clear golden colour; ripe after Burbank; fruit rich and juicy; a very heavy cropper.
- HATTANKIN.**—Fruit large, varies in shape, usually quite round; skin bright, clear yellow, no red; flesh pale yellow, firm; a clingstone; ripe end December.
- KELSEY.**—Fruit very large, heart-shaped; skin fine, clear yellow, covered with red in the sun; flesh deep yellow; a partial clingstone; ripens second week in March.
- LARGE RED.**—Of largest size, up to 8 inches round, weighing $5\frac{1}{2}$ ounces, oval; skin brilliant red; flesh yellowish, juicy, of fair flavour; ripe last December.
- MAYNARD.**—"Burbank's latest and greatest effort in the plum line, and we believe he has reached the point of perfection." Fruit supposed to be a cross between P. Triflore and P. Simonii; is oval, large to very large; colour deep clear purplish crimson, thin blue bloom; flesh light yellow, marbled with red, firm, delicious, highly flavoured; unusually strong grower, with large broad leaves like an apricot; ripens just after Climax; surpasses all others in keeping and carrying qualities, being firm even when dead ripe. 2s.
- MOYOLA.**—Identical with Chabot.
- OGON (LARGE YELLOW).**—Large size, quite round; skin rich, deep amber all over; flesh yellow, almost transparent; a clingstone; ripens first week in January.
- OKTI SMOMO.**—Fruit very large, long in shape; skin deep dark red, equal in appearance to Burbank.
- OCTOBER PURPLE.**—Fruit large, quite round; skin deep purple, almost black; flesh yellow, very thick, juicy, with a distinct and quite new flavour; a cross between Kelsey and Satsuma.
- PRUNUS PESSARDII.**—The leaves of a red, bronze colour; the young wood purple; fruit small, red from the time the blossoms fall; ripens earlier than any plum, and may be picked when only half grown, being even then highly coloured.
- PRUNUS SIMONII.**—Fruit very large, flat; skin deep crimson; flesh yellow, firm, with a delicious flavour and aroma. In some localities not a heavy bearer.
- SHIPPER.**—A firm-fleshed plum which may be handled like apples; flesh wine-coloured; skin blackish purple; will hang for weeks uninjured; a good cropper.
- SULTAN.**—Of huge size, oval, deep purplish crimson; flesh firm, solid, sweet, and dark crimson in colour; it is a splendid grower; very productive; ripe a week before Burbank.
- PURPLE MONSTER.**—From our experience, we consider this identical with Kelsey.
- RED JUNE.**—The earliest of the section; fruit medium size, round; skin brilliant red all over; flesh pale yellow, firm and solid; ripens here second week December.
- SHIRO.**—Fruit produced in profusion, medium to large, uniform in size; clear, light yellow, with thin white bloom; flesh firm and juicy, sub-acid; clingstone; ripens two weeks before Burbank, and will keep in good condition for a month.
- SATSUMA (BLOOD).**—Fruit medium size, round; skin deep purplish red, distinctly mottled under the skin, flesh dark red, right to the stone; of a pendulous habit; will hang till February.
- CYCA SMOMO.**—The upright blood plum, and identical with the preceding except in its habit of growth and its season of ripening, which is first week in January.
- WICKSON.**—Now so well and favourably known as to hardly need description; an enormous bearer; does well everywhere; sells as well green as ripe.
- WRIGHT'S EARLY.**—A new variety, very highly spoken of in New Zealand, where it originated; very similar to the famous "Burbank," but is at least four to six weeks earlier. The raiser claims it is the best early plum, a heavy and constant cropper. Price, 1s 6d each.

Vineyard Destroyed by Phylloxera.

Reconstructed Vineyard on Montpellier
(Resistant Stock).

QUINCES.

UNDoubtedly the most hardy of all fruit trees, enduring the extremes of drought and flood, and still bearing heavy crops annually. If fairly treated, cut back every year, and the fruit thinned, will produce enormous crops of large, showy, marketable fruit.

PRICE, 1s. EACH; 10s. 6d. PER DOZEN. SPECIAL QUOTATIONS PER 100 or 1000.

APPLE-SHAPED.—Fruit large, roundish, like an apple. For stewing it is unrivalled, becoming quite tender; of excellent flavour; in colour, a fine deep gold.

BOURGEOIS.—Fruit very large, rich golden yellow, smooth velvety skin, beautiful large foliage, quite distinct.

CHAMPION.—A splendid new American variety; fruit very large and handsome; flesh tender, with a very delicate flavour; a splendid keeper, and carries well.

DE VRANJA.—New introduction from Servia, recommended for its prolific qualities; fruit enormous, weighing nearly 3lbs.; very agreeable flavour. 1s 6d.

FULLER.—A new variety from Europe, described as a regular bearer and strong grower; fruit ripens early, large size, bright lemon yellow, very highly flavoured.

LARGE ORANGE.—Somewhat resembling apple-shaped, but uniformly larger, and with a slight neck.

MEECH'S PROLIFIC.—A variety raised in New Jersey, and therefore thoroughly hardy; fruit large, of a lovely orange, of great beauty and delightful fragrance; tree a strong, vigorous grower, and immensely productive.

MASTER'S EARLY.—A large variety, resembling Champion in appearance, but much

earlier; tree a regular and constant bearer.

MISSOURI MAMMOTH.—Fruit enormous size, of very even outline, mild, pleasant flavour and unsurpassed for cooking; a grand exhibition variety.

PINEAPPLE.—Raised by Luther Burbank, and described by him as a long effort to secure a quince that would cook like an apple. The name comes from its flavour, which is suggestive of pineapple.

PEAR-SHAPED.—Fruit of medium size, oblong; skin pale yellow; flesh very firm in texture, perhaps the hardest, and certainly the longest keeper of any of the quinces.

PORTUGAL.—For stewing, it is unrivalled, turning a rich crimson; fruit of largest size, oblong; skin paler yellow than any other; tree a particularly strong grower.

REAS MAMMOTH.—Of similar appearance to the Orange Quince, but averaging one-third larger; fruit round, very smooth and handsome; a very early bearer.

VAN DEMAN.—We have this variety fruiting, and can recommend it; as good as Portugal, but, unlike that variety, a heavy cropper.

ZUCKER (SUGAR).—Introduced from Asia, fruit very sweet, excellent when preserved. 1s 6d.

RHUBARB.

EARLY ALBERT (IMPORTED).—A very fine variety, valuable on account of its extreme earliness; stems long, but not very thick, of a bright, lively red; cooks without any fibre, of a most delicious flavour. Price, 1s each; 9s doz.

HOGAN'S SHILLELAH.—A truly magnificent variety, raised in Victoria, stems of immense size, very thick; a very hardy and free-growing rhubarb. Price, 1s each; 9s doz.

MYAT'S LINNAEUS.—(Imported).—Very early and wonderfully prolific; one of the largest and best in cultivation. Price, 1s each, 9s doz.

MYATT'S VICTORIA (Imported).—A well known variety, perhaps the hardest for warm districts; stems very large; of excellent flavour and colour. Price, 1s each, 9s doz.

JOHNSTONE'S ST. MARTIN'S (NEW).—A variety with the reputation of immense size, high flavour, and great hardiness. Price, 1s.

TOPP'S WINTER.—A most extraordinary variety, being in use during the months from May to August; stalks long, rather slender, borne in the greatest profusion; in colour a vivid red; flesh very tender, stewing to a pulp, without a sign of fibre. Price, 1s each; 9s doz.

WEBB'S BUNINYONG.—Of large size, and extra length; of splendid quality; very hardy and prolific. Succeeds Early Albert; a first-rate variety for market purposes. Price, 1s each.

GIANT.—The well known old favourite variety, stem of larger size, but not of best flavour; very hardy and prolific. Seedlings, 4s to 6s per doz.

IMPROVED TOPP'S WINTER.—Similar to its parent in respect of season, but of much better habit of growth, being more erect; the stalks are longer, and of better colour; a decided improvement on the original. Price, 1s each, 9s doz.

Small Fruits or Berry Fruits.

THE cultivation of Berry Fruits has been much neglected in the past in New South Wales, and, with such large areas of suitable land as may be found all along the Eastern Highlands, is a cause for surprise. The large quantities of Gooseberries, Raspberries, and Currants imported yearly from Tasmania and Victoria can be produced at least as well within fifty miles of Sydney.

CURRANTS.

In order to produce very large Red and White Currants, the plants should be cut in closely, i.e., the young wood should be shortened every year to six or nine inches, so that the plants, when pruned, are like the stool in an osier bed. Black Currants do not require this treatment, bearing freely on the young wood.

PRICE, 7s. PER DOZ.; 35s. PER 100.

Red and White Currants.

- CHERRY.**—A strong-growing variety, with very large fruit, not of finer flavour than others, but valuable for market on account of its size; early.
- LA FERTILE.**—Fruit large, dark red, bunches of medium length, tapering.
- LA VERSAILLES.**—A very free-growing, productive variety, of the finest flavour; fruit of the largest size, deep dark red, bunches long, tapering and very thickly set.
- RED DUTCH.**—An old standard variety; very hardy and productive; fruit large, deep red, rich, acid flavour; bunches two or three inches long.
- MAMMOTH.**—Fruit large, a little more acid than Red Dutch.
- RED IMPERIAL.**—A new variety of great merit; fruit large, bright, clear red; bunches long; bush very robust and most productive.
- WHITE DUTCH.**—Similar to Red Dutch in habit; fruit larger, of a fine yellowish white colour, almost transparent, very slightly acid; very productive.

- WHITE TRANSPARENT.**—Fruit very large; yellowish white; very clear; very hardy.
- WHITE IMPERIAL.**—A fine, new variety; fruit as large as White Dutch, clearer; the bunches six inches long, regularly set and richly flavoured; bush robust.

Black Currants.

- BLACK NAPLES.**—A beautiful fruit; berries nearly three-quarters of an inch in diameter; a late variety, bearing its fruit in very large clusters.
- CARTER'S BLACK CHAMPION.**—A great improvement in Black Currants, the berries being nearly three-quarters of an inch in diameter, and very richly flavoured.
- KENTISH HERO.**—Fruit large; bunches short, thickly set; the best for preserving.
- LEE'S PROLIFIC.**—A most abundant bearer; bunches large; fine berries, of a high flavour.
- OGDEN'S (BLACK GRAPE).**—A particularly strong and vigorous grower; resembles Black Naples, but is earlier.

BLACKBERRIES, &c.

PRICE, 1s. EACH.

- AMERICAN.**—Large black, of good flavour.
- ENGLISH.**—Medium size, black, one of the best flavoured.
- HIMALAYAN.**—Very large; black, round; foliage very handsome; a robust grower. 1s 6d each.
- ITALIAN.**—Large, black, and of good flavour.
- LAWTON.**—Medium size, black; early; habit upright.
- MAMMOTH.**—This is without doubt the very best thing in the way of Blackberries we have ever seen; ripens October, November, and right on to March, in clusters of magnificent dark-red berries, of most luscious flavour. Another point in its favour is that

it does not sucker, a fault with so many of this family. 1s.

- WHITE CRYSTAL.**—Clear golden yellow form of Blackberry; fruit large, seed minute, ripens early. Price, 1s.

- WILSON'S EARLY.**—Large, black, fruit soft and sweet.

- LUCRETIA DEWBERRY.**—Decidedly the best of all dewberries. It is a superb fruit, large and handsome, of a shining jet black; melting, and of delicious quality. The plant is healthy and hardy everywhere, and exceedingly productive. Price, 9d ea., 6s per doz.

STRAWBERRY RASPBERRY.—This we have proved to be worthless, and a greater pest than Sorrell, and have consequently thrown out of propagation.

JAPANESE WINEBERRY.—The fruit is similar to raspberry in shape; colour bright, glossy scarlet; sweet, juicy, and of agreeable flavour; strong grower, and quite an ornamental shrub. This tree is only good in cool, moist districts. 1s 6d each.

THE LOGAN BERRY.—This fruit, which appears to be a cross between a cultivated red raspberry and a variety of Californian wild blackberry, was grown by Judge J. H. Logan, of Santa Cruz, California, from seed, in 1894. The fruit is sometimes an inch and a quarter long, the shape of a blackberry, the colour of a dark red rasp-

berry, and a combination of the flavours of both. The stems are strong, free from thorns, but covered with fine spines, have a trailing habit, and the fruit is furnished in great profusion in early December. He received as award of merit from the Royal Horticultural Society of England. 1s each, or 15s per doz.

GOLDEN MAYBERRY.—The berries are of a golden straw colour, and ripen here in November, before strawberries, and before the earliest of the standard raspberries. The bushes are distinct from all others, growing like trees, 6 to 8 feet high, with spreading tops, which are soon covered by the great, sweet, glossy, golden, semi-transparent berries. The plants, when well established, will surprise one with their abundance of fruit. Price, 1s 6d each.

RASPBERRIES.

A REALLY USEFUL FRUIT, OF EASY CULTIVATION.

3s. PER DOZEN; 20s. PER HUNDRED.

ANTWERP RED.—Large and fine flavour.

ANTWERP WHITE.—Large, mild, sweet flavour.

FALSTAFF.—Fruit red, flavour good.

NORTHUMBERLAND FILLBASKET.—Deep red, good size and flavour.

VICTORIA.—Large, red fruit, of excellent flavour; late, one of the best.

CALL AND SEE US WHEN IN SYDNEY.

NORTHUMBERLAND FILLBASKET (THORN-LESS).—In all respects similar to Fillbasket, but quite smooth in the canes; should prove a decided acquisition. Price, 4s doz.

CUTHBERT (QUEEN OF THE MARKET).—This variety is more largely grown for market purposes than any other red raspberry in America. It is a sturdy grower, and does not require tying or staking. Fruit medium size, good flavour. 4s doz.

FRANCONIA.—A first-class red raspberry; fruit very large, of good flavour, and a strong grower; about two weeks earlier than Northumberland Fillbasket. 4s doz.

GOLDEN QUEEN.—A seedling from Cuthbert, resembling that variety in hardiness and vigorous growth. A most abundant bearer, producing fruit of the largest size and delicious flavour; colour beautifully yellow. 4s doz.

GRANADILLA PASSION FRUIT.

The large white Passion Fruit grown so largely in Queensland; will do well in a fairly sheltered place, but, of course, no use in localities liable to frosts. Price, 1s 6d each.

SERVICE TREE.

A most handsome small tree, producing an abundance of clusters of fruit, much resembling in size and appearance the Crab Apple; when the fruit is ripening the tree presents a most handsome appearance, and the foliage is also very beautiful. Altogether, a most desirable tree. The fruit is ripe in March. Price, 1s 6d each.

TREE TOMATO.

A small evergreen tree, recently imported from India, attaining a height of six to eight feet. Its fruit is produced in pendulous branches of four to six each; of a brownish red color, oval or egg-shaped, and suspended below the foliage three to four feet above the ground. In flavour the fruit resembles the common tomato, with a smack of the lemon. This plant will, no doubt, soon be in general cultivation, for the following reasons, viz.:—The fruit ripens after the common tomatoes are over; will keep many weeks after gathering, and will produce an annual crop for an indefinite period, dispensing with the necessity of annual planting. The tree, moreover, is of easy culture, requiring only ordinary treatment, and will succeed in common garden soil; does not usually fruit the first season. Price, 1s each.

TACSONIA MOLLISSIMA.

WHITE PASSION FRUIT.—This plant has been grown for some time as an ornamental climber, with handsome rose-coloured flowers, and producing enormous quantities of white fruit about the size of a hen's egg, which, on being tried, proved to be valuable for table, and much relished by many. Used with milk and sugar, it is delicious; the pulp is a rich golden colour. Highly desirable for ornamental as well as useful purposes. Price, 1s each.

NEW PASSION FRUIT.

MAMMOTH.—An improvement on the common variety (*Edulis*), being quite twice its size, and containing rich-coloured high-flavoured juice. Originated in the County of Cumberland, where it has for years been grown, and realising fancy prices in the markets. In pots, 1s each.

HOVENIA DULCIS (Chinese Raisin).

This is grown more for the curious fruit, which is borne in clusters or branches; in flavour it very much resembles a Muscatel Raisin. It forms a very handsome small tree. Deciduous. Price, 2s each.

STRAWBERRIES.

THE culture of this fruit will, we feel confident, in a few years be largely carried on, as anyone with an acre or two in close proximity to large towns can, with little trouble and expense, net larger profits per acre than in any other branch of agriculture. The most suitable soil is a deep, rich loam, or even clay, deeply dug, and enriched with strong manure. Plant in rows two feet apart each way, and keep ground constantly stirred, cutting off all runners as they appear, at least three times a year. Before the fruit ripens, a layer of straw should be placed between the rows. We give a list of varieties most suitable for this State, and would refer planters to our list of novelties for recently-introduced varieties.

PRICE, 4s. 6d. PER HUNDRED; SPECIAL QUOTATIONS PER THOUSAND.

ANNETTA.—A Queensland seedling, fruiting in this State, and promises to eclipse anything we have in the way of early berries; fruit large, 10 to 16 to the quart; bright, shining red, of delicious flavour; in shape somewhat square, without the marguerite point. This is the strawberry seen in Sydney market early in spring; said to withstand frosts and drought. 6s per 100.

AURIE.—The earliest strawberry grown. In Queensland, where it originated, it is marketed July and August, and, BEING THE FIRST STRAWBERRY OF THE SEASON, realises fancy prices. Fruit is large, highly coloured, and very sweet. It is a heavy cropper, and bears two crops in the season. Price, 6s per 100.

BRITISH QUEEN.—Fruit very large, roundish, conical, sometimes cockscomb shaped, of a beautiful shining scarlet; flesh rather firm, juicy, rich and excellent; flowers perfect.

CAPTAIN.—One of the very hardiest strawberries; during all the drought of the past summer it was unharmed, while so many died right out. The fruit is very large and handsome, of splendid flavour, and enormously prolific. For raising for market it is invaluable.

CRESCENT SEEDLING.—A variety imported from England, and which fruited here last season. Hardy, of splendid colour, and, if planted near other varieties, an enormous bearer. The queen of strawberries, suitable for market, and unequalled for home use.

DR. MOREE.—Raiser's description: A splendid berry of the Cresswell type, but larger, better flavoured, and a heavier cropper. Last spring I counted over two hundred formed berries (not counting blossoms) on one plant, and this same plant has fruited continuously ever since, and now (March) has a good show of blossoms, green and ripe fruit. This is not an exceptional case, but simply one of many plants in the bed that I marked for identification. 5s per 100.

FEDERATION.—Specially brought under our notice by a large Queensland grower, where it has cropped very heavily and regularly throughout the recent droughts. In that State (Queensland) it is considered by far the most profitable berry, and we have every confidence in bringing it under the notice of growers and private gardeners. 6s per 100.

GLENFIELD BEAUTY.—Described by the raiser as follows:—This splendid new variety has, during the past few seasons, proved to be one of the finest market varieties, for not only does it bear profusely, but it has the delicious flavour so often wanting in strawberries offered for sale in this market. The fruit is of medium size, rather pointed, and the flesh is close-grained and of good colour; while the fruit is of a rich crimson, and is produced well off the ground in clusters; the foliage is deep green, and the plant is very healthy and vigorous.

GOVERNOR-GENERAL.—A New South Wales raised berry, fairly large, highly coloured, bearing well into winter. 1s 6d doz., 6s 100.

HOWCROFT.—Raiser's description: A large fruiting berry, of the same type as Dr. Moree; stands dry weather slightly better, and in dry positions can be recommended in preference to that variety, but in fairly moist situations or in good seasons, Dr. Moree would be preferable. 5s 100.

KING EDWARD VII.—Result of systematic hybridising of Royal Sovereign, and raiser claims to have produced a far superior fruit; berries extra large, deep vermilion, produced in bunches well clear of the ground; a heavy and constant cropper, bearing from September to May; in fact, it is almost an all-the-year-round strawberry; flesh pure white, delicious pineapple flavour; cannot be too highly recommended. 5s 100.

MARGUERITE.—One of the best known varieties, largely grown for market on account of its appearance, size, and prolific bearing qualities. It is, however, only of tolerable flavour; fruit large, elongated, shining red.

MELBA.—A Victorian variety, highly recommended by growers in that State. Large, brilliant red of finest quality. Ripens fairly early, and is a continuous and heavy cropper. This variety has been bearing good crops when all others have failed. Price, 6s per 100.

NOBLE (Laxton's).—This magnificent berry, introduced by us a few years ago, we have no hesitation in pronouncing the largest, hardest, most prolific, and handsomest strawberry. We have over 50 varieties in fruit, and we find none will withstand our hot summers like Noble. Fruit of immense

size, roundish, a little flattened; skin bright crimson; flesh pinkish, very rich, and delicious. An enormous bearer, producing bunches of large berries. Ripens very early. Quite an acquisition. Extra strong plants. Price, 6s 100.

ROYAL SOVEREIGN.—Introduction from Laxton, who also raised the famous Noble. Fruit conical, sometimes a little flattened, and of the very largest size. In colour a bright glossy scarlet, coloring well to the point. Flesh white, exceedingly firm, with a rich, vinous flavour. Plant hardy and vigorous, with a strong, bold foliage. In all respects the finest early strawberry, and has received many awards. Price, 6s per 100.

SIR HARRY RAWSON.—Raiser's description: This is, without exception, the best flavoured strawberry I know of; a very good spring fruiter of the Marguerite type; large and attractive, besides being one of the best of carriers. My aim in this instance was to produce the most attractive and best flavoured strawberry for market purposes, and all who have seen Sir Harry Rawson admit that I have succeeded. 5s 100.

TROLLOPE'S VICTORIA.—Fruit very large, nearly globular; skin light crimson; flesh

light scarlet, very juicy, with rich and aromatic flavour.

THE CRESWELL.—A magnificent berry, very suited to warm districts, where it is a most prolific cropper, and seems to be in no way affected by hot scorching winds. Fruit very large, rather long, of a bright glossy red color; a good second early, and will produce a continuous crop right up to May. This variety and Noble we consider safe to plant in large quantities in practically any part of the State.

THE MARSHALL.—A magnificent berry, bearing large and regular crops right through from September to July; in fact, this can be safely termed the "king of winter strawberries"; berries are very large, deep crimson, borne in clusters clear of the soil; it has a superb leaf, which acts as a natural shade from sun's rays in November and December; a great acquisition to strawberry growers. 6s 100.

UPTU MARK.—Of Victorian origin; medium sized; bright red; in fruit from November to May; true winter bearing. 1s 6d doz., 6s 100.

WHITE CHILIAN.—A large white or palish pink berry of the Hautbois type, flesh firm, juicy and of a high flavour. More suited to the cooler districts. Price, 7s 6d per 100.

New Perpetual Fruiting Strawberries.

Alpine or Bush Type.

SAINT ANTOINE DE PADONE.—Said to be a cross between "St. Joseph" and "Royal Sovereign" and produces berries from early spring till late in the autumn. A first-class certificated variety. Price, 4s doz.

WHITE ALPINE.—Another splendid berry, of the perpetual bearing type, and should be cultivated for home use if only for its exquisite flavour. Price, 2s doz.

MISCELLANEOUS FRUITS.

Berberies Common, 1s. each.

D.T.—Saccharinum (Sugar Maple). 40ft..	1 6		
D.T.—Platanoides (Norway Maple). 50ft.	1 6		
D.T.—Pseudo Plantanus (Sycamore or False Plane), 70ft.	1 6		

	S	D		S	D
E.S.—AUCUBA Japonica. 4ft.	1	6	E.S.—Latifolia, blue. 6ft.	1	6
In various sorts and forms of variegation; very ornamental foliage plant; requires a cool situation.			Elegant, free-flowering, evergreen shrub plants; they prefer a warm, sheltered situation, and light soil.		
AZALEAS. See separate list.			E.S.—BUXUS Aborea (Tree Box). 20ft.	1	0
D.T.—ÆSCULUS HIPPOCASTAUM (Horse Chestnut). 60ft.	1	0	E.S.—Latifolius. 8ft.	1	6
D.T.—Rubicunda, red flowering, 60ft.	1	6	E.S.—Sempervirens, common English Box for edging, 7s 6d 100, 1s 6d doz.		
D.T.—Alba Flora Plena. Double white. 60ft.	2	0	E.S.—Sempervirens, aurea variegata. 4ft.	1	6
E.S.—BAMBUSA, Bamboo Cane, Arundinacea tall common. 50ft. .. 2s 6d to	3	6	E.S.—CALLISTEMON (The Bottlebrush) Lanceolatus. 8ft.	1	0
E.S.—Falcata, beautiful plumed species. 8ft.	2	0	E.S.—Glabra. 8ft.	1	0
E.S.—Humilis. 15ft.	1	6	E.S.—Pinifolia. 8ft.	1	6
E.S.—Nigra, black bamboo. 20ft.	1	6	Colours red and crimson shades; very useful shrubs.		
Do well in any fairly moist land, and give a tropical appearance to the shrubbery.			E.T.—CALODENDRON Capensis (Cape Chestnut). 40ft.	2	0
E.S.—BALFOURIA PITTOSPOROIDES. 25ft	1	6	Tree, producing handsome, flesh-coloured orchid-like flowers.		
Lovely free blooming tree, yellow flowers; very hardy.			CALYCANTHUS Floridus (Allspice). 4ft.	1	6
E.S.—BARKLEYA Syringifolia, yellow; a remarkably graceful tree, with glossy green leaves. 10ft.	1	6	A deciduous hardy shrub; the flowers have a sweet apple scent; the wood and roots when cut have a strong smell of camphor; spreading habit.		
E.S.—BAUHINIA Alba. 6ft.	1	6	CANNAS (See separate list).		
E.S.—Hookeri.	1	6	E.T.—CAMELLIAS (See separate list).		
E.S.—Purpurea. 25ft.	1	6	E.T.—CAMPHORA Officinalis (Camphor Tree). 50ft.	1	0
Very showy flowering plants, suitable for lawn specimens.			E.S.—CANTUA Dependens, pink. 6ft. ...	1	6
BENTHAMIA Fragifera. 6ft.	1	6	E.S.—CASSIA Condolleana. 15ft.	1	0
BERBERIS—			Quick growing, showy, and very hardy flowering shrubs, yellow flowers.		
E.S.—Darwini, yellow, 10ft.	1	6	E.T.—CASTANOSPERMUM Australis, Moreton Bay Chestnut. 50ft.	1	6
E.S.—Fortuni. 4ft.	1	6	D.S.—CATALPA Syringifolia, white, 20ft.	1	6
E.S.—Vulgaris, Common Barberry. 8ft.	1	6	Speciosa, a showy, rapid-growing tree, with pyramidal clusters, a foot long, of white and purple; fragrant flowers ..		
E.S.—Vulgaris Purpurea	1	6		1	6
Vulgaris is the well known English fruit, Barberry. The evergreen species are useful under shrubs, as they thrive under tree shade.			CAROB (See Ceratonia).		
D.T.—BETULA ALBA (English Birch), 30ft.	1	6	D.T.—CARRYA Olivaformis (Peccan Nut). 60ft.	2	0
BEECH (See Fagus).			Sulcata (Hickory Nut). 60ft.		
BLUE GUM: (See Eucalyptus).			D.T.—CASTANEA Vesca (Spanish Chestnut). 40ft.	1	6
E.S.—BORONIA Megastigma, brown, sweet-scented. 3ft.	1	6	E.S.—CEANOTHUS Divaricatus, blue. 8ft.	1	6
BOUVARDIAS. (See special list).			E.S.—Azureus, pale blue. 8ft.	1	6
E.T.—BRACHYCHITON Acerifolia, Fire Tree. 80ft.	1	6	Handsome flowering shrubs, quick growers, and very hardy.		
E.S.—BRASSIA Actinophylla, handsome foliage. 15ft.	1	6	D.T.—CEDRELA Australis, Red Cedar Tree; very handsome foliage; deep red in autumn. 60ft.	1	6
E.S.—BROWALLIA Jamiesonii, yellow. 8ft.	1	0	E.S.—CERASUS Luro-cerasus (English Laurel). 20ft.	1	0
E.S.—BRUGMANSIA Knightii, large, white, trumpet-shaped flower; very showy. 10ft.	1	0	E.S.—Lusitanica (Portugal Laurel). 20ft.	1	0
E.S.—BUDDLEA GLOBOSA. 10ft.	1	6	The Laurels are old English favourites; they will thrive well here if planted in good strong soil.		
E.S.—Paniculata. 20ft.	1	6	CHERRIES, DOUBLE FLOWERING.—		
Good for hedge and shelter purposes.			These we have specially imported from Japan, where double-flowering		
BRUNSFELSIA (Franciscea)—					
E.S.—Americana, pure white, very sweetly scented. 6ft.	1	6			
E.S.—Eximea, flowers blue and white at same time. 5ft.	1	6			

S D		S D	
cherries, peaches, and plums are one of the sights of the world. We have some 10 varieties of the very choicest. Price, 1s 6d.		E.T.—CORYNOCARPUS Laevigatus, Karaka Tree of New Zealand. 50ft. .. 1 6	
E.T.—CERATOPETALUM Gummiferum, the Christmas Bush. Forms lovely specimens, and will do well in ordinary garden soils in N.S.W. 40ft. 1 6		A pretty evergreen, producing white flowers and a plum-like fruit; very hardy.	
D.T.—CERCIS Siliquastrum (Judas Tree), flesh color. 20ft. 1 6		E.S.—COTONEASTER Buxifolia, white. 3ft. 1 6	
E.T.—CERATONIA Siliqua (Carob Tree), 30ft. 1 6		E.S.—Microphylla, white 1 6	
The Carob Tree, St. John's Bread, or Locust Tree, makes splendid lawn specimens. Pods and seed valuable for stock feeding. Very hardy.		E.S.—Simmonsii. 8ft. 1 0	
E.S.—CESTRUM Auranticum, orange, 8ft 1 0		E.S.—CROTOLARIA Trifoliastrum, yellow. 20ft. 1 6	
E.S.—Diurnum, white, 4ft 1 0		E.S.—CRATÆGUS (Hawthorn or May)	
E.S.—Nocturnum, brown. 6ft. 1 0		D.S.—White, double. 12ft. 1 0	
E.S.—Purpureum, purple 1 0		D.S.—Pink, double. 12ft. 1 0	
Free-flowering, evergreen shrubs.		D.S.—Red, double. 12ft. 1 0	
D.S.—CHIMONANTHUS fragans (Allspice), yellow, splendid for shrubbery; flowers in mid-winter, and perfumes the surrounding air. 10 to 12 ft. 1 6		E.S.—Crenulata. Bears a profusion of red berries, very decorative 1 0	
E.S.—CHRISTIA Grandiflora. 5ft. 1 6		E.S.—Pyracantha, evergreen, bearing bunches orange-red berries; very attractive 1 0	
Compact shrub, flowers red and yellow.		D.S.—Carrierii. 15ft. 1 6	
E.S.—CHRYSANTHEMUM Frutescens (Paris Daisy), white. 4ft. 1 0		A recently introduced variety, white flower, turning to rose, bearing fruit like small crab apple.	
E.S.—Frutescens, double white. 4ft. .. 1 0		The double flowering Hawthorns should be in every garden, being one mass of bloom in early spring, and very attractive.	
Frutescens, yellow, 4ft. 1 0		E.S.—CUPHEA Jorullensis, yellow and red. 4ft. 1 0	
E.S.—Double yellow 1 0		E.S.—Platycentra, red. 1½ft. 1 0	
E.S.—CHOISYA Ternata 1 6		D.S.—CYDONIA Japonica, scarlet. 6ft. .. 1 0	
Dwarf shrub, with flowers like orange blossoms.		D.S.—Alba Plena 1 6	
E.S.—CISTUS Formosus. 3ft. 1 0		D.S.—Candidissima 1 6	
E.S.—Albidus Rose. 3ft. 1 3		D.S.—Cardinalis 1 6	
Strong and hardy, free-flowering shrubs, known as the Rock Rose.		D.S.—Rosea Plena 1 6	
E.S.—CLETHRA Arborea (Lily of the Valley Tree). 6ft. 2 0		D.S.—Sanguinea Plena, double red, 6ft. 1 0	
Flowers pure white, compact growth; forming a magnificent shrub.		D.S.—Sanguinea Nivalis, white. 6ft. .. 1 0	
E.S.—CLIANTHUS Puniceus (Parrot's Beak), pink. 6ft. 1 6		Handsome shrubs; should be largely planted. Bloom in late winter, or very early spring.	
E.S.—Puniceus, Albus, pure white, 5ft. 1 6		D.T.—CYTISUS Laburnum. 20ft. 1 0	
Useful for training against fences, etc.		D.T.—Adami, the Purple Laburnum. 8ft. 1 6	
COPROSMA.		D.S.—Purpureus. Dwarf deciduous shrub, purple flowers 1 6	
E.S.—Baueriana picturata, orange and green variegated. 6ft. 1 6		E.S.—Proliferous (Tree Lucerne). 8ft. 1 0	
E.S.—Lucida, a handsome evergreen shrub, with bright shining leaves, very hardy, thrives well anywhere. 5ft. 1 0		E.S.—CYPHOMANDRA Betacea. The Tomato Tree, an Ornamental Tree, bearing a profusion of edible fruit; makes a good preserve. 10ft. 1 6	
Variegata. 6ft. 1 0		E.S.—DAPHNE Indica Rubra, red. 3ft. .. 2 0	
E.S.—CORONILLA Glauca. 4ft. 1 0		E.S.—Odora, white. 4ft. 1 6	
E.S.—Valentina. 3ft. 1 0		They are pretty, very highly perfumed, free bloomers, suitable for bouquets; universal favourites.	
		D.S.—DEUTZIA (Wedding Bells), Crenata, fl. pl. 1½ft. 1 0	
		D.S.—Argentea 1 0	
		D.S.—Campanulata 1 0	
		D.S.—Candidissima Flore Plena; semi-double flowers. 6ft. 1 0	
		D.S.—Corymbiflora 1 0	
		D.S.—Discolor Grandiflora 1 0	
		D.S.—Gracilis. 1½ft. 1 0	

	S	D		S	D
D.S.—Lemoinei Compacta	1	0	E.S.—EDWARDSIA Microphylla, New Zealand Laburnum. 12ft.	1	0
D.S.—Pride of Rochester, double flowering, pure white. 5ft.	1	0	Handsome evergreen, flowering shrub, and quite hardy.		
D.S.—Rosea	1	6	E.S.—ELEGANUS Japonicus Aureus. 10ft.	1	6
D.S.—Scarbura. 6ft.	1	0	E.S.—Japonicus. 15ft.	1	6
Beautiful flowering plants, which cannot be out of place; all the varieties produce white flowers, and good foliage.			E.S.—Longpipes, very elegant, hardy shrub; the fruit is edible. 6ft. ..	2	0
D.S.—DIERVILLEA (Wiegelia) Alba, white	1	0	Very useful plants for covering unsightly fences, etc.; also fine, hardy shrubs.		
Abel Carriere, flowers of rich, rosy crimson colour. 4ft.	1	0	ELM (See Ulmus).		
Amabilis. 6ft.	1	0	E.S.—EULALIA Japonica. 4ft.	1	6
Amabilis Variegata. 6ft.	1	0	E.S.—Zebrina. 4ft.	1	6
Hybrida Coccinea, red. 6ft.	1	0	Grass-like foliage of a dark green, mottled with yellow spots, and very decorative.		
Max Billard	1	0	E.S.—EPIPHYLLUM Speciosissimus Cactus, crimson, shaded purple	1	6
Mad. Lemoni, white. 6ft.	1	0	E.S.—Russellianum, rose	1	6
Verschafeltii	1	0	E.S.—Truncatum, crimson and purple	1	6
Gustave Maceat	1	0	A hardy class of plants, and very showy when in bloom.		
Mad. Courterier	1	0	E.S.—ERIOSTEMON Nerifolius, pale pink, 10ft.	1	6
Van Houtii	1	0	Handsome flowering shrub, being covered with star-shaped flowers early in spring.		
Jean Mace, flowers of very dark crimson purple color. 4ft.	1	0	D.S.—ERYTHRINA		
These are very desirable and beautiful plants for the garden; they are profuse bloomers, and require but little attention. They produce fine clusters of tube-shaped flowers.			D.S.—Bidwilli. 5ft.	1	6
E.S.—DIOSMA Ericoides. 3ft.	1	6	D.T.—Caffra. 20ft.	1	6
Charming little evergreen plant, with light feathery foliage, which is, during September and October, studded with small starry white flowers.			D.T.—Crista Galli. 20ft.	1	0
E.S.—DIPLACUS Hybrida. 3ft.	1	6	D.S.—Compacta, crimson. 4ft.	1	6
A dwarf yellow flowering shrub, very attractive evergreen.			Erythrinæ, or Coral Trees, are splendid objects in large or small pleasure grounds, producing large spikes of brilliant coloured flowers; they will thrive in the poorest soil, or even barren sand.		
E.S.—DOMBEYA Dregiana. 8ft.	1	6	E.T.—EUCALYPTUS Citriodora, lemon scented. 75ft.	1	0
Mollis. 8ft.	1	6	E.T.—Corynocalyx, sugar gum, 100ft. ..	1	0
Mastersii, white. 8ft.	1	6	E.T.—Ficifolia, scarlet, one of the finest flowering shrubs in cultivation; should be planted in every garden. 15ft.	1	6
Evergreen free-flowering shrubs, with good foliage; flowers perfumed, white in colour, with yellow eye; requires plenty of space.			E.T.—Globulus, Tasmanian Blue Gum. 100ft.	1	0
E.S.—DORANTHES Excelsa (Gigantic Lily); a striking native scarlet flowering plant. 12ft.	1	6	We list only a few of the ornamental varieties of this large genus. Globulus is the well known Tasmanian Blue Gum, the wonderful health-giving qualities of which are so well known. In a young state it is very handsome, and grows very quickly.		
Palmerii; a North Australian species; red shading to white	1	6	E.S.—ESCALONIA Exoniensis, white Dwarf. 6ft.	1	6
DRACÆNA			E.S.—Macrantha, scarlet. 3ft.	1	6
E.S.—Australis. 8ft.	1	6	E.S.—Montavidiensis, white. 20ft.	1	6
E.S.—Draco—Dragon's Blood. 10ft. ..	1	6	E.S.—Rubra, red. 6ft.	1	6
E.S.—Fragrans. Splendid for shrubbery; free flowering	1	6	Beautiful free-flowering evergreen plants, all worth growing; Montavidiensis has white flowers borne in bunches; it will stand clipping.		
E.S.—Nutans. 8ft.	1	6			
E.S.—Stricta. 10ft.	1	6			
Handsome, tropical-looking plants; hardy.					
E.S.—DURANTA ALBA, white. 6ft.	1	0			
E.S.—Plumieri, blue. 6ft.	1	0			
A pretty family of dwarf growing evergreen shrubs, very free-flowering, and quite hardy; make pretty dwarf hedges, being almost constantly in bloom. (See also Hedge Plants).					
E.S.—ECHIUM Candicans, very showy; spikes of flowers 18 inches long; deep blue in colour. 3ft.	1	0			

	S	D		S	D
E.S.—EUGENIA Jambosa Malacensis (rose apple). 20ft.	1	6	E.S.—GENISTA Alba, the white flowering broom, a very floriferous shrub. 8ft.	1	6
E.S.—Myrtifolia, white, with crimson berries. 20ft.	1	6	Fine ornamental plant, with handsome foliage and attractive flowers.		
E.S.—Smithii, native Lilli Pilli. 20ft.	1	0	D.T.—GLEDITSCHIA Horrida (Honey Locust Tree), a splendid deciduous tree. 30ft.	1	6
E.S.—Ugni, white. 3ft.	1	6	E.S.—GOLDFUSSIA Anisophylla. 3ft.	1	0
E.S.—Uniflora, Brazilian Cherry; a good fruit. 20ft.	1	6	E.S.—Glomerata. 3ft.	1	0
Beautiful myrtle-leaved evergreen, rather slow growing, but ornamental; some of the varieties have blue and purple berries.			E.T.—GREVILLEA Robusta (Silky Oak). 40ft.	1	0
E.S.—EUNYMOUS Japonica. 12ft.	1	6	The well known Silky Oak, grand for street planting in hot districts.		
E.S.—Alba Variegatus. 6ft.	1	6	E.S.—GYNERIUM (Pampas Grass). E.S.—Argenteum. 10ft.	1	0
E.S.—Alba Latifolius. 12ft.	1	6	Roseum. 10ft.	1	6
E.S.—Aurea Marginatus. 6ft.	1	6	Beautiful strong growing grass-like plant, throwing plumes of lovely white and pink flowers.		
E.S.—Argenteus Marginatus. 6ft.	1	6	HIBISCUS. 6ft.	1	6
E.S.—Radicans. 4ft.	1	0	E.S.—Camdeni, single red. 6ft.	1	6
Very useful, hardy evergreens.			E.S.—General Courteges, scarlet, large, 6ft.	1	6
E.S.—EUPHORBIA Splendens. 4ft.	1	6	E.S.—Grandiflorus, crimson, black centre. 6ft.	1	6
Pretty flowering plant, being covered with crimson flowers; often called "Thorn of Christ."			E.S.—Lambertii, double crimson. 6ft.	1	6
E.S.—EUPOMATIA Laurina. 12ft.	1	6	E.S.—Rosa Sinensis, scarlet. 6ft.	1	6
An evergreen shrub, bearing curious flowers and foliage; a native of Australia; flowers perfumed.			D.S.—Syriacus, Pulcherrimus	1	6
FAGUS Sylvatica (Beech). 60ft.	1	6	„ De La Reine	1	6
D.T.—Sylvatica Cupreus, copper color, 50ft.	3	6	„ Elegantisimus, double rose	1	6
D.T.—Sylvatica Purpureus. 50ft.	1	6	„ Speciosa Ruber, double red	1	6
E.T.—FICUS Australis. 60ft.	1	0	„ Bicolor Hybrida, white and rose, double ..	1	6
E.T.—Benjaminii, the Weeping Fig, 40ft.	2	6	„ Amaranthus, violet red, double	1	6
E.T.—Macrophylla, Moreton Bay Fig, 100ft.	1	0	„ Pomponne Rouge, double red	1	6
This genus is remarkable for its brilliant foliage, and far surpasses all others as shade trees. They form enormous trees, and seem to thrive anywhere, excepting Benjaminii and Elastica, which do best in tropical climates.			„ Compte de Flandre, double purple	1	6
D.S.—FORSYTHIA Viridissima, yellow, very showy. 5ft.	1	0	„ Violet Clair, double blue	1	6
D.S.—Variegata Aurea. 5ft.	1	6	„ Violacens Atrop, fl. pl., double purple	1	6
D.T.—FRAXINUS Excelsior (Ash). 50ft. ..	1	0	Among our very best flowering shrubs, and as they are so thoroughly adapted to our climate, and fulfil so many requirements of the flower garden, they can be safely recommended.		
D.T.—Excelsior Aurea (Golden Ash), 25ft.	2	0	E.S.—HABROTHAMNUS Elegans, scarlet, 6ft.	1	0
D.T.—Alba (American Ash). 50ft.	1	0	E.S.—Scabra, red. 4ft.	1	0
Very effective for street planting. The Golden Ash being very distinct in wood and foliage.			E.S.—Newelli. 5ft.	1	0
E.S.—FOURCROYA Gigantea Variegata, very ornamental for lawns or large shrubberies, and park planting. 8ft.	1	6	Handsome flowering, quick growing, evergreen shrubs; very hardy.		
E.S.—GARDENIA Fortunei, fl. pl. 4ft. ..	1	6	D.S.—HALESIA Tetraptera, Snowdrop or Silverbell tree, white, 15ft.	1	6
E.S.—Globosa, flowers white and globose, very handsome. 15ft.	1	6	E.S.—HAKEA Suaveolens, white, 10ft. ..	1	6
E.S.—Intermedia, very free flowering. 3ft.	1	6	E.S.—Eucalyptoides, scarlet, 12ft.	1	6
E.S.—Magnifica. 4ft.	1	6	Eucalyptoides blooms during winter, and is very showy.		
E.S.—Radicans. 1ft.	1	6	HAWTHORN (See Crataegus).		
E.S.—Thunbergi. 12ft.	1	6			
Evergreen flowering shrubs; foliage of a beautiful dark glossy green, and the lovely pure white flowers are most deliciously fragrant.

E.S.—Hendersonii Variegata, 3ft.	1	0	A fine genus of plants, very ornamental on banks of rockeries or dry places, some of them producing magnificent tall spikes of white and cream flowers; very hardy, and will grow anywhere in the warm climates, even in pots or vases. Aloefolia Variegata is a superbly variegated variety.		
E.S.—Hulkei, lavender, 4ft.	1	0			
E.S.—Imperialis, a brilliant amaranth red, changing to magenta, 3ft.	1	0			
A useful tribe of free-blooming, soft					

CUPRESSUS, PINES & OTHER CONIFERS.

VERY suitable for planting in private gardens, parks, or cottage garden. Are of very easy culture, preferring a deep, rich, rather heavy soil, which is better for being trenched 18 to 20 inches deep. The Pines, Cupressus, etc., form good wind breaks (Insignis being especially planted for this purpose).

SPECIAL QUOTATIONS PER 100 AND UPWARDS. Also for Extra Sized Plants, 4 to 6 feet.

	S	D		S	D
ARAUCARIA—			CEDRUS—		
Cunninghami, 100ft.	1	6	Liboni (Cedar of Lebanon). Very graceful, 8ft.	1s 6d to	2 6
Bidwilli (Bunya Bunya), 100ft.	1	6	Deodara, 80ft.	1s 6d to	2 0
Excelsa (Norfolk Island Pine), 150ft.	1	6	Atlantica, 80ft.	1s 6d to	2 0
Imbricata (Monkey Puzzle), 40 to 60 ft. ..	2	6	Deodara should have a sheltered position, where it can spread out its great wing-like branches and cover the whole surface of the ground; with tall trees for a back-ground; it thrives admirably.		
Magnificent ornamental trees. Excelsa will grow on the coast, but not too far from the sea. Cunninghami is very handsome, with quite a unique appearance. Bidwilli (Bunya Bunya Pine) leaves deep green, shining, and very prickly.			CRYPTOMERIA—		
ABIES—			Elgans, 50 to 60ft.	1	6
Douglasii (Silver Fir), 100ft. ...	1s 6d to	2 6	Japonica, 60 to 80 ft.	1	6
Excelsa, 80 to 100 ft.	1s 6d to	2 6	Elgans, of upright habit, well branched foliage, changes from green to bronzy crimson during the winter. Japonica, rapid-growing tree, pyramidal; branches pendulous, bright green foliage.		
Smithiana, 80 to 100 ft.	1s 6d to	2 6	CUPRESSUS—		
Alba (White Spruce), 50 to 60 ft. ...	1s 6d to	2 6	Lawsoniana, 50ft.	each	1 6
Pinsapa, 50 to 60 ft.	1	6	Marcocarpa, 50ft.	1s ea., 10s doz., 70s 100-	
Menziesii, 80 to 100ft.	1s 6d to	2 6	Africanus, 50ft. Foliage a beautiful glaucous green	1	6
Beautiful trees of symmetrical but rather slow growth; should be in every plantation. When making young growth, they are clad with beautiful pale green foliage; quite hardy; resemble the Scotch Firs.					

	S	D
Sempervirens (upright Cypress), 40 to 50 ft.	1	0
Lambertiana, True; one of the best; 30 to 50 ft.	2	6
Lambertiana, Aurea; very beautiful, 30 to 50 ft.	2	8
Knightii; hardy in all parts, 60 to 80 ft.	1	0
Torulosus (Tufted Cypress), 70 to 80 ft. ..	1	6
Benthamiana, 40 to 50 ft.	1	0
Corneyana (Gracilis), 40 to 50 ft.	1	6
Funebris (Funeral Cypress), 40 to 50 ft. ..	1	0
Goveniana, 50 to 60 ft.	1	0

Most largely grown of all the Conifers, embracing a variety of beautiful quick-growing trees; they all do well near Sydney, and in nearly all parts of the State.

DAMMARA—

Australis, 50ft.	2	0
Robusta, 80ft.	2	0

Indigenous to Australia and New Zealand. Suitable for coastal lands.

JUNIPERUS (Juniper).

Africanus. Very dense, growing 6 to 8 ft.	1	6
Bermudiana (Pencil Cedar), 30 to 40 ft. ..	1	6
Chinensis (Chinese Juniper), 30 to 40 ft. ..	1	6
Hibernica. Close growing, and very compact, 10 to 15 ft.	1	6
Virginiana (Red Cedar), 30ft.	1	6

Hardy, upright-growing Conifers; will thrive in any climate; distinct in form and foliage, and contrast with Cupressus or Pines.

LIBOCEDRUS

Decurrens (Incense Cedar), 18ft.	1	6
---------------------------------------	---	---

Dwarf handsome tree; densely branched, conical shaped.

NORFOLK ISLAND PINE (See Araucaria)

PINUS

Insignis (Remarkable Pine), 100ft.	1s ea., 9s	
and 10s doz.		
Canariensis (Canary Pine), 60 to 70 ft. ..	1	0
Halepensis (Alleppo Pine), 80 to 100 ft. ..	1	0
10s doz.		
Pinea (Stone Pine), 80 to 100 ft.	1	0
Sylvestris (Scotch Fir), 80 to 100 ft.	1	0
Maritima (Pinaster), 80 to 100 ft.	1	0

Fine for planting near the sea, or exposed situations.

Longifolia, 80 to 100 ft.	1	6
Muricata (Bishop's Pine), 60ft.	1	6

This family includes some of the finest trees in cultivation. They are hardy, quick-growing, and beautiful specimens.

PODOCARPUS

Elatus. The largest variety, 50 to 60 ft. ..	1	6
Spinulosus, 60 to 70 ft.	1	6
Totara (New Zealand Yew Tree), 60ft.	1	6

RETINOSPORA.

Pisifera, 16 to 18 ft.	1	6
Ericoides, 6 to 8 ft.	1	6
Obtusa, 20 to 30 ft.	1	6
Plumosa, 15 to 20 ft.	1	6

A beautiful tribe of tree shrubs from 15 to 20 feet high, closely allied to the Cupressus family, which they resemble; close habit, branching, and pyramidal.

SALISBURIA

Adiantifolia (Malden Hair Tree), 60ft.	1	6
---	---	---

A fine tree, with foliage somewhat resembling an Adiantum; it is not evergreen, however; lovely in autumn.

TAXODIUM

Sempervirens. Quick growing, 200ft.	1	6
--	---	---

TAXUS (Yew)

Argentea Variegata, 20ft.	2	0
Hibernica Variegata, 20ft.	2	0
Baccata (English Yew), 20ft.	1	6

A very handsome tree shrub; quite hardy, compact in growth, and with good foliage.

THUJA

Lobbi. Handsome tree from California, 50ft.	1	0
Doniana. Distinct and graceful, 16ft.	1	6
Orientalis, pyramid growth, 10 to 12 ft. ..	1	0
Aurea, compact growing, deep golden tinge, 4 to 8 ft.	1s 6d to 10	6

Beautiful family of plants, of compact dwarf habit of growth. T. Aurea is a Golden Thuja, of great beauty. All the family are hardy anywhere, except in coldest districts.

THUJOPSIS

Borealis, 40ft.	1	0
Dolabrata, 80ft.	1	6
Dolabrata Variegata, 40ft.	1	6

Hardy evergreen coniferous tree, resembling the Thuja.

WELLINGTONIA (Big Tree of California)

Gigantea (Redwood)	2	6
-------------------------	---	---

In a young state it is of a beautiful habit of growth, and, although rather slow growing, it is always worthy of a place. Only suitable for high altitudes in the State.

YEW (See Taxus).

SPECIAL ROSE COLLECTION.

We are prepared to supply these, our own selection: **24 Well grown Plants**, post free in N.S.W., for **20s.**

BE VERY CAREFUL OF OUR ADDRESS.

HARDY CLIMBING PLANTS.

EVERGREEN AND DECIDUOUS.

	S	D		S	D
E.—Asparagus Plumosus	1	0	E.—BEAUMONTIA Grandiflora, white, a magnificent climber, bearing large trumpet-shaped flowers, highly perfumed	1	6
E.—Asparagus Tennissimus	1	0			
Loyely when trained to a wall in half-shade, say, under a verandah.			BOUGAINVILLEA.		
E.E.—AKEBIA QUINATA. A beautiful climber from Japan; flowers are of a dark heliotrope color; borne in small clusters	1	6	E.—Glabra, rose lilac	1	6
E.—ALLAMANDA Hendersonii, large yellow flowers; thrives best against a wall, likes a warm aspect; a handsome climber	1	6	E.—Glabra, Sanderiana, rose	1	6
AMPELOPSIS (Virginian Creeper).			E.—Grandiflora, magenta	2	6
D.—Hederacea	1	0	E.—Speciosa, purple, white centre ..	1	6
D.—Hoggii, foliage large, ornamental ..	1	0	E.—Spectabilis, rose lilac	1	6
D.—Muralis	1	6	E.—Splendens, crimson	2	6
E.—Sempervirens	1	6	Bougainvilleas like a warm, northerly aspect and shelter; their flowers are magnificent, and they continue to bloom for a long time. Glabra may be grown as a shrub, but is best trained against a wall in a northerly aspect.		
D.—Veitchii	1	0	E.—CANAVALLIA Bonariensis	1	6
D. Veitchii Purpurea, foliage beautifully tinted red	1	0	Has scarcely an equal in extent or quickness of growth, or beauty of foliage; its leaves are large and of a brilliant shining green, with bright-purplish red spikes of pea-like flowers.		
D.—Species Nova. A new variety from the Continent, where it is very highly spoken of	1	0	CLEMATIS Jackmanii, varieties	2	0
Grown for their beautiful autumn-tinted foliage. A Veitchii Purpurea adheres to walls in the same manner as ivy, and has a most picturesque appearance.			Montana (American Virgin Bower), pure white; a valuable climber, suitable for all parts of the colony ..	1	6
E.—ANTIGONON Leptopus, pink	1	6	Deciduous plants of great beauty; require a sheltered position and good soil; grown on a trellis they are very effective; produce large single and double flowers of a variety of colors.		
A charming slender creeper, producing an abundance of bright flowers and bracts.			E.—COBCEA Scandens, dark purple	1	6
E.—ARISTOLOCHIA Elegans. Blackish purple flowers of peculiar shape, one of the most beautiful and free-flowing of this genus	1	6	Alba, white	1	6
BIGNONIA.			This is one of the best creepers, and very suitable for covering a trellis; it grows freely, has fine foliage, and produces an abundance of bloom.		
E.—Australis, Wonga Wonga Vine	1	6	E.—DOLICHOS Lignosus, white	1	0
E.—Capreolata, very distinct	1	6	„ „ pink	1	0
E.—Gracillia, yellow	1	6	Fast-growing twiners.		
D.—Grandiflora, orange bronze	2	0	E.—FUCHSIA Procumbens. A distinct species, valuable as a climber; flowering during winter season	1	0
E.—Jasminoides, rose and white ...	1	6	E.—FICUS Stipulata, Climbing Fig	1	0
E.—Lindleyana, lavender	1	6	E.—Minima, very pretty small-leaved variety	1	6
D.—Radicans, red	1	6	Adhering to walls, fences, rocks, and are very useful in general.		
E.—Tweediana, a rich yellow	1	6	E.—GELSEMIUM Sempervirens	1	6
E.—Venusta, orange	1	6	A beautiful climber, corolla of the flower deep yellow, with protruding anthers.		
D.—Madame Galen, brownish red, distinct	1	6			
E.—Mackenzii, rosy lilac; very fine ..	1	6			
All the Bignonias are worthy of a place in the garden, being of easy culture, fast growers, and profuse bloomers.					
Venusta, when grown on a trellis, or trained against a wall, is unsurpassed in the profusion or magnificence of its large racemes of bright orange-colored flowers during the winter.					

	S	D		S	D
E.— HEDERA (Ivy), <i>Helix</i>	1	0	E.— NASTURTIIUM (Double Flowering), brick-red, striped yellow	1	0
E.— <i>Helix Rhomboidea</i> Variegata	1	0	Scarlet Flower	1	0
E.— <i>Maderiensis</i> Variegata, a fine variety of the Variegated Ivy, the leaves being broadly margined with white; the best Ivy yet introduced	2	0	Two charming, hardy, quick-growing climbers, with fine foliage; profuse bloomers, and perfectly double flowers.		
E.— <i>Tricolor Marginata</i>	1	6	D.— PHASEOLUS Carracalla (snail flower) ..	1	0
Ivies are so well known that they need no description here, further than to remark that no garden or grounds should be without them; they thrive well anywhere.			A slender climber, with full foliage, producing clusters of lovely lilac flowers, shell-shaped; very curious and beautiful.		
HONEYSUCKLE (See <i>Lonicera</i>).			E.— PHYSIANTHUS Albans (arrange or cruel plant), white flower, somewhat resembling <i>Stephanotis</i>	1	0
E.— HOYA CARNOSA, Wax Plant	1	6	PASSIFLORA (Passion Flower).		
Variegata	1	6	E.— <i>Cœrulea</i> , blue and white	1	0
IPOMÆA .			E.— <i>Constance Elliott</i> , beautifully white ..	1	6
E.—Hardy, pink	1	0	E.— <i>Edulis</i> (Edible Passion Fruit), white, tinged purple	1	0
E.— <i>Learii</i> , blue	1	0	E.— <i>Eynesford Gem</i> , purplish crimson ..	1	6
This plant has few equals for fast growth and beautiful foliage. Flowers are supported on a long, graceful tube. Average size of flowers four inches across.			Very ornamental climbers, doing well in almost all localities, excepting where very cold.		
IVY (See <i>Hedera</i>).			E.— QUISQUALIS Indica, producing beautiful sweet-scented flowers of white orange and crimson on the same racemes	1	6
JASMINUM .			E.— RHYNOSPERMUM Jasminoides	1	6
E.— <i>Gracilis</i> , white, 5ft.	1	0	Jasminoides, Variegated	1	6
E.— <i>Grandiflorum</i> , white, 10ft.	1	6	A bright, perfumed, white-flowered creeper, of quick growth and fine foliage; it is evergreen and hard, except in the coldest districts.		
D.— <i>Nudiflorum</i> ; yellow, 10ft.	1	0	E.— SOLANUM JASMINOIDES, white, a fast-covering climber	1	6
E.— <i>Officinale</i> , white, 8ft.	1	0	E.— <i>Seaforthianum</i> , beautiful clusters of blue flowers	1	6
All flowering; some of them have beautifully scented flowers.			D.— <i>Wendlandii</i> . One of the most superb summer flowering vines it is possible to conceive; it blooms continuously, each one nearly 3 inches across, as many as 100 being in a cluster. The color is an attractive shade of lavender blue, strikingly beautiful	1	6
E.— LATHYRUS Latifolius Alba	1	0	E.— STEPHANOTIS Floribunda	1	6
E.—Pink Beauty	1	0	<i>Stephanotis</i> is prized as a first-class plant for exhibition; it is usually grown in the green-house, but will do well in warm situations out of doors. The foliage is wax-like, and the flowers are pure white, and produced in abundant clusters.		
E.— <i>Pubescens</i> . Lovely purple lilac color; a great acquisition	1	0	E.— STIGMAPHYLLUM Ciliatum	1	6
Everlasting peas.			Producing orchid-like flowers, yellow.		
E.— LONICERA GIGANTEA. The growths it makes in one season are truly marvellous, fine panicles of bloom, exceedingly showy, are quite eight inches in length, and of a clear buttercup yellow	1	6	E.— SOLLYA Heterophylla, blue, an excellent climber, producing pretty flowers of various shades of blue	1	6
E.— <i>Aurea Reticulata</i> , white and yellow	1	6	E.— SOLANDRÀ Grandiflora, yellow	1	6
E.— <i>Caprifolium</i> , English	1	6			
E.— <i>Confusca</i> , yellow	1	0			
E.— <i>Tartarica Splendens</i> , scarlet	1	6			
A large family (Honeysuckles) of charmingly-scented flowered climbers and trailers with fine foliage; of quick growth; flowers abundantly.					
D.— MANDEVILLEA Sauveolens	1	6			
A beautiful, slender, deciduous creeper, bearing lovely white flowers and fine foliage.					
E.— MANETTIA , bicolor, yellow and red ..	1	6			
A useful climber.					
E.— MAURANDYA Alba, white	1	0			
E.— <i>Barclayana</i> , blue	1	0			
Beautiful close-growing little climbers; would do well on a wire fence or on a verandah trellis.					

	S	D
TACSONIA (Passion Flower).		
E.—Exoniensis, rose pink	1	0
E.—Ignea, intense scarlet	1	0
E.—Manicata, scarlet color	1	6
E.—Mortii, magenta color	1	6
E.—Mollissima, pink	1	6
E.—Van Volxemii, crimson color	1	6
This family is distinguished from the Passiflora by the long cylindrical tubes of the calyx of their flowers; they are very handsome, quick-growing, beautiful climbers.		
THUNBERGIA.		
E.—Laurifolia, large blue flowers	1	6
Fine, free-flowering plant of great beauty.		
E.—VINCA ARGENTEA VARIEGATA (Periwinkles). Useful for low bordering; trailing habit	1	0
D.—VITIS LEBRUSCA, large-leaved American vine	1	0

	S	D
D.—Vitis Coignetia (Glory Vine). Handsome dark-red foliage; very attractive; vigorous grower	1	6
VIRGINIAN CREEPER (See Ampelopsis).		
WISTARIA.		
Magnifica, blue flowers when in full leaf	1	6
Multijuga, a Japanese variety, with dark purple racemes; attains a length of from 2 to 3 ft.; an extra fine form	2	6
Sinensis, lavender	1	6
„ fl. pl.	2	0
„ Alba	2	0
Wistaria Sinensis is a handsome climber, and strikingly unlike any other. In deep soil it grows to an enormous size. The flowers hang in pendant clusters a foot long. The time of flowering is early spring; the plant is in full bloom before it puts forth a leaf.		

AZALEAS.

PRICE, 15s. TO 18s. PER DOZEN. OUR OWN SELECTION.

	S	D
A. BORSIG. Pure white, double, fine form and substance; very choice variety	2	0
A. DE VERVAENNE. Deep rose, double, a compact, free-growing variety	2	0
ALBA. Old white	1	0
ALBA MAGNA. Large white, occasionally striped	1	6
APOILLON. Pure white, carmine stripes, fine variety	1	6
BERNARD ANDREA—ALBA. Double white; very fine	1	6
BOUQUET DES ROSES. Rich rose	1	6
CHARMER. Bright amaranth, of good form, and petals of great substance ..	1	6
COMTE DE CHAMBORD. Salmon rose, bordered and striped pure white, crimson amaranth spot in centre; a really splendid variety.	2	0
COMTESSE DE FLANDERS. Very large flower, clear satin rose	1	6
COMTESSE EUGENE DE KERCHOVE. Semi-double, white, flaked with red-dish carmine	2	0
DAME MELANIE. Very bright rose, edged with pure white, carmine blotch	1	6
DAPHNE. Pure white, double, occasionally sparingly striped pink, edges crisp; a very fine variety	2	0

	S	D
DEUTSCHE PERLE. —This is, without doubt, the best double white yet seen out, being very free-flowering, early blooming, and well adapted for forcing purposes. The flowers are of snowy whiteness, very double, and lasting a long time in perfection ..	2	0
DISTINCTION. Salmon, white margin ..	1	0
DUC DE NASSAU. Large, dark rosy purple; extra fine	1	6
DUCHESSE ADELAIDE DE NASSAU, Red shaded with violet, double	1	6
EBORINA PLENA. Double white, slightly shaded with yellow; a fine, handsome variety	2	0
ELLA. Pale pink ground, deeply margined with white and flaked with rosy lilac; blooms of immense size and splendid substance; a magnificent exhibition variety, of good habit and free growth	2	0
EMPEREUR DE BRESIL. Large double rose, of exquisite form, banded with white, upper petals marked with glossy red	2	0
EMPRESS OF INDIA. Flowers perfect; the outer segments are gracefully wavy and well expanded; the segments which occupy the centre are carmine, white, and salmon rose, the colors being admirably set off by each other; double	2	0

	S	D		S	D
EULALIE VAN GEERT. Rose-edged white	1	6	with carmine, densely spotted with crimson	1	6
FIELDER'S WHITE. Very pure white; large and of better substance than Alba	1	0	REINE DES PAYS BAS. Violet pink, margined with white, shaded with rich crimson	1	6
FLAG OF TRUCE. Pure white, double; large and fine	1	6	REINE DE PORTUGAL. Pure double white	1	6
GLORY OF SUNNING HILL. Rich, pink; double	1	6	ROI D'HOLLANDE. Deep scarlet; fine form	1	6
GLOIRE DE LEIDBERG. Bright rose	1	6	ROI LEOPOLD. Deep scarlet, dark spots on upper petals	1	6
GRAND DUCHESS DE BADEN. Orange scarlet; fine form; double	1	6	SOUVENIR D'EXPOSITION. Lilac, edged white	1	6
HELENE THELEMAIN. Beautiful soft pink; double	1	6	SOUVENIR DE PRINCE ALBERT. Deep rose, broadly margined with white; very showy and distinct; double ..	1	6
PRINCESS ALICE. Pure white; double	1	0	STELLA. Bright orange scarlet, deep violet stain on upper petal	1	6
PRINCESS OF WALES. Pure white, very double and well formed, outer petals broad, of good substance, and well rounded; profuse bloomer, free-grower, and altogether the finest double white we have ever seen	2	0	THEODORUS. Bright orange scarlet with rich violet upper segments; fine, large, well-formed flowers	1	6
PUNCTULATA. Creamy white, striped vermilion and scarlet; double; early	1	6	TRIOMPHE DES DOUBLE BLANCS. Double white, late flowering variety; very fine	2	0
QUEEN OF BEAUTIES. Salmon pink, margined with white and flaked					

AZALEA MOLLIS.

QUITE a distinct type of plant to the foregoing, being deciduous. Perfectly hardy; profusely covered with blooms of deep yellow colour. 2s. each.

BEGONIAS.

Variegated Foliage, in variety.

These are remarkable for their variegated and beautifully-colored ornamental foliage. 1s. to 2s. each.

Tuberous Rooted, Single and Double.

We offer a choice strain of selected seedlings of this gorgeous section of Begonias. They will be found most suitable for cool greenhouse and conservatory decoration, and also for the hardy fernery. Their magnificent flowers are produced in profusion during the Summer and Autumn, varying in color from pure white to the deepest scarlet and crimson. As Winter approaches the plants die down, and the tubers rest until Spring. They should then be carefully stowed away in a quiet corner until they begin to show signs of starting, when they should be re-potted and watered carefully until they make strong growth. Care should be taken that the bulbs are not allowed to shrivel during the time they are at rest. Price, 1s. to 2s. each; 10s. to 15s. per dozen.

Herbaceous, Shrubby Variety.

LARGE COLLECTION OF THESE. GRAND FOR SMALL BORDERS. 1s. TO 1s. 6d. EACH.

BAZAAR PLANTS A SPECIALTY WITH US.

BAZAAR PLANTS.

We specialise in making up collections of these suitable for bazaars and fetes for charitable or other purposes, and send only such as we know secure ready sales. Our collections are acknowledged by promoters to be the **VERY BEST VALUE** they have ever received; and sales in many instances nett 100 per cent. clear profit on cost of plants, packing and, in many instances, very high freights.

It is only necessary to state amount it is intended to expend, and leave the selection in our hands.

BOUVARDIAS.

STRONG PLANTS IN 5-INCH POTS, 1s. EA.; 10s. DOZ.

SMALLER PLANTS IN 4-INCH POTS, 9d. EACH; 8s. DOZ.

BEAUTIFUL dwarf plants for outdoor cultivation in the warmer districts; and in colder parts of the colony they may be grown with advantage if slightly protected during the winter months. The plants bloom profusely during the year, and some even in winter. They are charming for bouquets. The varieties are from pure white to deep crimson, and some are perfumed. They should be in every garden.

- ALFRED NEUNER.—Double petals, waxy white, beautiful.
- BEAUTY OF BRISBANE.—Pure white, very robust habit, free flowering.
- BOOCHIL.—Bright pink, with white throat, very fine.
- BRIDAL WREATH.—White, slightly shaded blush; a fine free-flowering variety.
- CARDINALE.—White tube, carmine petals, very effective.
- CORAL QUEEN.—Scarlet, with white throat.
- COUNTESS HOPETOUN (F.C.C.).—Color rosy Salmon, changing with age to flesh pink; blooms very large and of great substance; are freely produced for a long season, with remarkable lasting qualities in a cut state.
- DAZZLER.—Fiery red.
- DUCHESS OF YORK.—A colonial-raised variety of remarkable merit. It is a very cheerful blush pink, shading to a tinge of heliotrope. Similar to Beauty of Brisbane.
- ELEGANS.—Color intense vermilion-scarlet, rich and bright; a well-tried variety.
- ETNA.—Reddish vermilion; double flowers, very distinct.
- ETHEL KERSLAKE.—Flowers large, pure white, and highly perfumed; of the same type as Mrs. G. H. Kerslake. The plant is dwarf, and more branching habit, trusses larger and more freely produced. 1s 6d.
- FLAVESCENS.—Improved. Yellow, changing to white.
- fl. pl.—Double yellow.
- HOGARTH, fl. pl.—Dark scarlet.
- HOGARTHI.—A good hardy variety, producing masses of scarlet flowers.
- HUMBOLDTII CORYMBIFLORA. — Improved snow-white.
- JACQUINIFLORA.—Bright scarlet, hardy.
- KING OF SCARLETS (F.C.C.).—The immense blooms of this deep scarlet variety are freely produced on the terminal and lateral branches; vigorous grower; exceptionally good variety.
- LAURA.—Salmon rose, single; fine variety; distinct color.
- MABEL PORTER.—Dark scarlet, very large trusses. 1s 6d.
- MAIDEN'S BLUSH.—Bright bluish pink.
- MAFEKING.—Crimson; dwarf-growing; distinct.
- METEOR.—Brilliant scarlet flowers; fine truss, short thick pipe; strong, vigorous habit; a fine addition to this beautiful class of flowering plants.
- MISS IDA CHEESEMAN.—A very distinct variety with large flowers of a pale, delicate pink color, the tube and reverse of petals being of a deeper shade, giving it a charming appearance; the plant is compact and robust, a very free bloomer, and is very sweetly perfumed, a quality that most varieties are devoid of. 1s 6d.
- MRS. G. H. KERSLAKE.—This sterling novelty is an entirely new type of Bouvardia, combining the large flowers of B. Humboldtii Corymbiflora, with the larger truss and free flowering qualities of the smaller flowered section. The segments are variable—four to six—large, massive, and waxy white, set upon a very stout tube of medium length; deliciously fragrant, dwarf, sturdy habit, and keeps in condition for three or four days after being cut. 1s 6d.

MRS. McCULLOCH (2 F.C.C.).—A beautiful Bouvardia, producing immense trusses of large flowers of reddish salmon color; flowers best in autumn and winter. 1s 6d.

PRESIDENT CLEVELAND.—Very large, brilliant scarlet.

PRESIDENT GARFIELD.—Double rose.

PRIORY BEAUTY.—Pale shade rose, very fine, large trusses.

RUBRA.—Dark red; single; distinct.

SALMON QUEEN.—An exceedingly fine Bouvardia; color salmon, with a darker tube, very distinct; flowers profusely through the whole season. 1s 6d.

UMBELLATA CARNEA.—Cream white, changing to rosy blush.

VICTOR LEMOINE.—Double sacrlot.

VREELANDII.—White, hardy.

WALLHALLOW.—Improved Laura, having larger truss of bloom.

CANNAS.

THERE is probably no class of plant that has been so greatly improved upon during recent years as Cannas.

We have a splendid collection, embracing some 30 varieties, and shall be glad to furnish names and descriptions to planters.

PRICES, 9d TO 1s 6d EACH; 8s. TO 12s. DOZEN.

CAMELLIAS.

WE propagate about 150 varieties of these, but only catalogue a few of the very choicest. Customers would do well to leave selection in our hands.

PRICE, 1s. 6d. EACH.

ALBA PLENA.—White, fine. 2s each.

ANGELO COCCHI.—White, striped rose.

ARCHDUCHESS AUGUSTA.—Red, white stripe.

ASPASIA.—White, pink spots.

AUGUSTA SUPERBA.—Pink cupped.

BLANDA.—Rose, very hardy.

BONOMIANA.—White stripes, splendid flower.

CANDIDISSIMA.—White, very beautiful.

CALLIOPE.—Pink and white stripes.

C. H. HOVEY.—Velvety crimson, shaded violet.

COMPESSE CALLINA.—Pure white, fine.

DE LA REINE.—White, spotted with lake red.

DIONISIA PONIATOWSKI.—Pure white, perfect flower.

DRYADE.—Rose, fine form.

FIMBRIATA ALBA.—Splendid, white-fringed; 2s each.

FLORENCE.—White.

GREAT EASTERN.—Red, very large and showy.

GRUNELLI.—White, free bloomer.

GUILFOYLE'S HELENA.—Pink striped, red.

HARRIET BEECHER SHEATHER.—Rosy salmon, fine flower, free bloomer.

HELLENOR.—Large, carnation striped.

IMBRICATA ALBA.

IMBRICATA.—White, striped with rose.

INNOCENCE.—Pure white.

ISABELLA.—Large and handsome; white.

JUBILEE.—Delicate pink, rose striped, splendid.

LADY ST. CLAIR.—Pale pink.

LA PACE.—White, shaded rose, striped crimson.

LAVINIA MAGGI.—White, crimson blotches.

MARIA THERESA.—Blush, crimson spots.

MIRANDA.—White, very hardy.

MRS. FAIRFAX.—Rose pink.

MRS. HOPE.—Blush color.

MRS. MORT.—Flesh splendidly imbricated.

MATHOTIANA ALBA.—Large, pure white.

PAULINE MAGGI.—Pure white, very double.

PRINCESS LOUISE.—Pure white, very fine.

PRINCE FREDERICK WILLIAM.—Superb rose, reflexed, perfect shape.

REINE DE BEAUTES.—Very delicate, clear rose, good form, extra fine.

ROSA MADIAT.—Carmine, blotched with white.

SARAH FROST.—Bright red, splendid.

SULPHEUROUS.—Dark red.

TABBS.—Crimson, marbled and blotched with white.

TRICOLOR IMBRICATA.

VALTEVEREDO.—Vivid rose; fine.

VANDESIA SUPERBA.—Striped carmine.

VENUS DE MEDICIS.—Crimson, veined rose.

VIRGINIA FRANCO.—Rose, changing to spot pink, flesh margin.

WRIGHTII.—Rich crimson, large, magnificent.

ROSES BY THOUSANDS: TRY OUR SPECIAL COLLECTIONS.

CARNATIONS.

WE hold a large stock, embracing some 50 or 60 varieties of this popular flower, and can furnish lists of varieties if desired; or, if customers will leave the selection to ourselves, we shall send the very best and most distinct. In ordering, please state if Spring Flowering or Perpetual Flowering are required. Prices, 1s. each; 9s. doz.; 10s. doz. post free.

CHRYSANTHEMUMS.

CULTURE.

THE Chrysanthemum adapts itself to any climate. It will grow in almost any kind of soil.

But, to produce the vigorous plants and fine blooms seen at the Metropolitan Shows, the plants require, in the more advanced stages of their growth, soil of a rich and more substantial nature. As Chrysanthemums produce far more flower buds than they can bring to maturity, it is necessary to disbud them to a great extent, as it greatly enhances the beauty of the blossoms without decreasing too much the supply of flowers. Where show blooms are desired, a much more liberal treatment and excision is, of course, necessary.

PRICE, 1s. EACH; 9s. DOZEN. POST FREE.

WE HAVE A SPLENDID COLLECTION OF THIS POPULAR FLOWER, AND ISSUE SPECIAL LIST IN SEPTEMBER.

DELPHINIUMS (Perennial Larkspur).

This is one of the showiest of hardy perennials, producing long spikes of all shades of blue; they excite the admiration of all lovers of flowers. Strong plants. As seedlings (see Annual List). 2s per dozen.

EDGING AND CARPET BEDDING PLANTS.

ALTERNANTHERA Aurea Nana.—Foliage yellow and green, very dwarf and pretty; per doz., 2s; per 100, 7s 6d.

ALTERNANTHERA Paronychoides.—Foliage rosy pink, red, and green. Per doz., 2s; per 100, 7s 6d.

BOX.—Dwarf (the true Dwarf Dutch). Per 100, 7s 6d.

BOX.—Common Dwarf. It takes 100 plants to lay 20ft. Per 100, 5s.

ECHEVERIA Secunda Glauca.—Very pretty dwarf, succulent plant, suitable for dry situations. Per 100, 5s.

IRISENE Lindenii.—Foliage deep blood red. Per doz., 2s; per 100, 10s

PYRETHRUM Aureum.—Golden Feather; a very pretty edging, with bright golden foliage. Per 100, 4s.

THRIFT, Dwarf.—White; a very neat edging. For 50ft., 2s.

THYME.—Lemon. Makes a beautiful edging, and stands the heat well; enough for 100 ft., 2s 6d.

THYME, Variegated Lemon.—This also makes a good edging, grows stronger than the above; sufficient for 100ft., 2s 6d.

BUFFALO GRASS.

This grass is much esteemed for lawns, edgings, and grass plots generally. Roots should be planted from 6 to 12 inches apart, in spring or autumn. Price, per sack, 10s; per bushel, 3s.

ERICAS—The Heath.

THESE lovely plants cannot be too highly recommended for flowering purposes. They thrive best in a peaty soil, but will succeed in ordinary garden soil. Manure should not be put near the roots. During the dry season they should be kept well watered.

PRICE, 1s. 6d. TO 2s. EACH.

ANDROMÆDIFLORA.—Pale pink.

ARBOREA.—White.

AUTUMNALIS.—Red.

BEASONSFIELDIANA.—Pale yellow.

BOWIEANA.—Pure white.

CAVENDISHII.—Yellow.

CANDIDISSIMA.—White.

CHARSLEYANA.—Rose pink.

CERINTHOIDES CORONATA.—Fine scarlet.

CHENTYANA.—Light rose.

HYBRIDA.—Red; one of the best.

HYEMALIS.—Pink and White.

INTERMEDIA.—Pure white; very long spikes.

JUBILEE.—Deep rose, large spikes.

LINNÆOIDES.—Rose.

MACKINNONIANA.—Pink.

MAMMOSA.—Purple.

MELANTHERA.—Purple.

PYRAMIDALIS Gracilis.—White.

RÆGERMINANS.—Small, pink, sweet-scented.

RUBENS.—Dark rose.

VENTRICOSA Globosa.

VENTRICOSA Impressa.

VESTITA Coccinea.—Scarlet.

VULGARIS.—Purple, Heather of Scotland.

WEBLEYANA.—Light waxy rose, very beautiful.

WILMOREANA.—Pink and white.

DAHLIAS.

WE have a magnificent collection of these very gay garden plants. The Cactus varieties are particularly attractive. Blooming can be maintained from January to May in favourable seasons. They must have plenty of water and manure to induce good flowers. Tubers and green plants are available from September to December, and may be planted late, especially the Cactus varieties, which really bloom better when planted late.

TUBERS ready beginning of August; GREEN PLANTS September to December.

1s. EACH; 10s. DOZEN.

SPECIAL LISTS PUBLISHED IN SEPTEMBER NEXT.

FERNS AND LYCOPODS.

WE have a splendid collection of these elegant plants in stock, at prices varying from 1s to 7s 6d each, the price being regulated according to the variety and size of the plant.

BE VERY CAREFUL OF OUR ADDRESS.

FUCHSIAS.

OUR list of Fuchsias embraces all the best we know to be in cultivation, and amongst them are many well-grown plants of great beauty.

Fuchsias demand shelter from the wind, plenty of water during dry weather, with a mulching during the summer, and the ordinary treatment of other outdoor plants. They may be grown without much trouble, and make splendid decorative plants; any good garden soil will suit them.

1s. EACH; 10s. DOZ.; 11s. DOZ., POST FREE.

ARABELLA—White tube and sepals, corolla rosy pink.

AURORA SUPERBA—Sepals recurved, of a coral color, very large; purple corolla.

BEAUTY OF EXETER.—A novelty in color, being a mixture of light and crimson.

BLACK PRINCE.—Sepal-carmine, pale pink corolla, margined with deep rose.

COUNTESS OF RANFURLY.—Red tube and sepals, white veined, red corolla.

FAIR MAID.—Creamy white, tube and sepals tinted blush; corolla deep carmine, flushed magenta.

GENERAL ROBERTS.—Drooping habit; sepals rose, deepening into the corolla of shaded crimson.

MRS. HENRY ROBERTS.—Tube and sepal rose, corolla dark crimson shade.

MRS. MARSHALL.—Tube and sepals white, corolla pink.

PEASANT GIRL.—Tube and sepals tinted with blush, corolla pink and carmine; slightly shaded violet.

ROSE OF CASTILE.—White sepals, corolla violet.

RUPERT.—Short tube completely hid by the broad recurved cerise-red sepals; single corolla, very large and spreading, of a rich, bright purple; veined and suffused with crimson at base.

STAR OF WILTS.—White sepals, salmon corolla.

SPECIOSA.—Tube and sepals flesh color, rosy carmine corolla.

Double Fuchsias.

ALFRED RAMBAUD.—Very large double flowers, reflexed scarlet sepals, rich violet corolla.

AVALANCHE.—Tube and sepals crimson, purple corolla.

CHRISTOPHER COLOMB.—Large scarlet sepals, enormous carmine double corolla.

COUNTESS OF HOPETOUN.—Very large corolla, pure white, dark red sepals.

DE CHERVILLE.—Large double rose corolla, sepals dark red and well reflexed.

DUCHESS OF EDINBURGH.—Double white; good variety.

EDMUND ABOUT.—Double white, carmine sepals; white corolla, suffused with red.

EXTRAORDINARY.—Plum color, with red sepals.

FRAU EMMA TOPFER.—Distinct and novel; tube and sepals rosy coral, corolla clear rosy blush; large.

GERTRUDE.—Semi-double; white, veined carmine.

JUBILEE.—Sepals crimson; rosy mauve corolla.

JUMNA.—Bright crimson sepals, rich purple double corolla, the base marked with rosy crimson.

MADAME BRUANT.—Sepals bright red, reflexed, corolla lilac-mauve, maculated and veined with rose.

MADAM JULES CHRETIEN.—Short, sepals reflexed crimson, pure snow-white corolla.

MOLESWORTH.—Sepals bright carmine, reflexed, corolla double; unusually large, and pure white.

MONUMENT.—Corolla deep purple, outer petals striped carmine, tube and sepals crimson.

MRS. H. CANNELL.—White, large.

MRS. E. G. HILL.—Sepals crimson, double white corolla.

NOVEAU MASTDONTE.—Dark violet, veined red.

PHENOMENAL.—Short tube and reflexed, sepals crimson, corolla azure violet, flaked red.

STORM KING.—Sepals rosy coral, corolla rosy blush.

VICEROY OF CANADA.—Violet corolla.

VICTOR HUGO.—Large, blood-red sepals; large, double corolla; violet-purple, marbled red.

VIOLET LE DUC.—Reddish, expanded corolla of a metallic violet.

WHITE GIANT.—White corolla, red sepals.

WHITE JUBILEE.—Enormous; sepals red, reflexed corolla.

Hybrid Fuchsias.

- BOLIVIANA**.—Rich crambise crimson-colored trumpet-shape flowers; tube 3ln. in length.
- CRIMSON BEDDER**.—The leaves are crimson and bronzy green, striped with white.
- EARL BEACONSFIELD**.—Tube and sepals light rosy carmine, corolla deep carmine.
- FURST OTTO VON WERNIGERODE**.—A very pleasing shade of pink; quite distinct.
- GRACILIS**.—Dwarf variety; flowers very small.
- GRACILLIS VARIEGATA**.—Dwarf, leaves green, broadly margined with white.
- MARY**.—A very pretty and attractive variety,

producing rich crimson flowers and bright green foliage.

MRS. RUNDLE.—Sepals flesh colour, while the corolla is orange-scarlet; single.

PROCUMBENS.—Bearing large, scarlet, edible berries; plant is a trailer, and may be made to cover a fence.

SUNRAY.—The leaves are of a bright rich crimson, white and bronzy green in equal parts; one of the showiest of the variegated-leaved Fuchsias.

TRIPHYLLA.—A fuchsia of very handsome and distinct character, having neat, dark, bronze-green foliage, and producing bunches of medium-sized Fulgen-shaped flowers of a brilliant orange-scarlet colour.

Greenhouse, Bushhouse & Verandah Plants.

NOTE.—Those marked * can only be grown satisfactorily under glass, but most of the others named will do well either in ordinary bush-house or on a verandah.

HEDGE PLANTS.

AFRICAN BOX THORN (<i>Lycium Horridum</i>). Plant 12 inches apart; 2s 6d per 100, 20s per 1000; not less than 500 at 1000 rate. This prickly hedge plant is a quick-growing evergreen, suitable for fencing large gardens.	HAWTHORN QUICKS (May). Plant 9 inches apart. 3s per 100; 25s per 1000; not less than 500 at 1000 rate. A fine, thorny, deciduous hedge plant, which flowers freely in the spring.
BOUGAINVILLEA SANDERIANA GLABRA. Plant 2ft. apart; makes a pretty hedge and flowers abundantly. 15s per doz.	HIBISCUS , sorts. Plant 3 feet apart. 1s 6d each; 15s per doz. Will make a grand ornamental flowering hedge. See descriptions in general shrub list.
COPROSMA LUCIDA. Plant 3ft. apart. 8s per doz. This is a good hedge plant, and is particularly hardy, especially on the sea coast.	LAUREL (English). A favourite hedge plant in England, and does equally well in cooler parts of this State. Strong plants, 8 and 10 inches, 6s doz.
DURANTA PLUMERII. A neat-growing evergreen hedge plant, bearing clusters of purplish blue flowers; very fragrant. 5s doz.; 30s 100.	LIGSTRUM LUCIDUM. Plant 12 inches apart. 1s 6d per doz.; 10s per 100; not less than 50 at 100 rate. Extra strong, transplanted, 15s 100.
EUGENIA MYRTIFOLIA. Plant 3 feet apart; very ornamental. 10s per doz.; 60s per 100.	MACLURA AURANTIACA (Osage Orange), an excellent plant for forming hedges. 7s 6d per 100. Strong growing hedge plant.
EUONYMUS , Golden. A very striking plant for hedges or single specimens, the foliage being beautifully margined and marked with gold; young plants, 6s doz.	OLIVE , Common (<i>Olea Europa</i>). Plant 12 inches apart. 1s 6d per doz.; 10s per 100; not less than 50 at 100 rate. The very best hedge

plant for this State, as it withstands drought and heat splendidly, is a quick grower, and stands any amount of cutting back.

PITTOSPORUM CRASSIFOLIUM. 8s per doz.; 60s per 100.

PITTOSPORUM EUGENOIDES. 8s per doz.; 60s per 100.

PITTOSPORUM EUGENOIDES, Variegated. 12s per doz.; 90s per 100.

PITTOSPORUM NIGRESCENS. 8s per doz.; 60s per 100.

PITTOSPORUM UNDULATUM, the well known Victorian Laurel. 8s per doz.; 60s per 100.

These make a fine evergreen hedge for a garden, and can be trimmed close into any desired shape. The foliage is handsome, and of a fine fresh green colour. Plant in single rows, 2ft. apart.

PLUMBAGO, white and blue. Plant 2 feet apart. 7s per doz.; 50s per 100.

PRUNUS MYROBOLANA. The Myrobolan Plum. This plant is being very largely planted in England and the Continent, as a hardy, everlasting hedge plant. It is allowed to reach 8 and 10 feet, at which it is kept trimmed, when it becomes very dense. It has the advantage of bearing

heavy crops of plums; in appearance somewhat similar to the American Cherry Tree Plum. Strong 3ft. trees, 6s doz.; 40s per 100.

PRIVET, Evergreen. Plant 12 inches apart; 1s 6d per doz., 7s 6d per 100; not less than 50 at 100 rate. Of all the shrubs tried for hedging, none can compare with the Privet.

PRIVET, Golden. Plant 11 inches apart. 4s per doz.

RAPHIOLEPIS (Indian Hawthorn). Plant 2 feet apart; good flowering hedge. 7s 6d per doz.; 50s per 100.

RHAGODIA HASTATA (Salt Bush). Plant 12 inches apart. 1s 3d per doz.; 7s 6d per 100; not less than 50 at 100 rate. The silver-grey, neat-looking hedges which are to be seen in various parts of our suburbs are made with a native plant—*Rhagodia Hastata*—which is popularly known as Salt Bush.

TECOMA CAPENSIS. Bright red flowering hedge. 10s per doz.; 60s per 100.

VIBURNUM TINUS. Plant 2 feet apart; useful, evergreen hedge. 10s per doz.; 60s per 100.

PURPLE GUAVA. Makes a neat hedge, being covered in luscious fruit from June to October. Plant 3 feet apart. 9s doz.

CUPRESSUS AS A HEDGE.

FOR this purpose several of the Cypress family are admirably adapted, especially upright Cypress and *Macrocarpa* and *Lambertiana*. These, if planted about 3 feet apart, and kept closely cut, say, two or three times a year, form a close, dense, compact hedge, and are very effective. The *Thurja Orientalis* can also be used for this purpose.

PALMS.

WE have a grand stock of the various varieties in all sizes, from dwarf Kentias, in fancy pots for table decoration, to extra large specimens for hall, stage and conservatory work; and shall be glad to furnish customers with any further particulars. Prices quoted are for ordinary sized plants.

RAILWAY STATION PALMS.

(SEE BRAHEA FILAMENTOSA).

WE hold a large stock of this hardy and handsome Palm, and cannot too highly recommend it for planting in almost any part of the State. Plant in the open border, choosing the deepest soil.

TABLE AND HALL PALMS.

WE are daily being asked, particularly by Sydney and suburban residents, why it is they cannot keep Palms beyond a few weeks of purchasing. This is easily explained; and, we regret to say, is owing to unprincipled growers of these lines, who pot and sell to the public before the plant is established in the pot. In many instances, we know of Kentias being lifted and potted one day and sold the next; and it is obvious that these plants, when placed in a hot, dry room, begin to die almost at once.

OUR PALMS are well established in pots, having a good roothold. All have been three months in the pots, and in some instances 2 and 3 years, and with fair treatment (an occasional sponging of leaves, and, where possible, a few days now and again in a bush house) will last for years, and improve in appearance daily.

DON'T BE MISLED by CHEAP offer of PALMS. as in most instances they are valueless.

PELARGONIUMS .

(Regal and Decorative).

12s. TO 15s. PER DOZEN.

This name is applied to that magnificent group of Pelargoniums, the flowers of which possess of form and extra number of petals, havethough not really double, yet from their fullness are of large size, very rich, and showy, and althe appearance of being so.

BEAUTY OF OXTON. The upper petals are of a very rich maroon color, darkly blotched, the under petals very dark crimson, shaded with maroon; light centre, tinted with rose; all the petals are margined with white and beautifully fringed.

BLACK PRINCE. A fine flower of a bright maroon color, with dark shading and pale margin; very free.

CAPTAIN RAIKES. The flowers are very large and full, fiery crimson, flaked with purplish black and bordered with carmine; semi-double.

CHAMPION. Fine trusses of beautifully crimped flowers, flushed rose, lower petals, spotted crimson lake, upper petals blotched maroon, surrounded fiery crimson.

CONDUCTOR. Bright carmine, upper petal blotched with maroon, light centre.

DECORATOR. Rosy crimson, petals spotted dark crimson.

DUCHESS OF ALBANY. Upper petals deep lilac, blotched and veined with maroon, edged soft lilac, lower petals rosy lilac, edged with pale rose; very distinct.

DUCHESS OF BEDFORD. Purest white, prettily fringed, with feathered spots of delicate rose in the upper petals; habit dwarf, compact.

DUCHESS OF EDINBURGH. Flowers white, with purple blotch, beautifully fringed, large truss, and very free; dwarf habit.

DIPLOMATIST. Rosy purple, maroon, tipped clear white eye; good habit.

EDWARD PERKINS. Very large flowers, brilliant orange carmine, with dark blotches on the upper petals.

EMPEROR OF RUSSIA. An exceedingly distinct and showy variety, each petal having an equal cloud of dark maroon crimson, elegantly marked with a pure white belt.

FAIRY QUEEN. Pure white, upper petals lilac; one of the best fancy pelargoniums.

GOLD MINE. Rich orange scarlet, upper petals blotched dark maroon, large white eye; distinct.

G. SHEPHERD. Brilliant orange crimson, large truss; fine decorative variety.

HER MAJESTY. An extremely fine variety, producing immense trusses of large, well-shaped pure white flowers, beautifully undulated and fringed; almost double. Was awarded a First Class Certificate by the

Victorian Horticultural Improvement Society, 1885, and was also awarded a First Class Certificate by the Royal Horticultural Society of Victoria, 1886.

MADAME THIBAUT. White, blotched and marbled with rose, upper petals marked with crimson maroon, large white centre.

MISS LILY CANNELL. A very pretty flower, crimson scarlet petals, shaded with a rosy purple and edged with white, light centre; a very showy and effective variety.

MRS. HARRISON. Flowers large; color, pink, striped white, white centre and margin.

MARIA MAILLET. Upper petals white, with a crimson blotch, lower petals maroon, shaded white.

MONSR. DESMONLIN. Deep rose, dark blotch, light throat and edges; large and free.

PERSIMMON. Intense orange scarlet color, massive bold flowers and enormous trusses; plant of vigorous habit.

PRINCE OF WALES. Bright vermillion, light centre and light edge to petals, dark blotch.

PURPLE EMPEROR. A decided improvement in this color; fine bold open flowers forming into large trusses, upper petals feathered and blotched maroon; distinct.

QUEEN VICTORIA. Flower semi-double, of a rich vermillion color, all the petals broadly margined with pure white. A very pleasing and attractive variety.

ROB ROY. Purple, lower petals rosy, top petals black, white eye.

ROSE QUEEN. Bright pink, brown red spot in upper petals; distinct.

ROSETTA.—Purple shaded rose, maroon spots in upper petals; distinct.

ROBINA. Salmon rose.

SISTER OF MERCY. Rose, with two black blotches on upper petals.

SULTANA. Lower petals rosy purple, top marked black, lilac margin, clear white centre.

ST. VISTA. Bright scarlet, white throat, large, bold flowers; very floriferous.

VOLONTE NATIONALE. Flowers extra large and of good shape, each petal blotched with rosy carmine, margined with a broad band of pure white, white throat, beautifully crimped.

Variegated Bi-color and Tri-color Leaved Pelargoniums.

A fine collection of all the best varieties in cultivation.

PRICE, 1s. EACH; 10s. PER DOZEN.

Ivy Leaved Pelargoniums. Choice Selected, Double and Single.

All the newest and best sorts. These are a very useful class of Pelargoniums, suitable for covering fences, training on walls and pillars, and planting on rockeries. They also make good bedding plants, being in flower most of the year.

PRICE, 10s. to 12s. PER DOZEN.

ZONALE PELARGONIUMS.

We cannot recommend any family of plants that are more suitable for our hot climate than the Zonale Pelargonium. Of late years there has been a vast improvement made in these, and we now offer a choice selection of the best in cultivation.

We can supply good plants of all varieties listed from 1s to 1s 6d each, or 10s to 12s doz.

Single Flowering Varieties.

PENSTEMONS.

PRICE, 9d. to 1s. EACH; 7s. 6d to 9s. PER DOZEN.

We have a splendid collection of these showy perpetual flowering plants, and shall be pleased to furnish lists and descriptions on application.

PHLOXES (Perennial).

The perennial Phlox is one of the finest herbaceous plants for border decoration; it is of easy culture, and remains a long time in bloom, coming in at a season when flowers are getting scarce. To bring them to perfection they should be planted in rich soil, and well-watered when coming into bloom. We have a very large and fine collection.

PRICE, 1s. EACH; 10s. PER DOZEN.

THE PETUNIA.

As an Autumn flowering decorative plant is a great favourite everywhere. We supply in the Spring plants in 4-inch pots, including a double white fringed variety.

DOUBLE VARIETIES, 1s. each, 10s. per dozen.

For SEEDLING VARIETIES see Annuals.

SALVIAS

AS EFFECTIVE BEDDING PLANTS.

For a glorious show from January to May nothing equals a bed of Scarlet Salvias. These should be planted in a bed by themselves, say, 2 or 3 feet apart, and kept well watered during the growing season. It is advisable to choose dwarf growing varieties round edges of beds. (For list of varieties see Index).

VERBENAS.

WE stock a choice collection of selected varieties of these handsome bedding plants, varying in color from pure white to deep scarlet and blue.

To customers wishing to make a selection themselves, a full list of varieties available will be posted on application. Price 9d each; 6s to 7s 6d per doz.

VIOLETS.

- ADMIRAL AVELLAN.** Rich purple, free flowering, of dwarf compact habit, 2s 6d per doz.; 6d each.
- CALIFORNIA.** Violet purple, single, very large, and of immense fragrance, growth vigorous, an excellent variety for cutting purposes. 2s 6d per doz.
- COUNT BRAZZA** (See Swanley White).
- FEDERATION.** Single, larger than Princess of Wales, very beautiful. 4s per doz.; 6d each.
- ITALIA.** Large single violet purple flowers, strong, robust habit, one of the finest violets. 3s per doz.; 6d each.
- JOHN RADDENBERRY.** Single, pale blue, very strong growing, and very hardy, flowers produced on long footstalks. 2s 6d per doz.
- KING OF VIOLETS.** Dark indigo blue, double, a very handsome flower. 4s per doz.; 6d each.
- LA FRANCE.** A splendid flower, excelling the well known variety, Princess of Wales, color metallic blue, petals round, and flowers of enormous size. 5s doz.
- LEE'S ODORATISSIMA.** Single, purple flowers, very large and deliciously perfumed; 4s per doz.; 6d each.
- LUXONNE.** Violet blue, very large blooms, an improvement on "California." 4s per doz.; 6d each.
- MARIE LOUISE.** Lavender blue, with white centre, flowers very large and deliciously fragrant. 2s 6d doz.; 4d each.
- MAY JACKSON.** Single, pale blue, very pretty, of free growth. 2s 6d doz.; 4d each.
- MARGUERITE DE SAVOIE.** Large, deep, double blue flowers, very free. 4s doz.; 6d each.
- MADAME MILLET.** Double, rose colored flowers, strong perfume; a very distinct and beautiful variety. 4s per doz.; 6d each.
- NEAPOLITAN.** Flowers double, light mauve, very strongly scented and free flowering. 2s per doz.; 3d each.
- ODORATA RUBRA.** Red colored, habit short, very hardy; quite a new color. 4s per doz.; 6d each.
- PRINCESS OF WALES.** A very large, sweet-scented variety, producing flowers of a deep blue shade and of vigorous habit. 3s per doz.; 6d each.
- RAWSON'S WHITE.** A single variety, introduced in England as the finest in cultivation. 2s per doz.; 3d each.
- SWANLEY WHITE.** By far the best pure white double violet in cultivation. It very much resembles the good old Neapolitan in growth, with a large flower and long footstalks. It is, for choice bouquets and cut flowers, quite a gem. 2s 6d per doz.
- THE CZAR.** Flowers large, sweet scented. 2s per doz.; 3d each.
- WELLSIANA.** An improvement on Victoria Reginae and Odoratissima, larger flowers, longer footstalk, and blooms much more continuously. A decided acquisition. 4s per doz.; 6d each.
- WHITE CZAR.** The best single white violet, strong grower, free bloomer. 2s per doz.; 3d each.

ROSES.

GENERAL LIST.

TEA SCENTED & HYBRID TEA.

1s. EACH; 10s. DOZ.

- ADRIENNE CHRISTOPHILE.** Yellow, shaded with rose, coppery centre; large and full, sweet scented.
- AMI MARTIN (H.T.)** Chedane, 1907. Growth vigorous, flowers large, full and globular, always opening well. Color intense vermilion, very fine. 1s 6d.
- AVOCA (H.T.)** Alex. Dickson and Sons, 1907. Crimson scarlet buds, very long and pointed, flowers large and sweetly perfumed, foliage large and very dark green; specially good as a cut-back, making a very fine bush. One of the best of its color in this section. 2s.

- ADMIRAL DEWEY.** A beautiful light blush sport from that universal favourite, Caroline Testout; vigorous.
- ALICE GRAHAME.** Ivory white, tinted salmon; large, full, and splendid form; nice clean grower, first-rate show or garden. Awarded several first class certificates and an Award of Merit N.R. Society.
- ALICE LINDSELL.** Creamy white, pink centre; large, full, fine form, petals stout; good exhibition bloom. Awarded Gold Medal. (Excellent).
- ALICE HAMILTON (China).** Brilliant velvety crimson, fine buds, open flowers, large, semi-double, free flowering.
- ALLIANCE DE FRANCO-RUSSIA.** Tea scented, clear canary yellow, large, very full, and of perfect form, habit of growth vigorous and very free flowering; a great acquisition to our dwarf Tea Roses, where this color has always been greatly in the minority.
- APOTHEKER GEORGE HOFER.** Brilliant bright red; large and full, long buds, very strong grower.
- ANNA JUNG.** Bright rose, slightly tinted salmon and madder, centre coppery, long coppery carmine buds, forms a strong bush with handsome foliage.
- ANGEL PELUFFO.** Interior of petal rosy flesh, centre brilliant rose; flowers grand, full, opening freely; good form; free flowering; 1s 6d.
- ADMIRAL SCHLEY.** Deep cinnabar crimson; a distinct color, and promises to be good.
- ALBERT HOFFMAN.** Varying from pale to deep yellow; outer petals tinged rose; large, full, cupped, with a true tea scent. Award of merit, German Rose Society.
- AUGUSTE COMTE.** Outer petals carmine-red, centre reddish-yellow. The buds are long and extraordinary beautiful, lasting a long time, and highly perfumed; very floriferous; a splendid variety for cut flowers.
- ALBA ROSEA.** White, with pale rosy centre; large, full, and globular.
- ALPHONSE KARR.** Dark crimson, medium size, full, vigorous.
- AILINE SISLEY.** Violet red and rosy purple; vigorous growth.
- AUGUSTINE HALEM.** Rosy carmine; large, full and well formed; very free blooming.
- ANNA OLIVIER.** Rosy flesh and buff, large and full; very beautiful in bud.
- ARCHDUCHESS MARIE IMMACULATA.** Bright red, shaded salmon; large, good form and full; good in all stages.
- ALEXANDRA.** Flowers orange buff, shaded bronze; good shape; first class for cutting; vigorous grower.
- ANTOINE RIVORIE.** Rosy flesh, shaded carmine; base of petals yellow, large and full, rose of the very best.
- ANNA MARIE SOUPERT.** Bright lake red; very large; of splendid form and habit, with strong foot stalks; long buds; growth vigorous, and foliage good; a valuable addition to high coloured varieties of this class.
- AMERICAN BEAUTY.** Rosy cerise, large, full, well-formed.
- AURORA.** Rich, bright, salmon pink, shading to paler pink in outer petals; free blooming.
- BOADICEA (TEA).** Flowers pale peach, deliciously tinted with pink and violet; centre shaded rose; large, full, high-centred, elongated form, with large, stiff petals; absolutely distinct from any rose at present in cultivation; a free grower and grand exhibition bloom.
- BARON H. WERNER.** Creamy white, shaded rose; centre rich salmon yellow, very large bloom, and a free grower.
- BEAUTY OF STAPLEFORD.** Deep rose, bright carmine-centre; large, full and good form; very free grower.
- BELLE SIEBRECHT.** Cross between La France and L. M. Fitzwilliam; color bright rosy pink; petals long and recurved; constant bloomer, and a charming variety.
- BALDWIN.** Blooms large, full shaped like a camellia; color beautiful pure carmine; a continuous bloomer.
- BARONNE C. DE ROCHESTAILLEE (TEA).** Long canary-yellow buds, shaded pink; open blooms, sulphur tinted pink; very large, vigorous, and continuous flowering; strong plants.
- BESSIE BROWN.** A magnificent rose, totally distinct, and the best of its class; blooms creamy white, highly perfumed, of immense size and good form.
- BERYL.** Deep golden yellow, fine long buds; very highly scented.
- BRIDESMAID.** Clear bright pink; a sport from Catherine Mermet; large and full, free bloomer; good exhibition rose.
- BEAUTY INCONSTANT.** Coppery red, shaded carmine and yellow; very variable, quite distinct.
- BARON GASTON CHANDON.** Beautiful clear yellow, fine buds.
- BARON LADE.** Described as a red K. A. Victoria, deep carmine, flowers large and freely produced. (Good, reflexed like A. K. Williams).
- BETTY BERKELEY.** Deep red, verging on crimson scarlet and blood red, a very intense color, buds long and oval, on good foot stalks.
- BETTY.** Blooms extremely large, fairly full, and glorious form; petals 4 to 5 inches long; color ruddy gold; a coppery rose overspread with yellow; growth extremely vigorous. 1s 6d.

- CATHERINE MERMET.** Flesh rose; full, good form, viborous.
- CELIA (H.T.)** Wm. Paul and Sons, 1906. Flowers bright satin pink, centres somewhat deeper, large, full, of circular outline, the centre well raised, and petals reflexed; very free flowerer, and vigorous; quite distinct.
- COUNTESS OF GOSFORD (H.T.)** S. M. Greedy and Son, 1906. Salmon pink rose, and pink running into each other, the base of petals suffused saffron and yellow, and the whole bloom shaded salmon; the color never fades; blooms of perfect form, very long and pointed, petals large and of great substance. Gold Medal N.R.S., 1906.
- CHAS. LEGRADY.** Rosy carmine; large, almost full, fine long bud, vigorous growth.
- CHARLOTTE GILLEMOT.** Ivory white; petals stout and imbricated; very sweet perfume; a grand white rose.
- CLARA WATSON.** Beautiful light-colored rose, centre of bloom shaded salmon and rose; perfect shape, strong grower.
- CORINNA.** Flesh rose, shaded coppery salmon; good habit of growth; good for exhibition.
- CORALLINA.** Deep rosy crimson flowers, shaded coral red; growth vigorous; a charming novelty for decorative work.
- COMTESSE DE BARTHA.** Rosy flesh; globular and fairly full, very free blooming.
- COMTESSE LA FRIGNEUSE.** Bright canary yellow; large and full; long, beautiful bud.
- COMTESSE DE PANISEE.** Rosy buff, veined with violet and carmine; large and full.
- COMTESSE RIZA DU PARC.** Salmon rose, tinted copper, large, full, and free.
- COMTESSE NADAILLAC.** Rosy flesh petals coppery yellow; a grand rose in situations that suit it.
- CORNELIA KOCH.** Pale straw color, nearly white; extra size, good form; grand rose in autumn.
- COUNTESS PEMBROKE.** Soft rose, deeper centre; large, full, and perfect shape, deliciously perfumed.
- CHAMELEON (T. and China).** Rosy flesh, heavy blotch of deep red on outside of petals, autumn flowers often nearly white; pretty in bud. (Good free blooming garden rose).
- CHERRY RIPE (H.T.)** Light cherry crimson, medium size, well formed, full and globular very pretty. Price, 1s 6d.
- CHAS. J. GRAHAME.** A rose of striking distinction; petals dazzling orange crimson; blooms upstanding, large and splendid form; rarely is there a mis-shaped bloom, hence an ideal exhibition variety. 1s 6d.
- COUNTESS ANNESLEY.** Blooms very large, of absolutely perfect form; large, smooth petals of great depth and substance; color distinct rosy salmon, suffused and crayoned with old gold; deliciously perfumed. First class certificate, R.H.S.
- COUNTESS OF DERBY.** Blooms large, perfect, symmetrical, with high centre; petals smooth and shell-shaped; color, centre salmon, outer petals rose; very vigorous; erect growth, flowering throughout the season. 1s 6d.
- CRIMSON CROWN.** Brilliant, glowing dark crimson; base of petals lemon white. Recommended as one of the best bedding varieties extant.
- COL. R. S. WILLIAMSON (H.T.)** Alex. Dickson and Sons, 1907. A truly superb rose. The blooms are large, full, and well formed, with high pointed centre. The petals are round and smooth, and possessed of great substance. Color, satiny white, with deep blush centre, very lovely. The flowers are produced in great profusion, on erect and rigid foot-stalks. First-rate for any purpose. 2s.
- COMTESSE DE SAXE.** Porcelain white; centre shaded yellow; large, full, good shape; free flowering and robust growth.
- COUNTESS OF CALEDON.** Color, rich bright rose, flowers extra large, one of the finest exhibition roses.
- DANMARK.** A variety in way of La France; growth very strong and stout, free bloomer, and a grand show rose.
- DEVONIENSIS.** Creamy white, bluish centre; large, full, and well formed.
- DIRECTEUR REINE GERARD.** Coppery yellow, shaded carmine and salmon, variable.
- DR. GRILL.** Light rose, coppery yellow centre; beautiful bud, but not full.
- DR. CAZANEUVE.** Buds almost black; open flowers, velvety crimson; one of the darkest Teas; growth vigorous.
- DR. FELIX GUYON.** Deep orange; centre apricot; large, opens well and buds very sweet.
- DAISY.** Rosy pink, suffused silvery pink; extra free flowering, perfect shape.
- DAVID PRADEL.** Rosy lilac, deeper in centre; large and full; distinct.
- DEAN HOLE.** A chaste and perfectly formed flower of marvellous beauty. The growth is vigorous and of free branching habit, flowering freely and continuously throughout the entire season. The blooms are very large, of great substance, high centre of fine elongated form; petals very large and smooth; color silvery carmine, shaded salmon; absolutely distinct.
- DR. J. CAMPBELL HALL.** An absolutely distinct beautiful rose of marvellously free and continuous blooming character. The blooms are large, full, and perfectly formed, with high centre; color coral rose suffused white; base of petals yellow; growth vigorous and erect.
- DUCHESS OF ALBANY.** A sport of La France, deeper shade of pink; first-class rose.

DUCHESS MARIE VON RATIBOR. Long buds, deep blood red, shaded maroon.

DUCHESS MARIE SALVIATA. Orange, shaded rosy pink; variable, large long buds.

DUCHESS OF PORTLAND. Color pale sulphur yellow, with an occasional tinge of Eau de Nil; the blooms are large, full, and of perfectly symmetrical form; petals large, very smooth, circular, and of great substance. The growth is robust, of branching habit, flowering freely and continuously throughout the season. 2s.

DOROTHY PAGE-ROBERTS (H.T.) Alex. Dickson and Sons, 1907. This is a most beautiful and novel variety, of very robust and erect growth, and marvellously free, with continuous blooming character. It is an ideal decorative rose. The combination of colors is novel, distinct, and beautiful, being a lovely shade of coppery pink suffused with apricot yellow, more especially at the base of petals, which are very large; massive, and of immense substance. 2s.

DORA (H.T.) Wm. Paul and Sons, 1906. Color peach blossom, with deeper centres, changing to silvery blush, very large, and of full perfect form; growth vigorous.

EDELSTEIN Pure white, buds globular and pointed; large, full and perfect form; growth robust and branching.

EXQUISITE. Bright crimson, shaded magenta, large, full and globular, long and clean; a very free bloomer, and vigorous.

ELIZA FUGIER. Pure white, tinged yellow; Niphetos type; good.

ETOILE DANGERS. Coppery yellow, edged peach red; good.

ERNEST METZ. Soft carmine rose, petals deeper; good show rose, large and full; one of the best.

ENCHANTRESS. Creamy white, tinted buff; growth vigorous, and very free blooming.

EMPRESS ALEXANDRA OF RUSSIA. Red, shaded orange and carmine.

EMILIE GONIN. Very large, full, well-shaped, white, tinted orange, each petal heavily edged with carmine; one of the best. Gold medal Luxembourg, 1896.

EDMOND DESHAYES. Creamy white, shaded flesh in the centre, large and full; a strong grower, carrying erect flowers.

EMANUEL GIEBEL. An improved Madame Falcot, being of a deeper yellow.

EDOUARD LITTAYE. Carmine rose, shaded to amaranth, long handsome buds; free blooming and vigorous.

EDOUARD GAUTIER. Outer petals creamy white, centre rich yellow, full and globular; first-rate show bloom.

EDW. MEYER (Lambert). A rose of marvellous beauty; color, coppery red and yellow, with orange shading, opening to a beautiful yellow; growth, robust and erect; superb.

E. T. COOKE. Beautiful pale crimson yellow, suffused with pink; blooms large, full, and very handsome petals being reflexed at the edges; promises to be a valuable addition on account of its floriferousness, and variety of color.

ETOILE DE FRANCE. Color velvety crimson, centre vivid cerise red; blooms large, full and magnificent; cupped form; very beautiful. Awarded numerous medals and awards on the Continent.

EARL OF WARWICK. Flowers rich, soft salmon pink, shaded in the centre with vermillion; large and full, of beautiful shape and quite distinct from any rose in cultivation. A magnificent variety either for exhibition or decorative purposes; growth vigorous.

ELIZABETH KITTO. Salmon pink, resembling Mme. Abel Chatenay; plants of even habit of growth; an exceedingly free and constant bloomer; excellent for bedding.

ELIZABETH BARNES (H.T.) Alex. Dickson and Sons, 1907. In this rose we have a combination of colors hitherto unknown in any rose. The shades of color are most distinct, novel, and beautiful, and may be described as satiny salmon rose with a fawn centre suffused with yellow; outside of petals deep rosy red, shaded with copper and yellow. The flowers are large and full, with pointed centre, most perfectly formed, and possessing a delightful fragrance. A truly superb and grand rose for any purpose. 2s.

FREIHEER VON MARSCALL. Deep carmine, full handsome bud.

FIAMETTA NABONNAND. Satin white, tinged pale rose; vigorous growth and good.

FLORENCE TRON (Tea Scented). Brilliant carmine tinted with madder red, petals edged with silver, very large and full; growth vigorous.

FRANCIS DUBREUIL. Velvety crimson, reflexed cerise and amaranth; good high color, and good show variety.

FRAU PETER LAMBERT. Dark pink, shaded rose and salmon in the centre; large, full flowers, produced singly on stiff stems, very free; a good show and bedding variety (said to be a pink "Kaiserin A. Victoria").

FLORENCE PEMBERTON. Creamy white, with faint touch of pink; extra size, and perfect in form; strong grower and continuous bloomer.

FRAU ALFRED MAUTHNER (H.T.) P. Lambert, 1907. Growth vigorous, very floriferous, blooms large, full, and of regular form; delicately perfumed, very fine. Color, outer petals silvery rose, centre bright carmine rose. 1s 6d.

FRAN LILLA RAUTENSTRAUGH. Apricot orange, suffused with yellow, tinted rose; flowers large, full and high centre; growth vigorous; good exhibition or garden; first-rate.

- FUSION (T.)** Saffron yellow, with deep chamois yellow centre; of medium size; full.
- GOLDELSE.** A rich golden yellow; seedling from K. A. Victoria, same sturdy habit.
- GUSTAVE GRUNERWALD.** Bright carmine pink, centre clear yellow, large, full, and cupped shape, with high pointed centre, buds long and pointed, yellowish red.
- GENERAL McARTHUR.** Brilliant dark crimson, flowers of exquisite form, petals round, of good substance; growth vigorous; free blooming. An excellent new rose. 1s 6d.
- GROSSHERZOG VON OLDENBERG.** Fine, clear red, large full flowers, fine form. Has received Prize of Honor at the Exhibition of the German Rose Society. Good.
- GROSSHERZOGIN ALEXANDRA (H.T.)** Creamy white, in the way of K. A. Victoria, but the flowers are larger and more cupped, opening well; hard and free flowering; growth vigorous.
- GRUSS AU SANGERHAUSEN.** Flowers scarlet, with deep red centre; large, full, good shape; buds long and handsome; growth vigorous.
- GENERAL GALLIENE.** A rose of great substance; rich metallic red, presenting a somewhat shaggy appearance when fully opened; blooms last a long time in perfect state; a grand acquisition, attracting great attention where exhibited.
- GEORGE SCHWARTZ.** Bright, deep canary-yellow, very deep and rich in color; large and fairly full.
- GLADYS HARKNESS (H.T.)** Salmon pink, of fine form, large and fragrant, growth vigorous; first-class.
- GRACE DARLING.** Creamy white, shaded peach pink; large, full, and excellent form.
- GRUSS AN TEPLITZ (H.T.)** Flowers large and cupped, very free and vigorous; an acquisition on account of its color, which is of the brightest crimson scarlet.
- HERZOG FRIEDRICH II. VON ANHALT (H.T.)** Welter, 1907. Growth erect and vigorous; very free and continuous flowering; the flowers are large, full, and perfectly formed. Color, salmon carmine, centre cinnamon and coppery red. Very beautiful. 1s 6d.
- HARRY KIRK (Tea).** Alex. Dickson and Sons, 1907. Absolutely unique. A splendid rose, of robust growth, with free branching habit, flowering freely and continuously. The blooms are large, full, with smooth petals, of great substance. The form is perfect; the blooms are long and elegant. Color, deep sulphur yellow, passing to a lighter shade at edge of petals. A splendid rose, much the best of its color. Gold medal, N.R.S. 2s.
- HOMERE.** Pale rose salmon, centre petals bordered pink; good form, blooms in clusters.
- HON. INA BINGHAM.** Rose of enormous petals of purest pink, deeply veined, being absolutely a new color in rose world; blooms semi-double, carried on rigid stems; growth very robust.
- HUGO ROLLER (Tea-scented).** Wm. Paul and Sons, 1907. A "pictorial" flower, of the most elegant combination of colors. The ground color is rich lemon yellow, the petals being edged and suffused with crimson; flowers of medium size, of good shape, and very freely produced throughout the season until late in autumn; growth vigorous. A most attractive novelty. 2s.
- HON. EDITH GIFFORD.** Flesh color, centre salmon rose; variable, large, full, and very hardy.
- HELENE GAMBIER.** Varying from rosy flesh to salmon and coppery rose; very full and fine.
- HERZHOGEN MARIE VON C. GOTHA.** Pure white, passing to pale yellow; edged rose. 1s 6d.
- HENRI MEYNADIER.** A distinct shade of rose, large flower; good autumn bloomer.
- HELEN BOULTER.** Satiny flesh, shaded with rose at the centre, and with silver at the edges of the petals; large and full, of good form and erect habit of growth.
- HELENE WELTER.** Brilliant rose color; very large and full, keeping its color well; growth vigorous.
- IRENE.** The color is silvery-white, sometimes faintly touched with pink. It may be appropriately termed a white Caroline Testout, surpassing in constancy and purity of color other light-colored sports and seedlings from this well known excellent rose.
- ISABELLA SPRUNT.** Sulphur yellow; beautiful in bud; blooms abundantly.
- JAKOBS PERLE.** Canary yellow, buds long, flowers large, full and of perfect form; growth vigorous.
- JOSEPH HILL.** Salmon pink, shaded with yellow, buds long and pointed, fine full flower of exquisite form. First Prize at Paris, and First Class Certificate at Lyons; extra-good.
- J. B. VARONNE.** Deep carmine, petals coppery yellow; large, full, beautiful form; very fragrant and free blooming.
- JEAN PERNET.** Large and full; beautiful bright yellow, passing to clear yellow.
- JEANNE BARIOZ (H.T.)** A vigorous growing and continuously blooming sweet-scented variety; blooms very large, full, and well formed. Color, pale salmon centre, vivid salmon on yellow ground. 1s 6d each.
- JOSEPH METRAL.** Deep magenta, changing purple cerise; large and very full.
- JULES TOUSSAINT.** Flowers brownish-red, base of petal citron yellow, outside large and silvery; growth vigorous; quite distinct.

- JULES FINGER.** Deep rose, shaded salmon; large, full and well formed; very free.
- JEAN DUCHER.** Varying from pale lemon to salmon yellow, shaded peach.
- KAISERIN AUGUSTA VICTORIA.** Pure white, with orange centre, outer petals reflexed. A grand variety either for show or garden.
- KILLARNEY.** Buds long and pointed; flesh tinted white and pink; very free and perpetual.
- KRONPRINZESSIN VICTORIA** (Bourbon). Best described as white Malmalson.
- KATHLEEN** (Multiflora Rambler). William Paul and Sons, 1907. Very large pyramidal trusses of single flowers, rich carmine rose, with well defined white eye, exceedingly attractive, produced in great profusion, and lasting a long time in good condition on the plant. Of strong rambling growth, with good foliage. Award of merit, Royal Horticultural Society. 1s 6d.
- LAURENT CARLE** (H.T.) Growth vigorous, erect and branching; buds long, flowers very large, of perfect form. Color brilliant velvety carmine. A most valuable rose, either for exhibition or decorative purposes. 1s 6d.
- LEO XIII.** White, tinged pale yellow, large, full and double; very vigorous and good for exhibition.
- LA FRANCE.** Pale peach, reverse deep rose; large, full and well-formed; very fragrant; good show bloom.
- LA FRANCE DE '89.**—A magnificent bloom, almost like a *Pæony*; brilliant rosy red, lined with white; large, free and distinct.
- LORD TARQUIN.** Pale flesh color, shaded; large, full and good form; free blooming and vigorous.
- LE FLAMBEAUX** (Tea Scented). Growth vigorous, and very floriferous, flowers full and of medium size. Color dark red with scarlet centre. 1s 6d.
- LUCIEN DE LEMOS** (H.T.) Pale rose centre, petals rose white, large, full and cupped; growth vigorous.
- LIBERTY** (H.T.) Flowers brilliant crimson, constant bloomer, keeps its color well after being cut; said to be the most brilliant of all the H.T.'s.
- LADY ROBERTS.** Reddish apricot, the base of the petals coppery-red; large, full, and of good shape. 1s 6d.
- LENA** (T.) A garden or decorative rose. Rose of entrancing beauty and formation. The color is unique, being a glowing apricot, the edges of petals a primrose yellow as the flower ages. The bud is long and perfectly formed. The flowers are continuously produced, frequently producing sprays of from seven to nine perfect blooms. It is, without doubt, one of the most exquisite garden roses extant, being a great advance on *Beryl*; very beautiful.
- L'INNOCENCE.** Large, full and globular; brilliant whiteness; very vigorous seedling from *Caroline Testout*, and a prolific bloomer.
- LUCIOLE.** Bright carmine, tinted yellow; large, full and well-formed; very free and fragrant.
- LADY MARY FITZWILLIAM.** Bright rose; sweetly scented; free bloomer.
- LADY BATTERSEA.** Fine cherry crimson, fair size, pretty in half-opened flower.
- LADY ASHTOWN.** Flowers continuously in the greatest profusion throughout the entire season; the blooms are large, full, with high pointed centre; buds unusually long and beautifully pointed; color very pale Rose du Barri, shading to yellow at base of petals, reflex of petals silvery pink; growth vigorous.
- LADY ROSSMORE** (H.T.) A valuable addition to the darker colored Hybrid Teas. This will prove one of the best decorative or bedding roses, and is frequently fitted for exhibition purposes. The growth is vigorous and erect, flowering freely and continuously throughout the entire season; blooms of medium size and fairly full; color, reddish crimson, with claret shading.
- LE PROGRESS.** Golden yellow, changing to pale nankeen yellow as buds expand; large, full and cupped, opening well.
- LADY WENLOCK.** China rose, suffused with apricot; blooms large and full; long bud. 1s 6d.
- LIGNE ARENBERG** (H.T.) Satin white, outer petals large, those at the centre pointed.
- MADAME MARGOTTIN.** Deep citron yellow; centre deeper.
- MA CAPUCINE.** Deep orange or copper color, shaded rose; beautiful bud.
- MADAME EDWARD HELFENBEIN** (T.) We have several roses which are described as being "coppery," but this beautiful new variety answers the description better than any we have yet seen, being a rich, metallic copper; quite distinct.
- MADAME JULES GROLEZ.** Brilliant China rose, perfect form; one of the best.
- MADAME HOSTE.** Pale straw color or fawn, large, full, well-formed, and very free.
- MADAME CAROLINE KUSTER.** Light yellow, centre deeper, and sometimes coppery; large, full and globular; abundant bloomer.
- MARION DINGEE.** Dark crimson, cupped, very free blooming; effective.
- MRS. G. W. KERSHAW.** A superb addition to this popular class, possessing vigorous and freely branching habit; blooms large, full, and of perfect form, with highly pointed centre, and are produced in great profusion; colour, a deep glowing pink, which gives it a unique charm; absolutely distinct.

- MARQUIS DE MOUSTIER** (Tea Scented). Ivory white, reflexed with pearly white; very large and full; large oval buds, well set up on their stalks; very sweet; growth vigorous.
- MADAME PHILLIPE REVOIRE** (H.T.) Pernet Ducher, 1905. Apricot yellow with lighter centre, shaded pure carmine, flowers large, full and well-formed, very floriferous.
- MADAME MAURICE DONNAY** (T.) Magenta red, sometimes shaded with purple, and assuming rosy tints in opening; large and semi-double, with long pointed buds.
- MRS. PETER BLAIR** (T.) A decorative rose, of exceptional merit. It is of robust habit, with large spines and lovely foliage. The flowers, which are lemon chrome, with golden yellow centre, are freely produced throughout the season.
- MRS. MYLES KENNEDY** (T.). A. Dickson and Son, 1906. A gold medal in every phase of the qualification, having size, contour and finish. This is probably the best tea rose extant. It is a glorified Souvenir de Elise Varden, with vigorous growth and free flowering habit. Its color is a delicate aqueous white, shaded buff, deeper pink in centre, with back edges of petals slightly deeper shade of pink, giving it quite a picotee effect. Altogether a glorious flower. Awarded N.R.S. Gold Medal.
- MARQUISE DE VIVENS**. Bright rose, centre shaded yellow, long, pointed bud, not full; very free and fragrant.
- MRS. W. C. WHITNEY** (H.T.). Clear deep pink, large, full, and elongated, with a distinct and beautiful scent; very floriferous.
- MADAME CAMILLE**. Salmon pink; large, full, and free bloomer.
- MADAME CHARLES**. Rich apricot; medium size; full and beautiful in bud.
- MADAME DE WATTEVILLE**. Creamy white, each petal edged rose; large and full; very fragrant; quite distinct.
- MADAME FALCOT**. Deep apricot yellow, very beautiful bud.
- MADAME JOSEPH COMBET**. Creamy white, shaded rose, centre rosy yellow; large, full, and very fragrant; strong grower.
- MADAME DURAND**. White, centre shaded salmon; large, full and good shape; elegant buds. First Prize at Lyons.
- MADAME ALFRED SABATIER**. Color red, shaded peach; blooms large and full. 1s 6d.
- MADAME MARIE CROBIER**. Deep China rose; very large and full, with upright stalks, and keeping its color well.
- MADAME DE LOISY**. Rosy salmon, heavily tinged with chamois yellow and carmine.
- MADAME PAUL OLIVER**. Salmon, shaded with rosy carmine; very large, full and globular; long floral buds, and fine bronzy foliage.
- MADAME BADIN**. Flowers large and full, bud long, perfectly formed; color bright carmine red with dark flushings; good in winter.
- MADAME GEORGE BOULAND**. Clear yellow, shaded orange and rose; full and free flowering.
- MADAME PHILEMON COCHET**. Satin rose, large, full and globular; constantly in bloom.
- MADAME PHILIP KUNTZ**. Rosy cerise, shaded salmon; extra pretty buds.
- MADAME EDMEE METZ**. Rosy carmine, long pointed buds; free blooming; good grower; a good new rose.
- MADAME HIPPOLYTE JAMIN**. Outer petals white, tinted blush, centre coppery, yellow; vigorous; good show bloom.
- MADAME CHARLES DE LUZE**. Flesh white, with buff yellow centre; color deeper in autumn; large, full, and globular.
- MADAME CHEDANE GUINOISSEAU**. Canary yellow; beautiful in the bud.
- MADAME LUCIEN LINDEN**. Deep yellowish tan color, reflexed with salmon rose, centre coppery red, large and full, with fine long buds.
- MADAME EDMUND SABLAYROLLES** (Tea). Bonnaire, 1907. Flowers very large and full, always opening well; color beautiful clear yellow, with orange centre; very free flowering. A variety of the highest merit. 1s 6d.
- MRS. DUDLY CROSS** (Tea). Wm. Paul and Sons, 1907. Pale chamois yellow, beautifully illuminated in autumn, rich rainbow tints of rose and crimson, in the way of Marie van Houtte, but the flowers are larger, fuller, and of better habit. Young foliage beautifully tinted with red. It makes a fine standard plant, being of free and vigorous growth. 1s 6d.
- MRS. AARON WARD** (H.T.). Pernet-Ducher, 1907. A most vigorous grower, of free branching habit; long buds, borne on erect stems; in form similar to Catherine Mermet, flowers very large and full; color, Indian yellow, occasionally washed with salmon rose. This magnificent variety will prove to be one of the best yellow roses, alike for exhibition or decorative purposes. 2s.
- MADAME J. W. BUDDE** (T.). Soupert and Notting, 1907. Growth very vigorous, flowers large, full, and of perfect form; color brilliant carmine. Absolutely distinct, and first-rate. 1s 6d.
- MRS. ISABELLE MILNER** (H.T.). William Paul and Sons, 1907. Ivory white, suffused with pink, and delicately margined with mauve; in the way of Mildred Grant, being of perfect circular form, and the petals are reflexed at the edges, buds prettily tipped with pink, contrasting beautifully with the open flowers. Growth vigorous. 2s.

Rose—Lyon. (See 1909 Novelties).

Rose—Jos. Hill.

MRS. HAROLD BROCKLEBANK (H.T.). Alex. Dickson and Sons, 1907. A remarkably beautiful addition to this section. The growth is very robust, and of free branching habit, flowering freely and continuously. The blooms are produced on erect footstalks, are large, full and of perfect formation; color creamy white, centre buff, base of petals frequently tinted with salmon rose, buds with a flush of salmon pink. A superb rose for any purpose. Award of Merit, R.H.S. 2s.

MADAME MAURICE DE LUIZE (H.T.). Pernet-Ducher, 1907. Growth vigorous, erect and branching; superb buds, very large flowers, with broad petals, cupped form; color deep rose pink, with cochineal carmine centre, reverse of petals paler in color. 1s 6d.

MADAME RAVARY. Buds golden yellow; open flowers orange yellow; very large, globular, almost full; a hardy variety of vigorous growth.

MADAME LOUIS LAURANS. Deep red, reflexed with magenta; very large, full, sweet; buds long, fine for cutting, and one of the very best red tea roses.

MARQUIS OF SALISBURY (H.T.). Very bright velvety red; medium size, semi-double, very free blooming; a very effective garden rose, with vermilion centre; large.

MARK TWAIN. Pale rose, shaded darker; somewhat like Belle Siebricht.

MADAME C. P. STRASSHEIM. Yellowish white in summer, sulphur yellow changing to buff in autumn; fine bud, foliage and habit; exceedingly free blooming.

MADAME LAMBARD. Salmon pink, shaded rose; large and fairly full.

MADAME SCHWARTZ. White, tinted rose, very vigorous.

MADAME WELCH. Outer petals pale yellow, centre deep apricot; very handsome.

MADAME CAROLINE TESTOUT. Large, globular; bright flesh pink; in way of La France, but darker; immense petals, free bloomer and robust grower.

MADAME ELIE LAMBERT. Beautiful flesh rose, satiny white at edge of petals; large, full and very free bloomer.

MDLE. RANCISCA KRUGER. Coppery yellow and peach; large, full and well-formed; profuse bloomer.

MDLE. CHRISTENE DE NOUE. Very large, full, and good form, rosy lake, outer petals darker and shaded with purple.

MARIE VAN HOUTTE. Pale straw yellow, edged with rose; large, full, and vigorous; a grand rose, and constant bloomer.

MADAME JEAN DUPUY. Color rosy yellow, changing to creamy white and yellow towards the margin, outer petals edged with rose; long pointed, but opening to large well formed flower.

MADAME HENRI BERGER. China rose color, long pointed bud, opening to large; full flower; sweetly scented.

MRS. STEPHEN TRESSEDER. Lemon yellow, sport from Anna Olivier, destined to supersede Madame Hoste.

MILDRED GRANT. Enormous flower, on strong firm stalk; fine form, magnificent guard petals, pale rosy white; a very fine rose.

MA TULIPE. Rich deep crimson, semi-double, large stiff petals like a tulip, good for cutting, very vigorous.

MADAME ABEL CHATANAY. Rosy carmine, shaded salmon; good.

MADAME ANTOINE MARI. Rose washed and shaded white; handsome buds, which open well; growth vigorous and free from mildew.

MADAME POL VARIN-BERNIER (Tea). Soupert et Notting, 1907. Melon color in the different shades; flowers of good size and perfect form. A superb novelty, having the charms of a Yellow Richmond. 1s 6d.

MARTHE BERNARDIN (H.T.). Pierre Guillot, 1907. Growth vigorous, flowering freely and continuously; flowers large and full cupped form, buds elongated; color, centre golden yellow, outer petals pure white, sometimes shaded salmon; very beautiful. 1s 6d.

MARICHU ZAYAS (H.T.). Soupert and Notting, 1907. A vigorous grower, of excellent habit, flowering freely and continuously; the flowers, which are produced on long stems, are very large and of good form, and very sweetly scented. Color soft strawberry and cream, shaded brilliant rose. A grand rose of unquestionable merit. 1s 6d.

MDLE. RENEE DENIS. Chedane, 1907. Growth vigorous, very large and full, cupped form, bud long and opening well; color, white, shaded rose, centre salmon. 1s 6d.

MADAME EUGENE RESCAL. Coppery red to China rose, orange ground.

MADAME ANTHONY CHOQUENS. Buds amaranth; reverse of petals deep rose; open flowers currant red; growth vigorous.

MADAME VERMOREL. Rose with coppery centre, shaded and lined with red; extra large buds, good for cutting.

MRS. B. R. CANT. Deep rose and rich red inner petals, soft silvery rose, suffused with buff at base; good substance and form; a hardy variety and vigorous grower.

MRS. REYNOLDS HOLE. Large, full flower; deep shaded crimson; produced singly on a long stalk; vigorous; brown foliage.

METEOR. Rich, dark, velvety crimson, retaining its color well.

MISS ETHEL BROWNLOW. Pink, shaded yellow at base of petals; beautiful in bud.

MARQUISE LITTA. Carmine rose, vermilion centre, first rate dark tea, moderate grower.

- MRS. JOHN BATEMAN.** Vigorous growth, and very free flowering; blooms perfect shape, full and highly pointed; color deep China rose, yellow at base of petal.
- MRS. CONWAY JONES.** Vigorous grower and of free branching habit, flowering continuously and profusely throughout the season. The blooms are of enormous size, very full and perfect form, petals of great size, and substance, and very smooth. The color is creamy white, flushed salmon pink. We can confidently recommend this for all purposes—exhibition or garden decoration.
- MRS. DAVID M'KEE.** Strong robust growth and erect branching habit, with large handsome foliage. Every shoot is crowned with a bud, which develops into a flower of large size, great substance, and splendid form. The petals are large, smooth, and circular; color a beautiful creamy yellow; a wonderfully free and continuous blooming rose.
- MORNING GLOW.** Flowers bright rosy crimson, richly suffused with orange and fawn, a brilliant and fascinating combination of colors; large and full, with bold and massive petals. Award of merit from the Royal Horticultural Society.
- MISS MARSTON.** Outer petals pale rose deeper in centre; good shape; vigorous, and free blooming.
- MRS. EDWARD MAWLEY.** Bright carmine, shaded salmon; of great substance and beautifully formed; growth vigorous and branching, flowering throughout the season; a grand acquisition to tea roses, and a prize-taker wherever exhibited.
- MRS. ROBERT GARRETT.** An improved Madame Caroline Testout, of better habit; long pointed buds.
- MRS. JAMES WILSON.** Large and full; color between Bride and M. van Houtte; very free blooming.
- MAMAN COCHET.** Flesh rose, shaded salmon yellow; fine long bud; first-class; one of the very best.
- MEDEA.** Large globular bloom, full and well formed; lemon yellow, canary centre; vigorous grower.
- META (T.).** Crushed strawberry, suffused with saffron.
- MURIEL GRAHAM.** Cream, shaded pink; good, a prize-taker.
- MONSIEUR TILLIER.** Pale sulphur yellow, tinged pink.
- NIPHETOS.** Pure white or pale lemon; beautiful long bud; should be in every collection.
- OBERHOFGARTNER TERKS.** Light salmon pink, extra long pointed buds, opening to large, full flower, good shape. Good show rose.
- PAPA GONTIER.** Semi-double, petals large; rose and rosy crimson; a grand bloom.
- PAUL LEDE.** Superb carmine rose, shaded with yellow, large, full and cupped. Can recommend.
- PAUL NABONNAND.** Satiny rose, veined with peach! large, full, and well formed.
- PEERLESS.** Lippiatt, 1907. A very superior novelty from New Zealand. Growth erect and vigorous, flowering freely, blooms large, full, and well formed; color pale green, shaded white. 1s 6d.
- PEGGY (H.T.).** Semi-double, claret smeared saffron yellow, flowers borne in trusses, free blooming; vigorous growth; a charming garden variety, of Meta and Meryl type.
- PENELOPE (Tea Scented).** Raised by Mr. John Williams, of Mount Gravatt, Queensland. The lower half of the flower is a dark reddish crimson, while the centre is white with a deep red flush on the lower side of centre petals. The flower is full and solid, with petals of good substance, lasting well when cut. Sure to become a favourite. Awarded certificate of merit R.H.S., England, 1906. 1s 6d.
- PERLE DE JARDINS.** Canary yellow; large, full and globular; one of the best.
- PERLE DES JAUNES.** Fine golden yellow, centre copper, fine shape. First class certificate at Lyons. Very promising and good grower.
- PERLE VON GODESBERG.** Golden yellow, sport of "Kaiserin A. Victoria," said to be equally good as the old variety in every way.
- PETRUS DONZEL (Bengal).** Velvet purplish crimson; medium size; growth vigorous, and very free flowering.
- PEACE (T.).** Pale lemon, with slight tinge of blush; buds long and pointed.
- PHARISAER.** Rosy white, shaded salmon, long pointed bloom, vigorous, free flowering; good.
- PINK PERLE.** Deep rose, shaded carmine.
- PRESIDENT.** Rose, shaded salmon; large and good form; one of the best.
- PRINCE DE BULGARE.** Silvery flesh, very delicately shaded with salmon, long bud, opening to full cupped-shaped flowers; a very charming variety.
- PRINCESS ALICE DE MONACO.** Creamy yellow, edged with rose, centre peach red, handsome long buds, and very free. A fine autumn blooming rose.
- PRINCESS DE VENOSA.** Nankeen yellow, shaded carmine and violet; distinct and beautiful.
- PRINCESS DE SAGAN.** Velvety crimson, shaded purple; medium size; full.
- PROFESSOR GANIVIAT.** Purplish rose; medium size, full and free; vigorous.
- QUEEN OF SPAIN (H.T.).** S. Bide and Sons, 1907. This magnificent rose, raised by S. Bide and Sons, of Farnham, Surrey, England, is a robust grower, and the flowers are large, full, and globular. Color pale flesh, darker in the centre. An ideal exhibition rose, of undoubted merit. 2s.

- QUEEN.** Pure white sport of Souvenir d'un Ami; free blooming and very fragrant; a grand rose; should be in every collection.
- QUEEN OF GREECE.** A sweet shade of pink, good grower, free blooming, fine pointed buds; one of the best.
- REV. DAVID R. WILLIAMSON.** A most distinct and excellent variety, of vigorous growth. Every shoot terminates in a bud, which develops into a flower of large size, enormous substance, and globular form, with large, well shaped petals. Color dark velvety crimson, shaded maroon.
- RICHMOND.** Superior to Liberty in size and form, color pure red scarlet, very free flowering. Splendid.
- RAINBOW.** Very large and well formed; semi-double in way of Papa Gontier; soft rose, striped with carmine; very effective.
- RENEE WILMART-URBAN (H.T.).** Pernet Ducher, 1907. A vigorous grower, with long buds, flowers large, full, and of elegant form. Color salmon flesh, edges of petals tinted and bordered with carmine. 1s 6d.
- REUBENS.** White, shaded rose, cream centre; large, full, and fine form.
- RUBY GOLD.** Golden yellow, shaded carmine; very large, full, and free; a splendid bloom.
- ROBERT SCOTT.** Very large; full, rosy, shading to flesh on outer petals; a very constant bloomer, and likely to be a valuable addition to its class.
- ROSE D'EVIAN (H.T.).** Buds magenta, opening flowers inside petals carmine, outside rose; large, full, and cupped petals of great substance.
- SAPRANO A FLEURS ROUGES.** Red Safrano, rosy red, shaded yellow, sport from Safrano.
- SALMONEA.** Deep bright crimson, with light salmon centre; flowers large and full.
- SARAH BERNHARDT (H.T.).** Bright scarlet crimson, shaded with scarlet. Very large and full, with incurved petals. Does not burn. Very sweet. Growth, semi-climbing. 1s. 6d.
- SAPPHO.** Outer petals pale buff, centre apricot; large.
- SENATEUR BELLE. (H.T.).** Salmon flesh, shaded with carmine, centre deep yellow, large, double, and globular. (Very effective.)
- SHANDON.** A variety of similar type to Countess of Caledon. Robust, erect, and of branching habit, flowering most continuously; the blooms are large, full and perfectly formed, with high-pointed centre; deliciously perfumed.
- SOUVENIR DE AUGUSTE LEGROS.** Dark red shaded crimson; large and well shaped.
- SOUVENIR DE PRESIDENT CARNOT.** White, tinted rose; large, full, and well formed; beautiful long bud.
- SOUVENIR ELISE VARDON.** Creamy white, yellowish centre, petals edged rose; large and full.
- SOUVENIR D'UN AMI.** Salmon rose, large and fairly full.
- SOUVENIR DE GEORGE SANDS.** Salmon rose shaded yellow; large and full; good.
- SOUVENIR OF STELLA GRAY (Tea).** Alex. Dickson and Sons, 1907. The most beautiful, distinct, and charming addition to this class for many years past. The flowers are very full, medium size, and of perfect form. The predominating shade is deep orange, with splashes of apricot, salmon, and crimson. The growth is very free, and branching. Most lovely. Award of Merit, R.H.S. 1s. 6d.
- SOUVENIR DE MADAME ERNEST OUDIN (H.T.).** Bonnaire, 1907. Growth vigorous and free, flowers large and full. Color splendid tin white, shaded light blue; very curious and beautiful. 1s. 6d.
- SOUVENIR DE CLAIRVAU.** Medium size, full and well formed; bright China rose, base of petals apricot.
- SOUVENIR J. B. GUILLOTT.** Bright strawberry red, changing to Capucine yellow.
- SOUVENIR DE JEANNE CABAUD.** Outer petals shaded carmine, centre salmon peach.
- SOUVENIR THERESA LEVET.** Velvety crimson; large and full; good form.
- SOUVENIR DE WM. ROBINSON.** Four colors are present in this rose, viz., rose, cream, apricot, and violet, which produces a very beautiful effect; vigorous.
- SOUVENIR DE PAUL NEYRON.** Fine salmon yellow, edged with rose; full, of fine form, and produced freely.
- SOUVENIR DE MARIE ZOZOYA.** Bright coral red; flowers of immense size, full, and of perfect form; growth vigorous; a beautiful and most distinct variety.
- SOUVENIR DE PIERRE NOTTING.** Fine apricot yellow, washed with golden yellow and shaded with orange; very large and full, opening well; highly recommended from the Continent, where it has received several gold medals.
- SOUVENIR DU ROSIERISTE RAMBAUX.** Creamy yellow; edged carmine rose; medium size; cupped and fragrant.
- SUNSET.** Deep apricot; large and full; a grand rose in all stages; splendid for exhibition.
- SUNRISE (T.).** This is a fine rose, the first sport from "Sunset," outer petals reddish carmine, shading to delicate fawn and pale salmon in the centre; very poor grower.
- SYLPH.** Ivory white, tinted pale peach, centre creamy pink, a beautiful blending of colors; a prize-winner wherever exhibited.
- TRIOMPHE DE PERNET PERE.** Bright red, good form, vigorous and free flowering; good.

THE BRIDE. Pure white, generally with a greenish tinge; outer petals tinged pink; a most valuable white rose, and should be in every collection.

ULSTER. Magnificent and perfect rose, full-age large; very free flowering; blooms of immense size; splendidly formed; color bright salmon; a large prize-taker on English show tables.

VICKS CAPRICE. Magenta pink; striped and splashed with white; very beautiful and distinct.

VISCOUNTESS FOLKESTONE. Creamy pink, centre salmon pink; large, full, and very sweet.

WARRIOR. W. Paul and Son, 1906. Blood-red color in the bud, opening to scarlet-crimson, double flowers of good size, and blooming with great freedom from early summer till late in the autumn.

WABAN. Bright pink sport from Catherine Mermet; very good.

W. F. BENNETT. Bright crimson, fine in the bud; free flowering.

WHITE MAMAN COCHET. A sport from Maman Cochet, almost pure white, or creamy white, petals slightly tinged pink; a grand rose, and always in bloom.

WHITE LA FRANCE. In way of old La France, but pale peach to almost white; most highly perfumed.

WHITE PERLE. Sport from Perle des Jardins, or Jean Pernet; long, beautiful, creamy white bud, outer petals tinged rose; one of the best all-round garden roses.

W. E. LIPPIAT (H.T.). Alex. Dickson and Sons, 1907. This is a most welcome addition, supplying a color much required, namely, brilliant velvety crimson, shaded maroon; very distinct. The blooms are large, full, and well-formed, with high, pointed centre, and very sweetly perfumed. Growth vigorous, and of free, branching habit. Quite first-rate. A grand addition to the Hybrid Tea Section. 2s.

WILLIAM SHEAN (H.T.). A glorious rose of unquestionable merit, having immense size, perfect form and substance; its color is the purest pink with delicate ochrey veination; a splendid rose that can be compared with no other bloom in the rose world; it has shell-like petals four or five inches long. One of the largest roses yet distributed.

WHITE LORD TARQUIN. Pure white sport from the well known pink rose of the name; very free blooming; lasts well when cut.

WILLIAM ASKEW. Bright pink, large, free, and good form; a fine rose.

YE PRIMROSE DAME. Outer petals creamy white, or delicate primrose yellow.

CLIMBING ROSES.

ARDS PILLAR. Garden and pillar rose. The growth is very vigorous, with very large, most distinct, and attractive foliage. The blooms are produced with great freedom, and are large, full, and of cupped form; petals very large and smooth; rich velvety crimson.

AMERICA. Pale yellow or cream, shaded fawn, large, full, and well formed; very useful.

AUSTRALIE (H.T.). Kerslake. A cross between "Belle Seibrecht" and "C. Testout." Colour deep pink. Good show and garden rose; growth vigorous; very sweetly scented.

AUSTRAL QUEEN (H.T.). Kerslake. A cross between "President" and "Mrs. John Laing." Color similar to last named parent. Very vigorous and sweetly scented.

BARDOU JOB. Bright glowing crimson, shaded, with black, semi-double; a distinct and striking rose of great merit.

BELLE LYONAISE. Deep canary yellow, almost white; large, full, and globular.

BILLIARD AND BARRE (T.). A beautiful new climbing rose of a rich golden orange color, with large handsome foliage.

CLOTH OF GOLD. Sulphur yellow; grand climber.

CLIMBING BELLE SIEBRECHT. A well developed climbing form of the Hybrid Tea Rose, Belle Siebrecht, which appears to be constant, and will prove a most welcome addition to the pink, perpetual flowering, climbing roses; very strong grower.

CLIMBING DEVONIENSIS. A sport from Devoniensis; very strong grower; very free blooming; flowers same as old Devoniensis.

CLIMBING NIPHETOS. A very desirable sport of old Niphetos; very strong growing.

CLB. CAROLINE TESTOUT. A climbing form of the beautiful and popular variety, Caroline Testout.

CLIMBING MADAME WATTEVILLE. A climbing form of the well known beautiful dwarf of the same name.

CLIMBING MADAME JULES GROLEZ (H.T.). Sport of extra vigorous growth, producing flowers identical with the variety from which it sprang; well adapted for a climbing or pillar rose. Chinese pink, bright and satiny; large and finely formed; a free bloomer; beautiful buds. 1s 6d.

NEW CLIMBING ROSES, 1907.

- CLIMBING FRAU KARL DRUSCHKI** (H.P. W. Lawrenson, 1906. Pure white, like the normal type, which is considered by many to be the very best white rose extant. It will certainly be a great acquisition to this section, as it should prove to be the best white climber.
- CLIMBING WHITE MAMAN COCHET** (Tea Scented). As this is a strong climbing form of the well known rose of the same name, it will need no further recommendation. Raised in New South Wales.
- CLIMBING ELISE VARDEN**. A true climbing sport of the well known favourite of same name; originated in New South Wales, and promises to be a fixture as a climber.
- CLIMBING ULSTER**. Vigorous growing sport from dwarf of same name; raised in New Zealand.
- CLIMBING PAPA GONTIER**. Climbing sport of Old Papa Gontier; very vigorous, whilst retaining its free flowering character.
- CLIMBING METEOR**. A very robust sport of Meteor; very free blooming, and a good addition to the list of climbers.
- CLIMBING LA FRANCE**. Climbing sport of that well known favourite; in every respect equal to its parent, but of more vigorous growth.
- CLIMBING SOUVENIR DE WOTTON**. Strong-growing variety, of variety of same name; very free bloomer.
- CLIMBING SOUVENIR DE LA MALMAISON**. A rampant climber, and very free blooming; when established covers more space in a given time than any other variety we know.
- CLIMBING AMIE VIBERT**. A strong growing sport of old variety of same name; a good thing.
- CLIMBING PERLE DES JARDINS**. Perhaps the very best rambling rose in cultivation.
- CHESHUNT HYBRID**. Carmine red, shaded violet; large, full, and well formed; free grower, and grand as a pillar rose.
- CLIMBING COMTESSE LABARTHE**. A strong climbing sport of the old variety; most constant bloomer.
- CLIMBING KAISERINE AUGUSTA VICTORIA**. Strong climbing sport of dwarf variety of same name; free grower, and constant bloomer.
- CELINE FORRESTIER**. Pale yellow coppery centre; large flower; free and very beautiful.
- CLIMBING CAPT. CHRISTY**. A vigorous sport from the dwarf variety.
- DUCHESSE D' AUERSTADT**. Yellow, nankeen centre, large and full, and a vigorous grower.
- E. VEYRAT HERMANOS**. A most distinct rose of strong climbing habit; apricot and carmine; reflex with deep red; sweet scented.
- ENGLAND'S GLORY**. A magnificent climbing rose, being a seedling from Gloire de Dijon, crossed with Belle Siebrecht; flowers large, full, and well formed; flesh color, centre satiny pink; highly perfumed. A splendid grower, and very hardy.
- FIANCAILLES DE LA PRINCESS STEPHANIE** (T.) Levet, 1880. Orange and coppery-yellow, deeper in centre; fairly large and full.
- FIELD MARSHALL**. Identical with James Sprunt.
- FUERST BISMARCK**. Sport of Gloire de Dijon; light yellow flowers.
- FRANCOIS CROUSSE**. Bright crimson to fiery red; large and full; a grand acquisition to climbing roses.
- GLOIRE DE DIJON**. Yellow and buff, shaded salmon; large, full, and free grower.
- GOLDEN QUEEN**. A climbing Noisette rose, somewhat resembling Reve d'Or in its foliage and rapid habit of growth, but the flowers are of a deeper and more uniform shade of rich golden yellow, shaded with copper.
- JAMES SPRUNT**. Rich scarlet crimson; large, full and globular; blooms in clusters.
- LADY WATERLOW**. Pale salmon rose, edged with carmine; large semi-double flowers; very elegant; a rampant climber.
- LA MARQUE**. White, tinged yellow; full, blooms in clusters; free grower.
- LA IDEAL**. Coppery rose and yellow; producing beautiful buds of Ma Copucine type; good bloomer, and free grower.
- MAMIE**. Rosy carmine, with distinct yellow zone, full and perfectly formed, with high-pointed centre, petals large, smooth, of great substance.
- MADAME EUGENE VERDIER**. Chamois yellow, orange centre, large, full and free.
- MADAME TRIFLE**. Salmon yellow, outer petals sometimes a deep coppery yellow; seedling from Gloire de Dijon; a good pillar or climbing rose.
- MADAME BERARD**. Salmon rose, shaded yellow; large, good shape, and free grower.
- MARECHAL NIEL**. Rich golden yellow; large, full and globular; cannot be surpassed as a climber.
- MARECHAL NIEL (White)**. A pale variety of foregoing; blooms of a pale sulphur yellow, sometimes almost white; in every way equal to old Marechal Niel as a bloom, and is a more vigorous grower.
- MADAME WAGRAM COMTESSE DE TURENNE** (H.T.). A beautiful climber; flowers of a satin rosy color, a new color in climbers; vigorous and free; very good.

WRITE FOR SPECIAL QUOTATIONS FOR LARGE QUANTITIES.

MADAME ANDRE DURON. Bright China pink; sweetly scented, distinct, and very useful.

MADAME PIERRE COCHET (Noisette). A seedling from William Allen Richardson, and considered a great improvement on that variety.

MADAME HECTOR LEUILLOTT (H.T.). Superb golden yellow, tinted with carmine in centre, flowers large, full and globular; growth very vigorous. Very fine; very strong climber.

MONSIEUR DESIR. Rich maroon crimson; vigorous climber; sweetly scented.

NOELLA NABONNAND. Extra large, semi-double; velvety crimson; large petals, sweet, handsome in bud, and more vigorous than Reine Marie.

PAUL'S CARMINE PILLAR. New single rose, with abundance of flowers of bright, rosy carmine; strong grower, and a mass of bloom.

REINE MARIE HENRIETTE. Bright rosy cerise, sometimes crimson; large long bloom; good shape; free.

REVE D'OR. Coppery yellow; full, well formed and fragrant; an excellent pillar rose.

REV. T. COLE. Bright yellow, large, full, and well-shaped; color between Cloth of Gold and Marechal Niel; free growing.

RED MARECHAL NIEL (Grand Duc Ernest Ludwig). Carmine red; shaped like Marechal Niel; free grower, and very sweetly scented.

SINICA ALBA. (The Camellia Rose of Japan). A beautiful evergreen climber, with large single flowers; pure white, with yellow stamens and large glossy deep green foliage; a strong grower.

SINICA "ANEMONE" (the Cherokee Rose). This is a very beautiful single flowering rose, with large flowers $3\frac{1}{2}$ inches across; color light silvery pink at the edges, gradually deepening to bright rose at base; resembling a Japanese Anemone; bright, shiny foliage; very free and exquisite.

SOLFATERRE. Sulphur yellow, large and double.

SOUVENIR DE MADAME METRAL. Bright red, shaded vermillion; perfect shape; large and full; one of the best.

SOUVENIR DE ELIE LAMBERT. Deep yellow in the way of Sunset; a vigorous and beautiful climber; foliage most attractive; should be in every collection.

SOUVENIR DE LEONIE VIENNOT. In this we have one of the most beautiful climbing roses of recent introduction, extra strong for even a climbing rose, producing lovely flowers; silvery rose, shading to carmine, base of petals canary yellow, forming a most beautiful combination of colors.

WALTHAM CLIMBERS (Nos. 1, 2, and 3). Good climbers; various shades of crimson; No. 1 light, 2 medium, and 3 dark crimson; all good blooms.

WM. ALLEN RICHARDSON. Deep orange yellow; most floriferous and very distinct.

HYBRID PERPETUAL ROSES.

VARIETIES enumerated under this heading include all the choicest dark blooms in cultivation. They are not perpetual bloomers like Teas and Hybrid Teas, but bloom in early Spring, and occasionally in autumn. Their great substance, with excellence of form, coloring, and high perfume, render them a class very suitable for show purposes and table use.

ABBEBRAMEREL. Reddish crimson, shaded dark velvety purple, almost flat when expanded, large, full, and early.

ARDS ROVER. Probably darkest rose extant; deep crimson, shaded maroon; perfect shape.

ALFRED COLOMB. Bright red; large and full.

A. K. WILLIAMS. Carmine red, changing to magenta.

ANDRE RAFFRAY. Dark maroon red.

ANDRE DEROY D' ANGERS. Velvety crimson, shaded purple.

BARBAROSSA (H.P.). Welter, 1907. Growth vigorous, very floriferous; flowers large and full, always opening well. Color, pure carmine red. Said to be a red Frau Karl Druschki. 1s 6d.

BEAUTY OF WALTHAM. Bright cherry red; good form.

BEN CANT. Good foliage; strong grower, and every shoot, either as a maiden or cut-back, produces flowers. Flowers large, well-formed with high centre; color, deep clear crimson, darker shading to centre. Retains its color for a long period. Grand show rose.

BLACK PRINCE. Dark crimson.

CAPTAIN CHRISTIE. Rosy flesh, deeper in centre; grand rose.

CAPTANE JOUEN. Bright vivid crimson, very large and full, growth very vigorous; has received several medals in France as a new variety.

CHARLES LEFEBVRE. Crimson, purplish centre.

CLIO. Flesh color, centre rosy pink, large, full and free flowering; late bloomer.

CRIMSON QUEEN. Velvety carmine, fiery red centre, large, full and globular.

- COMMANDANT FELIX FAURE.** Rich lake, shaded black, and flushed with brilliant vermillion; globular; growth vigorous; has also been awarded several distinctions in France as a new variety. First-rate.
- CAPTAIN HAYWOOD.** Bright crimson carmine, large bold petal, strong grower, very free flowering; one of the most handsome roses ever raised.
- COMMISSIONER.** Magnificent dark purplish red; large, bold petals; good grower.
- DAVID R. WILLIAMSON.** Soft, rich carmine rose, large, full, and expanded in shape; petals smooth and firm in texture. An exhibition flower of the first quality, the habit of growth being vigorous, even, and regular, whilst the flowers are produced on strong, upright stalks.
- DUKE OF EDINBURGH.** Rich crimson scarlet, shaded maroon; very free blooming.
- DUCHESS OF YORK.** Pale pink; quite mildew-proof; good.
- DEVIL DE PRINCE ALBERT.** Crimson maroon, very deep color; a grand rose.
- DR. RUSPLER.** Dark velvety crimson, shaded black; almost perpetual.
- DR. HOGG.** Violet red; best of its shade.
- DR. WM. GORDON.** Brilliant satin pink; large deep petalled, high-centred flowers, full to the centre; a strong growing variety, blooming very freely, and destined to rank as one of the best in this color; valuable for exhibition.
- EARL OF HOPETOUN.** Dark red, of cup form; free blooming.
- EARL OF DUFFERIN.** Velvety crimson, shaded maroon; large, perfect form, and free blooming.
- EMPEROR D' MAROC.** Rich velvety maroon; an old favourite.
- EMPRESS OF INDIA.** Deep, blood-red; large and full.
- FRAU KARL DRUSCHKI.** The finest white H.P. extant; of perfect form and vigorous growth; a grand acquisition to the garden and show tray.
- GLORY OF WALTHAM.** Rich crimson; very bright and showy; flowers very large.
- GRAND MOGUL.** Deep crimson, shaded scarlet and black.
- GENERAL ANNAKOFF.** Deep vermillion, shaded dark brown.
- HER MAJESTY.** Clear, bright, satiny rose; extra large; strong grower; best of its class.
- HUGH DICKSON.** Brilliant crimson, shaded scarlet; good size and form; growth vigorous; highly perfumed. Gold medal N.R.S.
- HUGH WATSON.** The blooms are very large, full, and most perfect shape; quite exhibition form; the petals are unusually large, smooth, and massive; buds are long and pointed; the growth is vigorous and of free branching habit; very sweetly perfumed; color crimson, shaded carmine.
- ILLAWARRA.** Dark velvety crimson, distinct and good.
- JEAN CHERPIN.** Purplish red, shaded scarlet; vigorous.
- JEAN LIABAUD.** Velvety crimson, purplish shades.
- JOHN BRIGHT.** Bright scarlet crimson.
- JUBILEE.** Pure red, shaded maroon and crimson; large and free.
- J. B. CLARK.** Awarded gold medal by National Rose Society of England, 1905. Color richest velvety crimson; flowers extra fine; growth very vigorous; evidently requires a season or two to become acclimatised.
- LOUIS RICARD.** Deep velvety crimson, almost black; petals nicely arranged; not extra full; opens well.
- MADAME BARONESS DE ROTHSCHILD.** Pale pink, tinged white; large, full, and very free bloomer.
- MARGARET DICKSON.** White, pale flesh centre; good.
- MARIE BEAUMAN.** Bright carmine, of fine form.
- MERVILLE DE LYON.** White, sometimes tinged with rose; an improvement on Mabel Morrison.
- MRS. HARRY TURNER.** Crimson scarlet, shaded maroon.
- MRS. JOHN LANG.** Soft clear pink; well formed and full; nearly perpetual.
- PAUL DUPUY.** Dark velvety maroon, shaded black.
- PAUL NERON.** Deep rose; immense size; strong grower.
- PIERRE NOTTING.** Very dark, violet shadings.
- PRINCE CAMILLE DE ROHAN.** Very dark crimson; one of the best.
- ROBERT DUNCAN.** Bright rosy lake; large and good form.
- ROSIERISTE JACOB.** Velvety red, shaded black; well formed; vigorous.
- ROGER LAMBELLE.** Deep crimson, with distinct white margin.
- TRIOMPHE DE LYON.** Deep velvety crimson; fine.
- W. G. JUDD.** Without exception the very finest of dark roses; blooms velvety crimson, shaded black and maroon; frequent bloomer, opens perfectly, and will last for days as a cut bloom.

SINGLE ROSES.

SPLENDID FOR GARDEN AND DECORATIVE WORK.

IRISH BRIGHTNESS. Vivid crimson; fine foliage; very distinct.

IRISH ENGINEER (H.T.) Color is dazzling scarlet, very brilliant and attractive; the flowers are very large, with massive circular petals, and are usually borne in trusses of three to five blooms, on perfectly erect stems.

IRISH GLORY. Inside of petals pink, crimson on black; large flowers.

IRISH HARMONY. The color is variable, novel, and distinct, and the buds when opening are a saffron yellow, crayoned or smeared claret; the flowers when expanded being creamy white, and of immense size, measuring from five inches in diameter.

IRISH MODESTY Coral pink, suffused with ecru, yellow anthers.

IRISH PRIDE. Ecru and rose, the zone gold; a real gem.

IRISH STAR. Rose du Baru, golden stamens, most unique.

A charming set of single roses, raised by A. Dickson and Son, Ireland. Flowers freely produced, large, growth vigorous. Well worth growing, highly decorative. They are pure tea roses. The flowers last well when cut.

Described in body of Catalogue—

MADAME EUGENE RESCAL (China).

AUSTRIAN COPPER BRIAR.

FORTUNES YELLOW (Climber).

BARDOU JOB (Climber).

NOELLA NABONNAND (Climber), semi-double.

SINICA ALBA (Cib.)

SINICA ANEMONE (Cib.)

EVERBLOOMING POLYANTHA ROSES.

A **PRETTY** class of Miniature Roses, specially valuable for decorative purposes, button-holes, etc. They are constant and prolific bloomers, and every collection should include a few.

ETOILE D'OR. In way of Perle l'Or, but smaller; outer petals pale chrome, centre deep lemon; buds dark chrome.

EUGENE LAMESCH. Buds coppery red; opening flowers ochre yellow, changing to clear yellow shaded with rose; good shape; very fragrant.

GEORGE PERNET. Delicate salmon rose.

LEONIE LAMESCH. Bright coppery red, shaded with deep red and yellow; very rich, and an entirely new color in this section.

MADAME FREDERICK WEISS. Beautiful magenta blooms, borne in great profusion; a grand thing; should be in every collection.

MADAMOISELLE CECILE BRUNNER. Salmon pink; coppery salmon centre; small, very full, and perfect shape.

MINIATURE. Small, daisy-like flowers, produced in great profusion, white tinted with rose.

PERLE D'OR. Nankeen yellow, buds deep apricot; very constant bloomer, and good.

RED PET. Very small and perfect; dark rich crimson.

CLIMBING POLYANTHAS.

AGLAIA (Yellow Rambler). Bright yellow; almost evergreen; bears immense clusters of rosette-shaped, beautifully-scented blooms.

CLIMBING CECILE BRUNNER. Similar to dwarf variety in bloom, but is a very strong climber.

CRIMSON RAMBLER. Flowers large for its class, produced in clusters of dazzling crimson; very vigorous, foliage glossy green; a grand climber.

EUPHROSUNE (Pink Rambler). Flowers in clusters; delicate shade of carmine pink; good.

HELENE (New). Best of all Ramblers; habit of growth identical with Crimson Rambler, but flowers delicate shade rose pink, shaded carmine and orange; trusses enormous.

THALIA (White Rambler). Flowers pure white; long, trailing bunches of bloom.

BOURBON ROSES.

SOUVENIR DE LA MALMAISON. Pale flesh, deeper centre; very large and full, constant bloomer.

J. B. M. CAMM. Very pale salmon pink, large, full high-centred; growth vigorous.

BANKSIAN ROSES.

ALBA. Pure white; small and full, large clusters, strong climber.

LUTEA. Similar to foregoing; buff yellow.

FORTUNEII. White; large blooms; vigorous.

FORTUNE'S YELLOW. Bronzy yellow; semi-double.

WICHURIANA ROSES.

(The Creeping Roses for covering banks).

ALICE GARNIER. Fauque and Fils, 1907. Buds round, flowers small, very double, color pink, with yellowish ground, dark green glossy foliage; very beautiful. 1s 6d.

DOROTHY PERKINS. A beautiful shell pink; the flowers are borne in large clusters of small double blooms and very sweetly scented; of strong climbing habit.

MANDA'S TRIUMPH. Large clusters of double white flowers, bright pink.

PINK ROAMER. Flowers two inches across, rich, bright pink.

SOUTH ORANGE PERFECTION. A free grower, close to the ground; large numbers of pretty flowers, white, tipped with pink.

UNIVERSAL FAVOURITE. Large, double pink flowers, with dense green foliage.

HYBRID NOISSETTE ROSES

AIMEE VIBERT (Vibert). Pure white, full, and well formed, blooming in clusters, habit vigorous.

ALLISTER STELLA GREY (Climber). A beautiful variety, bearing enormous clusters of small, pale yellow flowers, with orange centre. Splendid for buttonhole and other decorative work.

BOULE DE NIEGE. Pure white.

ELIZA BOËLLE. White, rose centre.

PERLE DES BLANCHES. Pure white, of medium size, full, and of good form.

MOSS ROSES.

CRESTED MOSS. Best of all Moss buds; delicate pink.

PINK MOSS. WHITE MOSS.

WHITE BATH. Pure white; flowers in clusters, heavily mossed.

WM. LOBB. Purplish red; very floriferous.

SUMMER ROSES.

AUSTRIAN BRIARS.

PERSIAN YELLOW. The richest yellow; large and double.

SOLFIL D'OR. Color varying from orange-yellow to reddish-gold, shaded with nasturtium-red; conical-shaped buds.

STANDARD ROSES.

2s. 6d. to 3s. 6d. EACH.

WE have some fine Standards; all best varieties, on stems 2½ ft. to 4 ft. high; and can furnish lists of varieties on application.

SPECIAL ROSE COLLECTION.

We are prepared to supply these, our own selection: **24 Well grown Plants**, post free in N.S.W., for **20s.**

TRY OUR SPECIAL COLLECTIONS OF ROSES.

FERGUSON'S ANNUALS

AND OTHER SEEDLINGS.

WE are making a speciality of these lines, and can furnish strong, vigorous young plants, per post or rail, specially packed, at 6d per dozen, 4s per hundred; postage 3d per doz., 1s 3d per hundred extra.

LIST INCLUDES:—Those marked AUTUMN can mostly be supplied from April till August inclusive; SPRING, September till December.
